# INCIDENT MANAGEMENT SITUATION REPORT MONDAY JULY 21, 2003-0530 MDT NATIONAL PREPAREDNESS LEVEL 4 

## CURRENT SITUATION:

Initial attack activity was heavy in Southern California and Southwest Areas, moderate in Eastern Great Basin, Northwest, Rocky Mountain, and Western Great Basin Areas and light elsewhere. Nationally, 322 new fires were reported. Nine new large fires were reported, three in Eastern Great Basin, two in Southern California, one each in Rocky Mountain, Northern Rockies, Western Great Basin, and Northern California Areas. Six large fires were contained, one in Western Great Basin, two in Eastern Great Basin, and three in Southern California Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington and Wyoming.

## SOUTHWEST AREA LARGE FIRES:

SPRUCE COMPLEX, Gila National Forest. A Type 2 Incident Management Team (Bateman) is assigned. This complex is composed of the Spruce, Silver, Nabours, and Parallel fires and is in brush, ponderosa pine and mixed conifer, 18 to 20 miles east, southeast and northeast of Glenwood, NM. No new information was reported.

MOLINA COMPLEX, Santa Fe National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This complex, comprised of the Capulin and Molina fires, is eight miles east of Cundiyo, NM. Crews are making good progress building direct fireline, yet are encountering extremely difficult terrain which is hampering suppression efforts. One residence and one commercial property are threatened; structure protection is in place.

BLUE RIVER COMPLEX, Apache-Sitgreaves National Forest. A Type 2 Incident Management Team (Rios) is assigned. This complex, comprised of the Steeple, Largo and Thomas fires, is in ponderosa pine, mixed conifer, pinyon, brush and grass, 18 miles south of Alpine, AZ. Fire moved with steady progress with one to three foot flame lengths. Crews are building containment lines on the Largo and Steeple fires.

KINISHBA, Fort Apache Agency, Bureau of Indian Affairs. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is in ponderosa pine, woodlands and chaparral, two miles west of Whiteriver, AZ. Isolated group torching and short range spotting were observed. Crews are conducting burn out operations, mopping up, and patrolling.

TURNBO, Gila National Forest. A Fire Use Management Team (Rath) is assigned. This fire is in mixed conifer with continuous pine stringers, 37 miles northwest of Silver City, NM, and is being managed with a confinement suppression strategy. Fire moved $1 / 2$ mile in two hours at the northwest flank with flame lengths up to 15 feet. Personnel are monitoring the fire.

DRY LAKE COMPLEX, Gila National Forest. A Fire Use Management Team (Rath) is assigned; the Team is also managing the Turnbo fire. This lightning caused Wildland Fire Use complex, comprised of the Sycamore, Moonshine and Granny fires, is 27 miles northwest of Silver City, NM. The primary fuels involved in these fires are pinyon pine, juniper, ponderosa pine and grass. The complex is being managed to accomplish multiple resource objectives. Interior pockets and jackpots of fuel are burning out. Personnel are monitoring fire spread by aircraft.

GRANITE, Gila National Forest. This fire is 13 miles northwest of Hillsboro, NM. Minimal fire behavior was observed in mixed conifer. Personnel are building containment lines and preparing Animas Creek for potential burn out operations.

WINCHESTER, Arizona State. This fire is in grass, mesquite, oak, and woodland, ten miles northwest of Willcox, AZ. Occasional flare-ups on interior pockets were observed. Personnel are monitoring the fire.

DIVIDE, Gila National Forest. This fire is seven miles southeast of Aragon, NM. Active fire behavior was observed in grass, ponderosa pine and mixed conifers. Crews are patrolling and mopping up.

SKELETON, Arizona State. This fire is in desert shrub, brush and open grassland, 15 miles east to northeast of Douglas, AZ. The fire is being managed in a confine/contain strategy. The fire will be monitored by aerial detection.

GOVERNMENT, Cibola National Forest. This fire is in ponderosa pine, juniper and pinyon, six miles north of Datil, NM. No new information was reported. This will be the last report unless new information is received.

