

Since Mr. Carrier's research is incomplete at best his petition should receive comments from the community. Mr. Carrier submitted the petition before the community was aware of his intentions. He has been unable or unwilling to discuss certain problems associated with this petition in community discussions. The EAA was supposed to also sign this petition but they withdrew their support just prior to submission. The other signers refuse to discuss this petition openly.

There is no legitimate reason that this petition should be granted without the full and open discussion that it deserves. The petition claims a need for haste but there is no real justification for that haste. This petition will affect the entire community and the community deserves a chance to comment.
