Coast Guard**

**LOCAL NOTICE TO MARINERS  
WEEKLY EDITION**

**District: 1**

**Week: 08/07**

COASTAL WATERS FROM EASTPORT, MAINE TO SHREWSBURY, NEW JERSEY

NOTES: (1) Unless otherwise indicated, missing and destroyed structures are presumed to be in the immediate vicinity of assigned position, mariners should proceed with caution.

(2) The Local Notice to Mariners consists of a Weekly Edition.

(3) Inquiries, Published Articles or Information: <mailto:LNM@d1.uscg.mil>

The Local Notice to Mariners is available online at: <http://www.navcen.uscg.gov/lnm/d1>

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS, DGPS, and LORAN-C. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: <http://www.navcen.uscg.gov/gps/status/default.htm>. In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or LORAN service. Mariners are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, <mailto:webmaster@sntp.navcen.uscg.mil>, or on the World Wide Web at: <http://www.navcen.uscg.gov>

REPORT DISCREPANCIES IN AIDS TO NAVIGATION TO THE NEAREST COAST GUARD UNIT

## **BERGEN POINT NAVIGATION RESTRICTIONS**

The U. S. Coast Guard has established a VTS Measure under the provisions of 33 CFR 161.11 in an effort to ensure the safety of vessels transiting the restricted channel(s) of the Kill Van Kull during the blasting and dredging operations. The following regulations are applied to the entire Kill Van Kull and should be adhered to immediately.

IMPORTANT NOTE: SEE ITEM 10 UNDER (d) REGULATIONS.

(d) Regulations:

- (1) No vessel shall enter or transit any work area where drill barges and/or dredges are located without permission of Vessel Traffic Service New York (VTSNY).
- (2) Each vessel transiting in the vicinity of the work areas, where drill barges and/or dredges are located, is required to do so at no wake speed.
- (3) No vessel shall enter the RNA when they are advised by the drilling barge or VTSNY that a misfire or hang fire has occurred. Vessels already underway in the RNA shall proceed to clear the impacted area immediately.
- (4) Vessels, 300 gross tons or greater and tugs with tows, are prohibited from meeting or overtaking other vessels when transiting alongside an active work area.
- (5) Vessels, 300 gross tons or greater and tugs with tows, transiting with the prevailing current (as measured from the Battery tide station) are regarded as the stand-on vessel.
- (6) Prior to entering the RNA, the master, pilot or operator of each vessel, 300 gross tons or greater and tugs with tows, shall ensure that they have sufficient propulsion and directional control to safely navigate the area under the prevailing conditions, and shall notify VTSNY as to their decision regarding the employment of assist tugs while transiting the RNA.
- (7) Tugs with tows includes a tug with a vessel or barge in tow, alongside, or being pushed.
- (8) Hawser or Wire length must not exceed 100 feet, measured from the towing bit on the tug to the point where the Hawser or Wire connects with the towed vessel or barge, for any vessel with another vessel/barge in tow.
- (9) IMPORTANT NOTE: Bergen Point West Reach. In addition to the aforementioned regulation, the following provisions apply to vessels transiting in or through "Bergen Point Zone". Currently the Bergen Point Zone is defined as the area bounded to the West by KVK Channel Lighted Buoy 16 (LLNR 37335), to the East by KVK Channel Lighted Buoy 12 (LLNR 37310) and to the North by Newark Bay Lighted Buoy 5 (LLNR 37400).
  - (a) Minimum Tug Requirements: All vessels 350 feet in length, or greater, excluding tugs with tows, require at least one assist tug. All vessels 700 feet in length, or greater, excluding tugs with tows, require at least two assist tugs. All vessels 900 feet in length, or greater, excluding tugs with tows, require at least three assist tugs.
  - (b) Tidal Current Restrictions: vessels 800 feet in length or greater, or drafting more than 40 feet, are restricted to movement within 90 minutes before or after slack water at Bergen Point. This transit window (Queue) will be determined based on the high and low water times at The Battery.
  - (c) Astern Tows: Hawser tows are not permitted unless an assist tug accompanies the tow.
  - (d) Wind Conditions: (i) In sustained winds of 25 knots as measured from the Bayonne Bridge: the master, pilot or operator of each vessel, 300 gross tons or greater, including tugs with tows, shall ensure that they have sufficient propulsion and directional control to safely navigate the area under the prevailing conditions, and shall notify Vessel Traffic Service, New York as to their decision regarding the employment of assist tugs prior to transiting the area. (ii) In sustained winds 34 knots or greater: cargo ships and tankers in ballast may not transit the Bergen Point Zone. Note: A Cargo ship is defined as any vessel 350 feet or greater that is not a tanker.
  - (e) Visibility Restriction: Vsls 700 ft or more in length, are not permitted to transit if visibility is < 1 mi.
- (10) Waiver. The Vessel Traffic Service of New York, may upon request, authorize a deviation from any regulation in this section if it is found that the proposed operations can be done safely. An application for deviation must be received not less than 24 hours before the intended operation and must state the need and describe the proposal.

### CONNECTICUT AND LONG ISLAND SOUND - PORT AND VESSEL SECURITY

The following restrictions apply to ALL VESSELS operating within the COTP Long Island Sound Zone, including all recreational vessels. These restrictions are located at 33 Code of Federal Regulations, section 165.153. Violation of these regulations subject the vessel operator to civil and criminal penalties:

Bridges: Any vessel operating beneath a bridge must make a direct, immediate and expeditious passage beneath the bridge while remaining within the navigable channel. No vessel may stop, moor, anchor or loiter beneath a bridge at any time. No vessel may approach within a 25-yard radius of any bridge foundation, support, stanchion, pier or abutment except as required for the direct, immediate and expeditious transit beneath a bridge.

Commercial Vessels: No vessel may enter within a 100-yard radius of any vessel engaged in commercial service while that vessel is transiting, moored, or berthed in any portion of the Long Island Sound Marine Inspection and COTP zone, without the express prior authorization of the vessel's licensed operator, master, COTP, or the designated on scene representative.

