Part 3

I have so many questions about the Unified Federal Policy for Watersheds that there's no point to asking them...I'll never receive an answer. I have so many objections to the Unified Federal Policy for Watersheds that there's no point in citing them...I doubt that anyone ever would try to ease my qualms.

So I shall simply say that I'm sick and tired of the government's policies, tactics and tyrannical actions as it presses forward in seeking to own/regulate/control more than half of OUR land, with scant regard for private property or citizen input and, thus, unconstitutionally in my estimation.

Seems to me that you're sowing the seeds for a revolution and I respectfully implore you to make your approach a more inclusive/reasonable one or, better, to STOP the land grabbing!
