

January 15, 2008

Mr. David Furth
Associate Chief
Public Safety and Homeland Security Bureau
Federal Communications Commission
445 12th Street, S.W.
Washington, D.C. 20554

RE: 30-Month Benchmark Report

Dear Mr. Furth:

In its 800 MHz Reconfiguration Third Memorandum Opinion and Order,¹ the Federal Communications Commission ("FCC" or "Commission") directed the 800 MHz Transition Administrator, LLC ("TA") to submit a report to the Public Safety and Homeland Security Bureau by January 15, 2008 certifying whether the 30-month benchmark has been met. The 30-month benchmark is the date by which all systems must have commenced reconfiguration.²

There are two parts to the report that the TA must submit. First, the TA must certify whether the 30-month benchmark has been met by all Stage 1 (Channel 1-120) incumbent licensees in the non-border regions.³ Second, the TA must certify whether covered Stage 2 licensees have complied with the timelines set forth in the Commission's September 12 Public Notice and identify all cases in which timelines have not been met.⁴ "Covered licensees" include all Wave 1-3 NPSPAC licensees and all Wave 4 NPSPAC licensees that had received frequency assignments from the TA as of September 12, 2007.⁵ The September 12 Public Notice contained deadlines by which these licensees were required to complete planning and submit cost estimates to Sprint Nextel.⁶

¹ Improving Public Safety Communications in the 800 MHz Band, WT Docket No. 02-55, *Third Memorandum Opinion and Order,* 22 FCC Rcd 17209 (2007) ("Third MO&O"), at ¶ 34.

² Improving Public Safety Communications in the 800 MHz Band, WT Docket No. 02-55, *Report and Order, Fifth Report and Order, Fourth Memorandum Opinion and Order, and Order*, 19 FCC Rcd 14969 (2004) ("R&O"), at ¶¶ 28, 214, and 347. The 30-month benchmark was also made part of the Commission's Rules in 47 C.F.R. § 90.677(a).

³ Third MO&O, at ¶¶ 20-21, 33-34, and n.64.

⁴ "FCC Announces Supplemental Procedures and Provides Guidance for Completion of 800 MHz Rebanding," *Public Notice*, 22 FCC Rcd 17227 (rel. Sept. 12, 2007) ("September 12 Public Notice"), at 1-2. The Commission stated that licensees who are in compliance with the September 12 Public Notice timelines as of December 26, 2007 will be deemed to have met the 30-month benchmark. Third MO&O, at ¶ 33.

⁵ *Id.* Public safety licensees relocating from the Expansion Band in Stage 2 are also subject to the September 12 Public Notice timelines. *See* September 12 Public Notice, n.1. Therefore, the TA has included these licensees in the definition of "covered licensees" along with the NPSPAC licensees.

⁶ September 12 Public Notice, at 1-2.

Scope of Review

For purposes of certifying whether the 30-month benchmark has been met for Stage 1 licensees, the TA has examined its own records to determine whether the 922 covered Channel 1-120 licensees have entered into Frequency Reconfiguration Agreements ("FRA") with Sprint Nextel as of December 26, 2007. The vast majority of non-border Channel 1-120 licensees have entered into FRAs with Sprint Nextel and have completed or substantially completed the process of relocating to their replacement channels. As indicated in Schedule A of this report, the TA found 24 incumbent Channel 1-120 licensees for which there were no signed FRAs submitted to the TA as of December 26, 2007, indicating that these licensees have not initiated reconfiguration of their systems.

With respect to the benchmark certification for Stage 2 licensees, the TA reviewed its records to determine whether these licensees were in compliance with the timelines set forth in the Public Notice for the completion of planning activities and the submission of a cost estimate to Sprint Nextel. As indicated in Schedule B of this report, the TA found that 86 Wave 1, 60 Wave 2, 115 Wave 3, and 21 Wave 4 NPSPAC licensees did not complete planning and submit cost estimates in accordance with the timelines set forth in the Public Notice. Based on the status of reconfiguration activities at the 30-month benchmark date, the TA anticipates that a significant number of NPSPAC licensees, and possibly a majority, will not have completed their reconfigurations by the scheduled June 26, 2008 completion date. Through December 26, 2007, of the 904 non-border Stage 2 reconfigurations that the TA is tracking, 366 are in varying stages of planning or FRA negotiations, 441 have completed an FRA and are in some stage of implementation, and 97 are reported as being operational on their replacement channels.

In making the certification requested by the FCC, the TA has assumed, without verification: (a) the accuracy and veracity of information and statements contained in the documents that the TA reviewed, including electronic databases, and (b) the conformity to originals of all copies of documents, including electronic databases reviewed by the TA, and the authenticity of the originals of such copies. The TA has also limited its review to records and data available to it as of the date of this report.

Below we set forth our certification of completion of rebanding activities.

1. Commencement of Reconfiguration by Channels 1-120 Licensees

Except for those licensees listed in Schedule A attached hereto, the TA certifies that all incumbents relocating from the 1-120 channels have commenced reconfiguration in compliance with the 30-month benchmark as of December 26, 2007.

⁷ The September 12 Public Notice provides that licensees that do not meet the planning timelines may obtain extensions from the Public Safety and Homeland Security Bureau. September 12 Public Notice, at 2. However, for purposes of this report, we list those licensees that did not complete planning and submit cost estimates by the Public Notice dates, regardless of whether they have requested or received extensions or whether they have initial deadlines for submitting cost estimates that are after December 26, 2007.

2. Compliance of NPSPAC licensees with Public Notice timelines

Except for those licensees listed in Schedule B attached hereto, the TA certifies that all Covered Licensees were in compliance with timelines in the September 12 Public Notice as of December 26, 2007.

Sincerely,

Brett Haan

800 MHz Transition Administrator, LLC

Brett S. Ham

Schedule A

Exceptions to TA Certification that all incumbents relocating from the 1-120 channels have commenced reconfiguration in compliance with the 30-month benchmark as of December 26, 2007