LNM 27/05

### REPORTING SUSPICIOUS ACTIVITY (REVISED)

## REPORTING SUSPICIOUS ACTIVITY (REVISED)

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to their local Federal Bureau of Investigation (FBI) Joint Terrorism Task Force (JTTF) Office, [Http://www.fbi.gov/contact/fo/fo.htm](http://www.fbi.gov/contact/fo/fo.htm) , or to other appropriate authorities. Individuals can contact the DHS Watch and Warning Unit at (202) 323-3205, toll free at 1-888-585-9078, or by e-mail to [nipc.watch@fbi.gov](mailto:nipc.watch@fbi.gov). The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the National Response Center (NRC) at 1-800-424-8802.

### WHAT "SUSPICIOUS ACTIVITY" SHOULD I LOOK FOR?

Though you are the person best suited to identify a behavior or activity as "suspicious" in the area you're most familiar with, the following list contains some issues you may want to consider in making such a determination:

People appearing to be engaged in surveillance of any kind (note taking, shooting video/photos, making sketches, or asking questions).

Unattended vessels or vehicles in unusual locations.

Lights flashing between boats.

Unusual diving activity.

Unusual number of people onboard.

Unusual night operations.

Recovering or tossing items into/onto the waterway or shoreline.

Operating in or passing through an area that does not typically have such activity.

Fishing/hunting in locations not typically used for those activities.

Missing fencing or lighting near sensitive locations.

Anchoring in an area not typically used for anchorage.

Transfer of people or things between ships or between ship and shore outside of port.

Anyone operating in an aggressive manner.

Individuals establishing businesses or roadside food stands near sensitive locations.

Small planes flying over critical locations.

People attempting to buy or rent fishing or recreational vessels with cash for short-term, undefined use.

Additional information is available online at <http://www.americaswaterwaywatch.org> .

LNM 23/06

## SPECIAL WARNING NUMBER 123. SOMALIA.

Due to continuing conditions of armed conflict and lawlessness in Somalia and waters off its coast, mariners are advised to avoid the port of Muqdisho (Mogadishu) and to remain at least 200 nautical miles distant from the Somali coast. The U.S. government does not have an embassy in Somalia and cannot provide services to US citizens.

Recent vessel hijackings off the east coast of Somalia demonstrate that pirates are able to conduct at sea hijackings from as far south as Kismaayo (Chisimayu) (00-22S), though vessels are advised to transit no closer than 02-00S, to as far north as Eyl (08-00N), and out to a distance of 170 miles. The first known attempt to hijack a cruise vessel occurred in November 2005. All merchant vessels transiting the coast of Somalia, no matter how far offshore, should increase anti-piracy precautions and maintain a heightened state of vigilance.

Pirates are reported to have used previously hijacked ships as bases for further attacks. Another reported pirate tactic has been to issue a false distress call to lure a ship close inshore. Therefore, caution should be taken when responding to distress calls keeping in mind it may be a tactic to lure a vessel into a trap. Victimized vessels have reported two to three (2-3) speedboats measuring six to nine meters (6-9m) in length. Each vessel has a crew of three to six (3-6) armed men with ak-47s and shoulder launched rockets, which are opening fire on vessels in broad daylight in order to intimidate them into stopping. To date, vessels that increase speed and take evasive maneuvers avoid boarding while those that slow down are boarded, taken to the Somali coastline, and released after successful ransom payment, often after protracted negotiations of as much as 11 weeks.

LNM 49/05

## ENDANGERED NORTHERN RIGHT WHALES

US - ATLANTIC SEACOAST - During this time of year the severely endangered Northern Right Whale may be encountered within 20-30 NM of shore, as they migrate south to the Florida Straits from the Gulf of Maine. Right Whales are slow moving mammals that are prone to collisions with vessels. Vessel operators are reminded to use caution around Right Whales. Intentional close approach to Right Whales is prohibited and is a violation of federal and state law. A minimum distance of 500 yards must be maintained. Report all sightings of Right Whales to the U.S. Coast Guard.

LNM 46/02

## KENNEBUNKPORT SECURITY ZONE

Walkers Point, Kennebunkport, Maine. The Coast Guard is enforcing a security zone off of Walkers Point as defined in title 33 Code of Federal Regulations section 165.102. This restricted area is marked approximately by white buoys marked in orange. All mariners are advised that

### **KENNEBUNKPORT SECURITY ZONE**

entry into this zone is prohibited unless authorized by the Captain of the Port, Portland, Maine. All persons and vessels shall obey the directions of on-scene patrol personnel. For more information contact the on-scene Coast Guard vessels on VHF channel 16.

LNM 40/02

### **SAFETY/SECURITY OF U. S. NAVAL VESSELS**

The Coast Guard has established permanent regulations for the safety or security of U.S. Naval Vessels in the navigable waters of the United States. Effective immediately Naval Vessel protection zones are established within 500 yards of any U.S. Naval vessel. This includes any vessel owned, operated, chartered, or leased by the U.S. Navy or under the operational control of the U.S. Navy. All vessels within 500 yards of a U.S. Naval vessel shall operate at the minimum speed necessary to maintain a safe course and proceed as directed by the Official Patrol (a Coast Guard Commissioned, Warrant or Petty Officer; or the Commanding Officer of a U.S. Naval Vessel or his or her designee). No vessel or person is allowed within 100 yards of a U.S. Naval vessel, unless authorized by the Official Patrol. Vessels requesting to pass within 100 yards of a U.S. Naval Vessel shall contact the Official Patrol on VHF-FM Ch 16. Violations of these regulations may be prosecuted as a felony punishable by a fine or imprisonment.