## EASTERN GREAT BASIN AREA LARGE FIRES:

CRYSTAL CREEK, Salmon-Challis National Forest. This fire is in subalpine fir, brush and grass, 18 miles north/northwest of Stanley, ID. Active fire behavior with torching and spotting was observed. Heavy fuels, low live fuel moisture and high winds are hampering suppression efforts.

BENCH, Fishlake National Forest. This fire is in grass, brush, oak, juniper and pinyon pine, four miles south of Kanosh, UT. Active fire behavior with running and spotting a quarter mile ahead of the front was observed. Crews are flanking the fire.

BLACK ROCK PASS, Richfield Field Office, Bureau of Land Management. This fire is in grass, brush, juniper and pinyon pine, 32 miles southwest of Kanosk, UT. Extreme fire behavior with major downhill runs and multiple heads was observed. Personnel are holding containment lines at roads and burning out.

BLACKWALL, Salmon-Challis National Forest. A Type 2 Incident Management Team (Kechter) is assigned. This fire is in mixed conifer with heavy ground fuel, 32 miles north of Salmon, ID. Active fire behavior with torching and short crown fire runs was observed.

EAST TABLE, Bridger-Teton National Forest. A Type 2 Incident Management Team (Broyles) is assigned. This fire is ten miles east of Alpine, WY. Some interior burning with isolated torching and creeping ground fire was observed. Crews are constructing containment lines and mopping up.

TOBIAS, Salmon-Challis National Forest. A Type 2 Incident Management Team (Van Bruggen) is assigned. This fire is in grass, sage and mixed conifer with dead and down fuel, 18 miles north to northwest of Leadore, ID. Due to favorable weather conditions, fire growth was low. Crews are containing the front of the fire and mopping up.

BULLDOG, Richfield Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Brunner) is assigned. This fire is in oak, mountain mahogany, juniper and pinyon pine, 17 miles north of Ticaboo, UT. Moderate fire behavior with individual torching and small runs was observed. Crews are improving containment lines and conducting burn out operations. One commercial property is threatened; structure protection is in place.

FARMINGTON, Wasatch-Cache National Forest. This fire is in oak brush, cheat grass, spruce and fir, one-half mile east of Farmington, UT. No further information was received.

## ROCKY MOUNTAIN AREA LARGE FIRES:

BALCONY HOUSE COMPLEX, Mesa Verde National Park. A Type 2 Incident Management Team (Szczepanik) is assigned. This complex is comprised of Moccasin, White, Balcony and Park fires. Active fire behavior was observed in scattered pockets of pinyon pine and juniper fuels. Crews are patrolling and mopping up the north and south flanks.

BOLT, Southern Ute Reservation, Bureau of Indian Affairs. A Type 2 Incident Management Team (Perkins) has been ordered. This fire is 9 miles southwest of Pagosa Springs, CO. Extreme fire behavior was observed in ponderosa pine, mixed conifer and oak brush. Crews are building containment lines on the east and west flanks. Personnel disengaged from suppression activities yesterday afternoon due to safety concerns. Twenty-four residences are threatened; structure protection is in place.

JB, Western Slope Center, Bureau of Land Management. A Type 2 Incident Management Team (Saleen) is assigned. This fire is 42 miles southwest of Grand Junction, CO. Interior torching with short crown runs and creeping with isolated torching on the perimeter were observed in grass, sage, oak brush and ponderosa pine. Crews are making good progress on the Mesa divisions. Structure protection is in place for five residences.

BIG SPRING, Casper Field Office (East Zone), Bureau of Land Management. A Type 2 Incident Management Team has been ordered. This fire is 30 miles north of Kaycee, WY. Active fire behavior with group torching and short ground runs were observed in ponderosa pine, pinyon, and juniper. Crews are building containment lines with the support of aerial resources. Ten residences are threatened; structure protection is in place.

