Prepared by:

Gabriel Hernandez

Report Highlights:

On July 17, 2006, the Secretariat of Health (SSA) published the updated list of additives to be used as additives in food, beverages and food supplements. It replaces the list first published on December 15, 1999.

Includes PSD Changes: No
Includes Trade Matrix: No

Introduction: This report summarizes an announcement from the Secretariat of Health published in Mexico's "*Diario Oficial*" (Federal Register) on July 17, 2006.

Disclaimer: This summary is based on a *cursory* review of the subject announcement and therefore should not, under any circumstances, be viewed as a definitive reading of the regulation in question, or of its implications for U.S. agricultural export trade interests. In the event of a discrepancy or discrepancies between this summary and the complete regulation or announcement as published in Spanish, the latter shall prevail.

Title: Agreement that establishes the permitted substances to be used as additives in food, beverages and food supplements.

Important Dates

1. Publication Date: July 17, 2006

2. Effective Date: July 18, 2006

FAS/Mexico's Executive Summary: As a protective measure to guarantee the health of the Mexican population through the controlled use of additives in the preparation of food intended for human consumption and to cope with the constant development at the Food Industry, the Secretariat of Health (SSA) published the above-mentioned Agreement.

It is important to note that the listed additives must comply with the established specifications in the provisions included in the Appendix Chapter VIII of the "Regulations for the Sanitary Control of Goods and Services", which can be found on the SSA's website at www.ssa.gob.mx.

The authorized additives for the preparation of food, beverages and food supplements are listed in two tables: Table 1 lists additives by its International Numbering System (INS) nomenclature and common name, while Table 2 lists colorants by its INS nomenclature, common name and Color Index (C.I.).

Table 1. Acidifiers, acidity regulators, anticaking and antifoaming agents, antioxidants, bulking agents, emulsifiers, firming agents, flavor enhancers, flour treatment and foaming agents, gelling and glazing agents, humectants, preservatives, propellants, raising agents, stabilizers, sweeteners, thickeners.