The Commanding Officer, Naval Submarine Base New London, has advised the Coast Guard that the following conditions have been imposed upon vessels operating in the vicinity of the Groton/New London Naval Base within the Thames River restricted area established by the Army Corps of Engineers, described in 33 Code of Federal Regulation 334.75 and depicted on chart number 13213. The Coast Guard broadcasts these restrictions for informational purposes. Any questions concerning the restrictions should be directed to Sub Base New London Port Operations by calling (860) 694-4900/2663. All commercial vessels of 50 gross tons or greater intending to transit the restricted area shall comply with the following requirements: 24 hours prior to transit: notification of intent to transit must be made to Sub Base New London port operations by calling (860) 694-4900/2663. 2 hours prior to transit: notification of intent to transit and arrangements for an official Escort must be made to Sub Base New London port operations by calling (860) 694-4900/2663 or via Ch. 12 VHF-FM. 15 minutes prior to transit: vessels must check in with Sub Base New London escort tug on Ch. 13 VHF-FM and maintain communications during transit. During transit vessels must maintain a speed of 06 knots or less, and notify the escort tug of all intended course changes. The escort tug will be stationed just off the bow to the east of the transiting vessel. Violations of the restricted area regulations may be prosecuted as a misdemeanor punishable by fine and/or imprisonment.

Chart 13213

LNM 32/04

### **NOTICE TO ALL PRIVATE BOATS AT SEA**

United States laws and regulations require that ALL private boats arriving from a foreign port or place MUST report to the Bureau of Customs and Border Protection IMMEDIATELY upon their arrival into the United States. Every person entering the United States must be seen in person for immigration purposes by a Customs and Border Protection officer, except those participating in the I-68 -Canadian Border Boat Landing Program-. However, holders of form I-68 are still required to report their arrival into the United States to the Bureau of Customs and Border Protection. Masters and passengers must provide proof of citizenship or legal immigration status, and be in possession of a valid passport and visa, if required. Citizens of countries that are participants in the Visa Waiver Program are not eligible to seek admission to the United States under that program via private vessel. Once your boat is anchored or tied, you are considered to have entered the United States. No one may leave the vessel until Customs and Border Protection grants permission. The only exception to this requirement is to report arrival. In order to fulfill the requirement to immediately report a private boat arrival, the master of the vessel must contact the nearest Customs and Border Protection Office, or if the arrival occurs after business hours, the nearest 24 hour port of entry.

Upon reporting, you may be required to proceed to a staffed port for inspection by Customs and Border Protection. Failure to comply with these requirements could result in serious criminal and civil penalties, including seizure of the boat. International mariners are urged to report any suspicious or illegal activity to the Bureau of Customs and Border Protection at 1-800-BE-ALERT.

LNM 29/03

### **SPECIAL WARNING NUMBER 121 PERSIAN GULF**

Coalition Naval Forces may conduct military operations in the Eastern Mediterranean Sea, Red Sea, Gulf of Aden, Arabian Sea, Gulf of Oman, and Arabian Gulf. The timely and accurate identification of all vessels and aircraft in these areas are critical to avoid the inadvertent use of force. All vessels are advised that Coalition Naval Forces are prepared to exercise appropriate measures in self-defense to ensure their safety in the event they are approached by vessels or aircraft. Coalition Forces are prepared to respond decisively to any hostile acts or indications of hostile intent. All maritime vessels or activities that are determined to be threats to Coalition Naval Forces will be subject to defensive measures, including boarding, seizure, disabling or destruction, without regard to registry or location. Consequently, surface vessels, subsurface vessels, and all aircraft approaching Coalition Naval Forces are advised to maintain radio contact on bridge-to-bridge channel 13, international air distress (121.5 MHZ VHF) or military air distress (243.0 MHZ UHF). Vessels operating in the Middle East, Eastern Mediterranean Sea, Red Sea, Gulf of Oman, Arabian Sea, and Arabian Gulf are subject to query, being stopped, boarded and searched by US/Coalition warships operating in support of operations against Iraq. Vessels found to be carrying contraband bound for Iraq or carrying and/or laying naval mines are subject to detention, seizure and destruction. This notice is effective immediately and will remain in effect until further notice.

**SPECIAL WARNING NUMBER 121 PERSIAN GULF**

LNM 12/03

**REPORT OF CHANNEL CONDITIONS**

Controlling depths for the New York and New Jersey area can be found at the following website:  
<http://www.nan.usace.army.mil/business/buslinks/navig/index.htm>

LNM 11/04

**US SEACOAST-NORTHEAST**

Due to the significant increase in the number of vessels fishing off the New England, New York and New Jersey seacoast in close proximity to separation zones and heavy commercial shipping and towing industry traffic, mariners are advised to navigate with extreme caution when in these and all areas of heavy vessel traffic. All mariners shall keep a diligent watch and be aware of each other's presence while underway or at anchor in order to avoid any potential casualties, which in the past have included collisions, injury and death.

LNM 28/04

**WARNING - KILL VAN KULL - NEWARK BAY**

Kill Van Kull Channel and Newark Bay are undergoing long term, extensive dredging. The U. S. Coast Guard has established a Regulated Navigation Area (RNA) 33 CFR 165.165 encompassing the entire dredging area. Many Aids to Navigation will be relocated and/or established to mark the limits of these sites to ensure safe navigation through and around these areas. Mariners are advised to exercise caution while navigating through these areas. For additional information concerning aids to navigation, dredging operation and channel restrictions contact Vessel Traffic Service New York via VHF-FM CH 12 or (718) 354-4088.

LNM 29/99

**PORTSMOUTH NAVAL SHIPYARD SECURITY ZONE**

This is to remind all mariners of the permanent security zone around the perimeter of the Portsmouth Naval Shipyard. All vessels, except those under the supervision of or contract to local military or naval authority, are prohibited from entering the restricted areas without permission from the Commander, Portsmouth Naval Shipyard or it-s authorized representative. Details of the security zone can be found in 33 CFR 334.50 and is referenced on chart 13283 and U.S. Coast Pilot 1.

LNM 14/02

**SECTION II - DISCREPANCIES**

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97

		Green can				

Corrective Action	Object of Corrective Action	Position
-------------------	-----------------------------	----------

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

**SECTION V - ADVANCE NOTICES**

This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas.