DEEP LAKE, Shoshone National Forest. A Type 2 Incident Management Team (Domanski) is assigned. This fire is in mixed conifer and grass, 30 miles northwest of Cody, WY. Uphill runs on the east flank were observed. Personnel are patrolling containment lines on the east flank. Four residences are threatened; structure protection is in place.

GRAMM COMPLEX, Medicine Bow National Forest. A Type 2 Incident Management Team (Mullenix) is assigned. This complex, comprised of the Gramm and Six Mile fires, is 30 miles southwest of Laramie, WY. Minimal fire behavior was observed in ponderosa pine. Crews are constructing, improving, and holding containment lines. Structure protection is in place for 113 threatened residences. Increase in acreage is due to more accurate mapping.

DEVIL CREEK, San Juan National Forest. This fire is in ponderosa pine, pinyon, juniper, and oak brush, 17 miles west of Pagosa Springs, CO. Fire behavior was significantly reduced due to rain. Crews are completing fireline and mopping up.

BEAR CREEK, San Juan National Forest. A Fire Use Management Team (Clark) is assigned. This Wildland Fire Use fire is in spruce and fir, five miles northeast of Vallecito, CO. The fire is being managed for resource benefit. Minimal fire behavior was observed. Crews are holding and monitoring containment lines.

HAMILTON, Umcompahgre Field Office, Bureau of Land Management. This fire is ten miles southwest of Norwood, CO. Torching, crowning, and spotting were observed in pinyon and juniper. Crews are securing the east flank and holding on Miramonte Road. Three residences are threatened; structure protection is in place.

## NORTHWEST AREA LARGE FIRES:

CLARK, Willamette National Forest. A Unified Command has been established between a Type 2 Incident Management Team (Gardner) and an Oregon Department of Forestry Incident Management Team (Labhart). This fire is in understory and timber with dead and down fuels, ten miles northeast of Lowell, OR. Active fire behavior with running, spotting and torching was observed. Crews are conducting large scale burnout operations on the west flank and mopping up south of Fall Creek. Structure protection is in place for five residences.

MCGINNIS FLATS, Colville Agency, Bureau of Indian Affairs. A Washington Interagency Incident Management Team (Jennings/Perry) is assigned. This fire is in pine and grass, one mile north of Keller, WA. Rolling debris is hampering control efforts. Crews and dozers are concentrating on the west flank, which is the area of greatest concern. Thirty-seven residences are threatened; structure protection is in place. Two outbuildings have been confirmed lost. State Road 21 has been closed. Reduction in acreage is due to more accurate mapping.

FAWN PEAK COMPLEX, Okanogan-Wenatchee National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. This complex is comprised of the Fawn Peak, Sweetgrass and Farewell fires; the Fawn Peak and Sweetgrass fires have been controlled. The Farewell fire is in sub-alpine fir with heavy dead and down timber, 13 miles northwest of Winthrop, WA. Active fire behavior was observed. Crews are mopping up and improving fireline. Structure protection is in place for nine residences.

## NORTHERN ROCKIES AREA LARGE FIRES:

WEDGE CANYON, Flathead National Forest. A Type 2 Incident Management Team (Sandman) is assigned. This fire is in subalpine fir with down fuel, 20 miles east of Eureka, MT. Extreme fire behavior with crown runs, torching and spotting was observed. A forest closure is being implemented. Crews are constructing direct and indirect fireline. Sixty residences are threatened; structure protection is in place.

MISSOURI BREAKS COMPLEX, Miles City Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Gray) is assigned. This complex, comprised of the Big Coulee, Ghost Coulee, Indian and Germaine fires, is 35 miles northwest of Jordan, MT. Extreme fire behavior with torching and crowning was observed in timber and grass. Crews are constructing fireline and conducting burn out operations. Twenty-three residences have been evacuated; structure protection is in place. One outbuilding has been confirmed lost. Increase in acreage is due to more accurate mapping.

