## HELPFUL HINTS:

This should be **Operator provided by Contractor**...Like any other piece of heavy equipment, .it doesn't make sense for the vendor to be paid to travel home and back every day.... they would be tented and feed like any other contractor stationed at the fire and being paid a Daily Rate.

This should be **Supplies provided by Contractor**. The Contractor arrives with 500 gallons of **potable water (be sure they meet specs) and a gray water tank**. Once that potable water runs out, the government supplies potable water and disposes of all the gray water. The Contractor supplies all paper hand towels and phosphate-free liquid soap. The Contractor provides all equipment including truck, fully operational, which includes all fuel, oil, preventive maintenance and repair.

The Wage Determination for light truck operator up to 1 ½ tons, is \$8.84 plus \$2.15 (Health & Welfare) for a total of \$10.99. The unit should be able to be pulled by a ¾ to 1ton truck, if they so decide to supply a bigger truck we don't pay for a heavy truck operator

The Geographical Supplement bases the Daily Rate on a 14 hour day ..... whether a 14 hour day is worked or not.

Requirements – they must meet potable water standards, gray water standards, have proper tanks, meet GVWR, etc.

- 500 gallon potable water tank (full at arrival)
- Each wash basin (sink) shall provide hot and cold water or heated water, shall control gray water and have the ability to hold water.
- Station shall have liquid soap dispensers, paper towel dispensers and mirrors.
- Faucets shall be used that allow for the washing of both hands while the water is running.

The handwashing station is not required to operate 24 hours per day. Ensure a Handwashing Station Manager or designated representative is available at the fire incident. Provide personnel to keep the Handwashing station in continuous operation during periods specified by the Government. All employees shall wear identification that distinguishes the company represented and shall be neat and clean in fact as well as in appearance. Only those Contractor employees essential to the mission may remain at the incident.

The Contractor is not paid mileage. They are on a Daily Rate like the Water Tender, Water Trucks, Engines and this has included into the Daily Rate. The contractor's vehicle could be signed up on another EERA but NOT USED at the same time the vehicle is on hire with the hand washing station.

The National Specifications are being negotiated at this time. Mary Fields, 406-329-3636, has given some suggestions on pricing. The last Engineer's Estimate has the sink priced between \$45 and \$50. This estimate will be redone, but feels it would not go over \$60 max. All whistles and bells provided by the Contractor are at his expense.

They are also thinking of making a minimum of 6 sinks and a max of 12 sinks. Anything over 12 would be at the vendor's expense.

They have been negotiating around \$48, if vendor wants too much, they just aren't signed up.

Example: Handwashing station has 8 sinks. Price would be negotiated between \$360.00 (8 X \$45) and \$400 (8 x \$50).  
If there was some real mitigating circumstances, it could go to \$480.00 (8 x Max of \$60)

## CONTRACTOR INFORMATION:

- \* Equipment description ( See template).
- \* Copy of workmen's comp coverage, or certification of exemption from state.
- \* Liability insurance coverage.
- \* Proof of completion of Standards for Survival and any other training that may be required for the type of equipment being signed up.
- \* Proof of physical fitness test, administered by whom and when, if applicable.
- \* Tax ID Number (Federal ID or Employer SSN), Duns number, and email address
- \*Copy of CCR registration