**SUMMARY OF ADVANCED APPROVED PROJECTS**

<u>Approved Project(s)</u>	<u>Project Date</u>	<u>Ref. LNM</u>
----------------------------	---------------------	-----------------

None

**NY-EAST RIVER**

Spearin Preston & Burrows Inc. will be installing riverbed marine fill at the Joralemon Street MTA tunnel located in the East River from on, or about, March 19 to March 23, 2007 to Monday, March 29, 2007. Work hours are 6 am to 3:30 pm. They will have a floating construction platform for placing marine fill consisting of The No. 9 derrick crane barge (120- x 32-), one stone barge (120- x 38- or 150- x 46-), the crew boat ALLISON, and Tug GEORGE BURROWS. The derrick crane barge for placing marine fill will be anchored with a four-point anchoring system attached to four buoys. All four mooring buoys will be illuminated at night with a steady all around white light. During work hours, the construction platform will move on demand if one-hour advance notice is given to the on-scene vessel operator via marine radio VHF Channel 13. During non working hours, the unmanned construction platform will remain on site and be illuminated with an all around white light visible for at least one mile on its outboard corners. Mariners are advised to transit the construction area with caution and proceed at no wake/minimum speed when passing construction platforms. For further information on construction operations, contact the 24-hr project supervisor at 917-682-6694, or the Coast Guard Vessel Traffic Service on VHF-FM channel 12 or (718) 354-4088.

Chart 12335

LNM: 06/07

**NY-FIRE ISLAND**

Dredging will be done from approximately 21 February - 11 April 2007 from a U. S. Army Corps of engineering borrow area located off of Fire Island. The equipment will arrive on scene on or about 14 February 2007. The hours of operation will be 7 days a week, 24 hours a day. On scene will be the dredge R. N. WEEKS and other support vessels that will be monitoring VHF-FM channels 13 & 16.

Chart 12352

LNM: 06/07

**NY - EAST RIVER & HARLEM RIVER**

Spearin Preston & Burrows Inc. will be conducting operations for eight NYC MTA tunnels located in the East River and Harlem River on, or about, May 24, 2006 through March 27, 2007. A floating construction plant consisting of a 120 ft derrick crane barge, a stone barge, and one crew boat will be on scene at various locations. Mariners are requested to transit at no wake speed when near the equipment.

Charts: 12335 12342

LNM: 21/06

**NY-EAST RIVER-EAST 34TH STREET PIER**

Weeks Marine will be conducting operations to construct a new pier along with the existing East 35th Street Pier and installing two barges for ferry landing at the site commencing on or about October 15, 2006 thru August 1, 2007. Work hrs are 0600-1700 Mon. - Fri. Weeks barge 276 and service barge 241 or 11 will be on-scene and will monitor VHF-FM Channel 65.

Chart 12335

LNM: 41/06

**SECTION VI - PROPOSED CHANGES**

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

**PROPOSED WATERWAY PROJECTS OPEN FOR PUBLIC COMMENT**

**Proposed Project(s)**

**Closing**

**Docket No.**

**Ref. LNM**

None

**NY-HUDSON RIVER**

The Coast Guard proposes to expand the boundary of a Special Anchorage Area on the Hudson River at Nyack, NY. This proposed action is necessary to facilitate safe navigation in that area and provide safe and secure anchorages for vessels not more than 20 meters in length. This action is intended to increase the safety of life and property on the Hudson River, improve the safety of anchored vessels, and provide for the overall safe and efficient flow of recreational vessel traffic and commerce. The proposed, revised boundary would be that portion of the Hudson River bound by the following points: 41°06-06.8"N, 073°54-55.5"W; thence to 41°06-06.8"N, 073°54-18.0"W; thence to 41°05-00.0"N, 073°54-18.0"W; thence to 41°05-00.0"N. The full rulemaking is available online at:

<http://homeport.uscg.mil/mycg/portal/ep/portDirectory.do?tabId=1&cotpld=2> in the Waterways Management Advisory Notices section.

Comments and related material must reach the Coast Guard on or before April 9, 2007. You may mail comments and related material to Waterways Management Division (CGD01-06-023), Coast Guard Sector New York, 212 Coast Guard Drive, room 321, Staten Island, New York 10305.

Chart 12343

LNM: 06/07

**CT - BRIDGEPORT HARBOR**

The Coast Guard is proposing to change the range of the following aids from a nominal range of 4nm to 3nm using light emitting diode (LED) lanterns:

- Bridgeport Harbor Ent Ch LGB 2 (LLNR 24550)
- Bridgeport Harbor Ent Ch LB 5 (LLNR 24565)
- Bridgeport Harbor Ent Ch LB 6 (LLNR 24570)
- Bridgeport Harbor Ent Ch LB 9 (LLNR 24585)
- Bridgeport Harbor Ent Ch LBB 10 (LLNR 24590)

Interested Mariners are strongly encouraged to comment on this proposal in writing, either personally or through their organization. All comments will be carefully considered and are requested prior to 13 March 2006 to facilitate the process. Comments can be made to: CWO2 Michael Tomasi, USCGC Juniper (WLB-201), NAVSTA Pier Two, Newport, RI 02841-1716 or mailto: MTomasi@cgjuniper.uscg.mil.

Charts: 12363 12364 12369

**SECTION VII - GENERAL**

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

**NY - HARLEM RIVER (REVISED)**

Spearin Preston & Burrows Inc. will be installing riverbed marine fill at the Harlem-Concourse MTA tunnel located in the Harlem River, north of the Macombs Dam Bridge (Mile 3.2), and will require periodic closures of alternating half the channel through on or about Tuesday, April 24, 2007. Work hours are 7 am to 3:30 pm, Monday thru Saturday. Construction operations will occur in only one-half of the channel on the Harlem River at a time. The other half of the channel, delineated by the anchor point lighted marker buoys, will be available for vessel navigation. During work hours, the construction platform will move on demand if one-hour advance notice is given to the on-scene vessel operator via marine radio VHF Channel 13. During non working hours, the unmanned construction platform will remain on site and be illuminated with an all around white light visible for at least one mile on its outboard corners.