BIG CREEK, Bitterroot National Forest. A Type 2 Incident Management Team (Swope) has been ordered. This fire is four miles northwest of Victor, MT. Short and medium runs with individual tree torching were observed in timber.

HIDDEN LAKE, Beaverhead/Deerlodge National Forest. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is in sub-alpine fir, four miles northeast of Polaris, MT. Torching and spotting were observed. Crews are conducting burn out operations. Thirty residences are threatened; structure protection is in place.

SLIMS, Nez Perce National Forest. A Type 2 Incident Management Team (Benes) is assigned. This fire is in ponderosa pine and mixed conifer, 35 miles east of Grangeville, ID. Short runs and torching were observed. Crews are completing indirect fireline and conducting burn out operations.

LONG MOUNTAIN, Lewis and Clark National Forest. This fire is 2 miles east of Neihart, MT. Torching and short range spotting were observed in timber. Crews are containing spot fires and mopping up.

AMETHYST, Yellowstone National Park. This fire is in old growth timber, litter and understory, 25 miles southeast of Mammoth Hot Springs, WY. Smoldering and creeping were observed with some single tree torching. Crews are making good progress constructing fireline and mopping up.

MICKEY BUTTE, Charles M. Russell National Wildlife Refuge. This fire is in grass, juniper and timber, 50 miles south of Malta, MT. Creeping with some torching in interior pockets was observed. Crews are mopping up and cold trailing the fire perimeter.

## SOUTHERN CALIFORNIA AREA LARGE FIRES:

PARKHILL, San Luis Obispo, California Department of Forestry and Fire Protection (CDF). A CDF Type 1 Incident Command Team (Henson) is assigned. This fire is in chaparral, grass and oak woodland, 37 miles northeast of South Taft, CA. Rapid runs with spotting $1 / 2$ mile ahead of the front were observed. Crews are building containment lines. Two hundred and fifty residences are threatened; structure protection is in place. Four residences have been confirmed lost.

COYOTE, Monte Vista Unit, California Department of Forestry and Fire Protection. This fire is in chaparral, 20 miles north of Julian, CA. Significant fire spread was observed on the east and northeast flanks into the ridgelines of the Sheep and Salvadore canyons. Crews are constructing fireline, focusing efforts on the south and southwest flanks and mopping up. Structure protection is in place for 73 residences. Damage assessment is underway to determine the extent of properties lost.

GRAPEVINE, Kern County Fire Department. This fire is four miles south of Mettler, CA. Running fire in grass was observed. Crews are mopping up.

## OUTLOOK:

Fire Weather Watch: For Monday afternoon in the central Oregon Cascades (Zone 608) and in central Oregon (Zones 610 and 611).

Weather Discussion: High pressure centered over Nevada will continue to have a circle of moisture wrapping around its edge, sparking thunderstorms over higher terrain of the interior west. More moisture is expected to move into northern California and across the Oregon Cascades this afternoon, providing a chance for thunderstorms. Moisture and instability will also remain in place over the Great Basin, Rocky Mountain, and Southwest Areas. The Northern Rockies Area is expected to remain hot and mainly dry, with wind increasing along the east slopes of the Montana Rockies. Alaska will once again be under the influence of high pressure, with scattered thunderstorms over the east-central higher elevations.

