A table is provided below which shows estimated low, medium, and high water levels for several streams for which we normally have current daily gauge readings. Information that you provide on the Trip FEEDBACK Form is needed to update and expand the table. The whitewater class represents the most difficult section of the reach that cannot be readily avoided. We have water level information for other streams as well. This information is provided for general guidance only - boaters should remain alert for changing conditions.

Key to Gauge Listing on next page

+ USGS Gauge # BLM Gauge

* Average interval in hours between water level readings

** Gauge is visible to the user

1 hr - recorded every hour, reported every 3 - 4 hrs

24 hrs - typically read and reported in the morning

Gauge reading is the level of the water surface
measured in feet above an arbitrary datum.