Chart 12342

LNM: 06/07

**NY- HARLEM RIVER**

Spearin Preston & Burrows Inc. will be installing riverbed marine fill at the Harlem-Lexington MTA tunnel located in the Harlem River, between the Third Avenue and Park Avenue bridges, and will require periodic closures of alternating half the channel through on or about Monday, April 16, 2007. Work hours are 6 am to 10 pm, Monday thru Saturday. Construction operations will occur in only one-half of the channel on the Harlem River at a time. The other half of the channel, delineated by the anchor point lighted marker buoys, will be available for vessel navigation. Both channels will be open for vessel traffic from February 8 to March 18, 2007. During work hours, the construction platform will move on demand if one-hour advance notice is given to the on-scene vessel operator via marine radio VHF Channel 13. During non working hours, the unmanned construction platform will remain on site and be illuminated with an all around white light visible for at least one mile on its outboard corners.

Chart 12342

LNM: 06/07

**RI-PT JUDITH (REVISED)**

Dredging will be done in the Harbor of Refuge and Pt Judith Pond from 15 December 2006 - 15 March 2007. The hours of operation will be 7 days a week, 24 hours a day. On scene will be a barge, 2 dump scows and 2 tug boats. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with extreme caution after passing arrangements have been made.

LNM: 06/07

**NJ-RARITAN RIVER-NEW BRUNSWICK LANDING**

Pile and dock installation will be performed at the New Brunswick Landing by IEW Construction Group through May 10, 2007. Work hours are Monday through Friday, 0700-1730. The DC300 will be on spuds and anchors, the barge Spuyten Duyvil will be on spuds. The material barge Raritan, 16- and 20- assist boats, will also be on scene. The vessels will be monitoring CH 13 & 79.

Chart 12342

LNM: 43/06

**NY - EAST RIVER - TALLMAN ISLAND**

Trevcon Construction is conducting pier work at the NYC DEP Tallman Island Water Pollution Control Plant through April 9, 2008. Work hours are 6am to 5pm. Crane and material barges will be moored outboard to the dock facility during this time

Charts: 12339 12366

LNM: 21/06

**NY-BUTTERMILK CHANNEL**

Fender and dolphin repairs are being made at Piers 6 - 10 through November 7, 2007. Work hours are Monday through Friday from 7 am to 3:30 pm. Spearin Preston Burrows will have a crane barge on scene during these times. Mariners are requested to transit the area at a SLOW BELL.

Chart 12334

**NY-EAST RIVER-ROOSEVELT ISLAND-EAST CHANNEL (REVISED)**

#### **NY-EAST RIVER-ROOSEVELT ISLAND-EAST CHANNEL (REVISED)**

As part of the Roosevelt Island Tidal Energy project, two tidal turbines and two warning buoys will be installed during daylight hours from Monday, October 9 through Friday, December 15, 2006 during daylight hours. The final four turbines will be installed during January and February, 2007. The turbines and buoys will be installed in the East River approximately 200 feet north of the Roosevelt Island Bridge, along the east shore of Roosevelt Island, in a rectangular area measuring 165 feet wide by 260 feet long, bounded by the following points: 40-45-51.2N 073-56-46.7W; 40-45-50.3N 073-56-44.6W; 40-45-52.6N 073-56-42.8W; and 40-45-53.5N 073-56-44.7W. The lighted buoys marking the outer edge of the rectangular area will be white with an orange stripe and diamond and exhibit a flashing white characteristic. The tugs SUSAN MILER, SHAWN MILLER, KAREN MILLER and a 30- x 90- spud barge with crane will be on-scene during the installation process and monitoring VHF FM CH 16. The least depth of water over the turbines in the test area will be 5 ft at Mean Lower Low Water. Accordingly, vessels are requested to remain outside the test area and transit with caution. The tidal turbines are scheduled to be removed in May 2008.

Chart 12339

LNM: 45/06

#### **US-SEACOAST-MAINE/NEW HAMPSHIRE/MASSACHUSETTS**

The Coast Guard has received a report that the F/V FOXY LADY has sunk in (PA) 42-56.52N 069-46.71W. Mariners are advised to proceed with caution while transiting the area.

LNM: 23/06

#### **NY-EAST RIVER**

Spearin Preston & Burrows Inc. will be installing riverbed marine fill at the Cranberry Street MTA tunnel located in the East River from Friday, February 23 to Friday, March 16, 2007. Work hours are 6 am to 3:30 pm. The floating construction platform will consist of The No. 9 crane barge (120- x 32-), one stone barge (150- x 46-), the crew boat ALLISON or JANE DAVIS, and Tug GEORGE BURROWS. The crane barge for placing marine fill will be anchored with a four-point anchoring system attached to four buoys. All four mooring buoys will be illuminated at night with a steady all around white light. During work hours, the construction platform will move on demand if one-hour advance notice is given to the on-scene vessel operator via marine radio VHF Channel 13. During non working hours, the unmanned construction platform will remain on site and be illuminated with an all around white light visible for at least one mile on its outboard corners. Mariners are advised to transit construction area with caution and proceed at no wake/minimum speed when passing construction platforms.

Chart 12335

LNM: 08/07

#### **MA-WEYMOUTH**

Dredging will be done from 15 November - 15 March, 2007. The hours of operation will be 7 days a weeks, 24 hours a day. On scene will be the dredge WOOD 1, A. J. Fournier and dump scows EDDIE CARROL, MIGHTY QUINN, JOE VERROCHI and SEI 200. The dredges will be supported by the tug JAY MICHAEL and the scows will be towed by the tug VINCENT TIBETS. All vessels will be monitoring VHF-FM channels 16, 13 & 67. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

LNM: 45/06

#### **NY-EAST RIVER**

Under and above water bulkhead rehabilitation work is being done on Pier 11 and the Battery Maritime building until 31 March 2007. The hours of operations are Monday - Friday, 6 AM - 4:30 pm. On scene is work & concrete barges, flexifloat 1 and floating workstages, which are monitoring VHF-FM Channels 10 & 16. Mariners are requested to produce no wake when transiting the area.