| Geographic Area Weather | High <br> Temperatures | Minimum Relative Humidity | Wind |
| :---: | :---: | :---: | :---: |
| EASTERN GREAT BASIN AREA Idaho, Bridger-Teton: Mostly sunny and very warm. Utah, Arizona Strip: Scattered to numerous thunderstorms. | Idaho, Bridger-Teton: <br> 70 to 88 mountains, <br> 88 to 105 valleys. <br> Utah and Arizona <br> Strip: <br> 80 to 94 higher <br> elevations, 90 to 111 <br> valleys. | Idaho, Bridger-Teton: <br> 15 to $28 \%$ mountains, 9 <br> to $15 \%$ valleys. <br> Utah, Arizona Strip: <br> 15 to $22 \%$ mountains, 5 <br> to $15 \%$ valleys. | Upslope/up valley 5 to 10 mph except west 10 to 15 mph Snake River plain. |
| NORTHERN CALIFORNIA AREA Chance of afternoon and evening thunderstorms over the northern and eastern sections. Otherwise clear with patchy night and morning coastal fog and low clouds. | Mid 60s and 70s near the coast, lower 90 s to 110 inland. | $50 \%$ or more along the coast, and 10 to 22\% inland. | Southeast to southwest 6 to 14 mph in the afternoon. |
| NORTHER ROCKIES AREA <br> Mostly sunny. Partly cloudy with isolated thunderstorms over northeast Montana | West of the Divide: 95 to 105 East of the Divide: 80 to 100 | 10 to $20 \%$, except 20 to $30 \%$ northeast MT | West to northwest 5 to 15 mph. Northwest 15 to 25 mph, northeast Montana decreasing. |
| NORTHWEST AREA <br> Mostly sunny most areas. Partly cloudy southern Oregon late afternoon with a chance of mainly dry late day thunderstorms | Continued hot. Highs in the 80s and 90s most inland areas. Highs up to 105 southwest Oregon interior, central Oregon and southeast Oregon. | West of Cascades: Generally 25 to $35 \%$ in Washington and 15 to $30 \%$ in Oregon. <br> Eastside 10 to 20\%, except 5 to 10\% portions of southeast and south central Oregon. | No significant wind. Generally west to northwest 5 to 15 mph . Gusty in the afternoon. Strong and erratic wind near any thunderstorms. |
| ROCKY MOUNTAIN AREA <br> Isolated thunderstorms north. Scattered thunderstorms south and east. | Highs mid 80s to mid 90s (70 to 80 mountains). | 15 to $23 \%$ lower elevations of western Colorado and western Wyoming, with 20 to $35 \%$ elsewhere. | North to northwest 15 to 25 mph over the Black Hills region, and 11 to 18 mph western Wyoming. Variable 5 to 15 mph elsewhere. |

| SOUTHERN CALIFORNIA AREA <br> Partly cloudy with isolated <br> thunderstorms over the Sierra and <br> Inyo as well as the Mohave <br> desert. Night and morning fog <br> lower coastal areas. Otherwise <br> sunny. | 70 to 85 coastal <br> areas. 80 to 95 <br> mountains. <br> 85 to 100 valleys. <br> 100 to 108 upper <br> deserts. 105 to 115 <br> low desert. | 10 to $20 \%$ deserts. <br> 15 to $30 \%$ mountains. <br> 20 to $35 \%$ valleys. | Southeast to southwest 5 to <br> 15 mph. |

## MANAGING VEHICLE TRAFFIC IN SMOKE

Smoke has the potential to cause safety hazards to vehicle traffic in the vicinity of active fires (both wildfires and prescribed), especially at night. The following traffic-related items should be considered and addressed in local unit planning documents prior to an incident/project.

- Identification, location, and phone numbers of local units that have law enforcement and traffic control responsibilities in the smoke-impacted areas. Review any local agreements with these agencies presently in place.
- Identification of important, public roads that may be impacted by smoke
- Identification of adequate equipment and trained personnel to control traffic. This may include warning signs, communications equipment (preferably not using the active fire frequency) and vehicles equipped with warning or flashing lights.
- Identification and phone numbers of radio and television stations that can issue traffic advisories for the smoke-impacted area
- Identification of alternative traffic routes as part of the incident/project traffic plan
- Identification of traffic routes subject to temperature inversions as well as contributory factors such as fog and ice
- When potential smoke-related problems are identified:
- Advise the Incident Commander, Burn Boss, or Agency Administrator that severe smoke exists.
- Notify local law enforcement units and highway departments of a potential problem.
- Implement preplanned actions such as posting smoke warning signs.
- Ensure that proper equipment is ready and appropriate personnel are briefed on contingency plans and are available to control traffic.