LNM: 39/06

#### **LORAN-C GREAT LAKES CHAIN (RATE 8970) (REVISED)**

The Great Lakes Chain (Rate 8970) transitioned to time of transmission control at 0300Z 17 Jan 2007. The Great Lakes Chain (Rate 8970) will be testing chain operations and stability under time of transmission (TOT) control beginning at 0300 GMT on 17 January 2007. As this transition takes place, users may notice a shift in their measured time differences or reported Lat / Long as the stations timing values are set to their normal values for the duration of this test. users should not experience any tracking errors or service interference during the test. Users will be notified of any changes to the test and when testing is completed. Loran users are encouraged to report any Loran service outages that they may experienced via the navigation information service (NIS) by calling (703) 313-5900 or by using the NAVCEN website's report a loran problem worksheet at [www.navcen.uscg.gov](http://www.navcen.uscg.gov).

LNM: 02/07

#### **LORAN-C NORTH EAST US CHAIN (RATE 9960) (REVISED)**

The North East US Chain (Rate 9960) transitioned to time of transmission control at 0300Z 17 Jan 2007. The North East Chain (Rate 9960) will be testing chain operations and stability under time of transmission (TOT) control beginning at 0300 GMT on 17 January 2007. As this transition takes place, users may notice a shift in their measured time differences or reported Lat / Long as the stations timing values are set to their normal values for the duration of this test. users should not experience any tracking errors or service interference during the test. Users will be notified of any changes to the test and when testing is completed. Loran users are encouraged to report any Loran service outages that they may experienced via the navigation information service (NIS) by calling (703) 313-5900 or by using the NAVCEN website's report a loran problem worksheet at [www.navcen.uscg.gov](http://www.navcen.uscg.gov).

LNM: 02/07

#### **MA - CAPE COD CANAL**

Effective immediately, the controlling depth of the Cape Cod Canal is reduced to 29.0 feet as a result of a shoal at Canal Station 152, just west of the Sagamore Bridge. This restriction shall remain in effect until further notice. All deep draft traffic must coordinate well in advance with the Marine Traffic Controller on duty. Conditions for deep draft passages will be coordinated with pilots and other marine interests.

Chart 13236

LNM: 34/05

### **MA-BOSTON INNER HARBOR**

Dredging will be done in the Island End River at the St. Lawrence Cement from 18 December 2006 - 14 February 2007. The hours of operation will be 24 hours a day 7 days a week. On scene will be a crane barge and hopper barges, which will be monitoring VHF 16.

Chart 13272

LNM: 51/06

### **MA-CAPE COD CANAL**

NOAA's National Ocean Service deployed a current and wave measurement system near the east entrance to the Cape Cod Canal on Thursday June 30, 2005. The position of the platform is 41 47.050' N 70 28.110' W near Cape Cod Canal Approach Lighted Bell Buoy 1. Mariners are requested not to anchor in this area since that may damage the instrument.

Chart 13236

LNM: 35/05

### **MA-GLOUCESTER**

Until further notice pipe laying is being done in the outer harbor. The hours of operation are 7 days a week, 24 hours a day. On scene are dredge & crane barges and small boats which are monitoring VHF-FM channels 16 and 13.

LNM: 03/07

### **ME-CAPE NEDDICK HARBOR TO ISLES OF SHOALS-CAPE NEDDICK HARBOR**

The Coast Guard has established a safety zone 100 yards on either side of the Cape Neddick Harbor Bridge, also known as the Shore Road Bridge in Cape Neddick, Me. No vessel traffic is allowed to move within 100 yards of the bridge without permission from the Captain of The Port, Sector Northern New England. Affected mariners are requested to contact Coast Guard Sector Northern New England on Channel 16 VHF-FM for further information.

Chart 13283

LNM: 20/06

### **NH - COCHECO RIVER, LOWER NARROWS TO DOVER LANDING**

Dredging operations of the channel between the Lower Narrows to Dover Landing are being conducted by Charter Environmental of Wilmington, MA. Dredging is scheduled to run through March 15, 2007. Mariners are advised to transit the area with extreme caution and at minimum safe speed.

### **NJ - HACKENSACK RIVER**

PSE&G will be installing steel sheeting and a floating turbidity boom along the Hackensack shoreline between the SR 80 Bridge (mile 15.2) and Gas Works Creek through April 30, 2007. A work boat will be on scene assisting from 0700-1700.

Chart 12337

LNM: 07/06

### **NY - SHINNECOCK BAY TO EAST ROCKAWAY INLET-MORICHES BAY**

Shoaling has been reported between Moriches Bay Buoy 26 (LLNR 30335) and Moriches Bay Lighted Buoy 29 (LLNR 30365). Depths of 1.5 feet were encountered at low tide. Vessels are advised to use caution when navigating in the area.

Chart 12352

LNM: 28/03

### **NY-125th STREET TO 135th STREET AND THE HUDSON RIVER**

Construction on the West Harlem Waterfront/Riverwalk will be done from 3 April 2006 to approximately 30 June 2007. The work will be completed during daylight hours. On scene vessels will monitor VHF-FM channels 16 & 13.

LNM: 13/06

### **NY-HUDSON RIVER-MANHATTAN-PIER 64**

Weeks Marine will be demolishing and rebuilding Pier 64 through July 31, 2007. Work hours are 0600-1700. The Weeks Crane Barges 529 and 541, Deck Barge 46, and debris scows will be on-scene. White mooring buoys with all-around white lights will be deployed as part of this project.02

Chart 12335

LNM: 02/07

### **NY-SHINNECOCK BAY TO EAST ROCKAWAY INLET-STATE BOAT CHANNEL-HAZARDS TO NAVIGATION**

An uncharted shoal in the middle of the channel was discovered approximately 465 yards NE of State Boat Ch Dbn 25 (LLNR 31065). An uncharted shoal running in a general north east direction into the channel approximately 5 yds east of State Boat Channel Buoy 76 (LLNR 31436). All mariners are advised to use caution and exercise prudent seamanship while transiting the area.

Chart 12352

LNM: 39/05

### **NY/NJ - AMBROSE CHANNEL OUTBOUND-DREDGING HAS BEEN POSTPONED FOR THE WINTER**

Great Lakes Dredge & Dock will commence dredging on or about April 7, 2006 south of the Verrazano Narrows Bridge. The Hopper Dredges Liberty Island and Padre Island, and Survey Vessel St. Johns River will be on scene. Dredging will continue in this area until approximately November 30, 2007 on a 24-hour / 7-days per week basis. The area will not be closed to navigation and dredges will MOVE ON DEMAND. Dredges & support equipment are required to report their movements and positions to VTC-NY on Channel 14. Dredges are monitoring Channels 13 and 16. Mariners are requested to contact dredges on Channel 13 to make any necessary navigational arrangements.

Chart 12327

LNM: 14/06 &  
02/07

**NY/NJ-ARTHUR KILL**

Spearin, Preston & Burrows will be replacing the wave screen at Elizabeth Marina from January 29 to June 30, 2007. One 140' x 45' derrick crane barge and two 90' x 30' material barges will be anchored on scene. The anchors will be marked by buoys and a steady burning white light. The work area will encroach approximately 60 feet into the navigable channel. Mariners are requested to transit the area with extreme caution at the safest minimum speed.

Chart 12333

LNM: 04/07

**NY/NJ-BROOKLYN NY-BAY RIDGE CHANNEL**

Construction of a new ferry terminal for Battery Park City at 39th Street pier in Brooklyn NY is being done until August 2007. The hours of operation are 7 days a week, 6:00 am - 6:00 PM. There is a 30 foot by 90 foot scow and barge, JACKBOB, with a cherry picker on top. In approximately one month a crane barge and several material barges will be on scene also. Request all mariners pass with no wake and use caution while in the area. Any concerns contact tug GEORGE BURROS VHF-ch 13 or Patrick Cumiskey @ 917-335-7571. Mariners are required to proceed with caution that will cause No Wake.

LNM: 02/07

**NY/NJ-UPPER NEW YORK BAY**

Donjon Marine will be conducting dredging operations in Anchorage Channel in the vicinity of Gowanus Flats Lighted Bell Buoys 22 and 24 until approximately January 22, 2009. Dredging operations will occur 24 hours a day, 7 days per week. The dredges DELAWARE BAY, MICHIGAN, NEWARK BAY, or J.P. BOISSEAU will be spudded down at various locations throughout the channel during this project. The tug PAUL ANDREW, launch MATTHEW SCOTT, and various WITTE hopper Scows (dimensions 195- x 35- up to 260- x 52.5-) will also be on scene. The project area will remain open to navigation and all vessels / dredges will MOVE ON DEMAND. Dredges and support equipment will report their movements and positions to Vessel Traffic Service New York (VTSNY) on Channel 14. VTSNY will provide dredge location information in relation to known navigational marks (i.e. buoys, anchorage grounds, landmarks, etc.). Dredges will monitor VHF-FM channels 13 and 16. Mariners are requested to contact the dredges on channel 13 to make any necessary navigational arrangements. The assist tug will be AIS equipped and alongside the dredge at all times. The vessels can move within 15 minutes. Blasting operations ARE NOT anticipated for this project.

Chart 12334

LNM: 04/07

**RI-NARRAGANSETT BAY-PROVIDENCE RIVER**

A 30-35 foot cabin cruiser is partially submerged in the Providence River with 4 feet of bow protruding from the water. The vessel is in approximate position 41-48.18N 071-23.17W, marked with a 1 x 3 foot white fender tied to the bow. Mariners are requested to use caution when transiting the area.

**VERMONT – LAKE CHAMPLAIN (NEW YORK AND VERMONT) – MISSISQUIOI BAY – New Bridge Construction** – Work is ongoing for the new Route 78 fixed bridge construction, at mile 105.9, across Missisquoi Bay between Alburg and Swanton, Vermont. Work barges may be located at various locations along the new bridge alignment facilitating new bridge construction. Mariners should exercise caution while transiting the area  
Chart 14781 LNM 07/07 (CGD1)

**MAINE – APPROACHES TO BLUE HILL BAY – PENOBSCOT RIVER – Bridge Construction** – New bridge construction is underway at the US Route 1 Bridge (old Waldo-Hancock) across the Penobscot River at mile 10.9, between Prospect and Verona. Work barges will be located at various locations in and around the channel. Mariners should exercise caution when transiting the area  
Chart 13309 LNM 07/07 (CGD1)

**MAINE – DAMARISCOTTA, SHEEPSCOT AND KENNEBEC RIVERS – KENNEBEC RIVER – Bridge Painting & Vertical Reduction** - Bridge painting of the lift span and two adjacent spans at the Carlton Bridge, mile 14.0, across the Kennebec River between Bath and Woolwich, Maine will commence on March 15, 2007 and continue through November 17, 2007. Vertical clearance under all three spans will be reduced by approximately 5 feet due to cables and suspended platforms which will be marked by steady red lights at approx. 50 ft intervals. Mariners are advised to transit through the main navigational channel only and should exercise extreme caution while transiting the area.

Chart 13293 LNM 07/07 (CGD1)

**MAINE – CAPE NEDDICK HARBOR – CAPE NEDDICK RIVER – Bridge Construction** – Work is ongoing to replace the Shore Road Bridge at mile 0.2, across the Cape Neddick River. The replacement bridge shall consist of three spans with approximately two feet of additional vertical clearance upon completion. The temporary highway bridge will re-located upstream to facilitate vehicular traffic and a 90 foot work trestle shall be installed to provide a work platform. The clearances under the temporary bridge and work trestle shall be approximately the same as the old Shore Road Bridge. Mariners should exercise caution while transiting the area.

Chart 13283 LNM 07/07 (CGD1)

**MASSACHUSETTS – BOSTON HARBOR – FORT POINT CHANNEL – Bridge Repairs** – Protective fender repairs and bridge rehabilitation construction are underway at the Congress Street Bridge, mile 0.3, across Fort Point Channel in Boston, Massachusetts. Barges may be located at various locations. Mariners should exercise caution while transiting the area.

Chart 13272 LNM 07/07 (CGD1)

**MASSACHUSETTS - BOSTON HARBOR - WEYMOUTH - FORE RIVER - Bridge Demolition** – Bridge pier and fender demolition at the old Quincy Weymouth Route 3A highway bridge is underway and will continue until July 2007. The work barges will move out of the main channel for large commercial vessels upon request by calling the bridge at (617) 479-2690 or VHF Channel 13. Mariners should exercise extreme caution while transiting the area.

Chart 13270 LNM 07/07 (CGD1)

**MASSACHUSETTS – BOSTON HARBOR – NEPONSET RIVER – Bridge Pier Rehabilitation** – Work is underway to rehabilitate the Neponset River highway bridge at mile 1.5, across the Neponset River between Boston and Quincy, Massachusetts. Rehabilitation construction will take three years to complete. Work barges will be located at various pier locations during the prosecution of these repairs. Mariners should exercise caution while transiting the area.

Chart 13270 LNM 07/07 (CGD1)

**MASSACHUSETTS – BOSTON HARBOR – FORT POINT CHANNEL – Bridge construction** – Replacement of the submarine power cable at the Northern Avenue Bridge across Fort Point Channel will commence on 15 March 2007 and continue through 5 April 2007. All work will be performed outside the main channel and the bridge will continue to open for navigation as required during this work. Mariners should exercise caution while transiting the area.

Chart 13270 LNM 07/07 (CGD1)

**MASSACHUSETTS – NARRAGANSETT BAY – TAUNTON RIVER – New Bridge Construction** – Construction work is in progress at the Route 6 Bridge across Taunton River at mile 1.8. Work equipment is operating in and around the channel. Mariners are advised to exercise caution when transiting the area.

Chart 13221 LNM 07/07 (CGD1)

**MASSACHUSETTS – NARRAGANSETT BAY – TAUNTON RIVER – Partial channel obstruction** – Bridge structural repairs are ongoing at the Brightman Street (Rt-6) highway bridge, mile 1.8, across the Taunton River. A construction work barge (18'x43') will be located under the draw adjacent to the bridge protective fender on either side of the channel, from 7 a.m. to 3:30 p.m. Monday through Friday until further notice. The work barge will move upon request by calling the bridge tender at (508) 672-5111 or on VHF channel 13 and 16. Mariners should exercise caution while transiting the area.

Chart 13221 LNM 07/07 (CGD1)

**RHODE ISLAND – MOUNT HOPE BAY – Bridge maintenance and Painting** – Bridge maintenance and painting operations at the Mount Hope Bridge, mile 0.0, across Narragansett Bay East Passage is ongoing and shall continue through February 2007. Working hours will be 7 a.m. to 5:30 p.m. Monday through Friday. Mariners should exercise caution while transiting the area.

Chart 13221 LNM 07/07

**RHODE ISLAND – NARRAGANSETT BAY – SEEKONK RIVER – Bridge Construction & Channel Restriction** – Bridge construction is on going at the I-195 Washington Bridge, mile 0.6, across the Seekonk River. A 20' X 40' work barge will be stationed at various locations during construction. Mariners should exercise caution while transiting the area

Chart 13221 LNM 07/07 (CGD1)

**RHODE ISLAND – NARRAGANSETT BAY – BARRINGTON RIVER – Bridge Demolition** – Removal of the old Route 114 Bridge, mile 0.4, across the Barrington River at Barrington, Rhode Island is underway. Bridge piers, some possibly unlit, still remain in the waterway. A 40' X 120" barge will be located in the navigational channel 7 a.m. to 4 p.m., Monday through Saturday. Mariners are advised to exercise caution while transiting the area.

Chart 13221 LNM 07/07 (CGD1)

**RHODE ISLAND – NARRAGANSETT BAY – PALMER RIVER – Bridge Construction** – Removal of the old Route 114 Bridge, mile 0.4, across the Palmer River between Warren and Barrington, Rhode Island. Construction of the new replacement bridge will follow demolition and continue through September 2007. Barges will be located a various locations. Mariners should exercise caution while transiting the area.

Chart 13221 LNM 07/07 (CGD1)

**RHODE ISLAND – NARRAGANSETT BAY – WEST PASSAGE – Bridge Demolition** – Bridge demolition at the old Jamestown Bridge at mile 5.7, across Narragansett Bay (West Passage) at North Kingstown, Rhode Island is ongoing through April 2007. Mariners should exercise extreme caution while transiting the area

Chart 13221 LNM 07/07 (CGD1)

**RHODE ISLAND – NARRAGANSETT BAY – WEST PASSAGE – Bridge Demolition** – Bridge demolition work continues at the old Jamestown Bridge at mile 5.7, across Narragansett Bay (West Passage) at North Kingstown, Rhode Island. The main navigation channel is now free of debris and partially open to limited vessel traffic. Materials barges and crane barges are working at various locations. The Coast Guard has established a temporary 300 foot channel extending 150 feet from each side of the centerline of the main channel. The channel is marked with green buoys on the west side and red buoys on the east side. Mariners should exercise extreme caution while transiting the area.

Chart 13221 and 13223 LNM 07/07 (CGD1)

**RHODE ISLAND – PROVIDENCE RIVER APPROACH – PROVIDENCE RIVER – Bridge Construction** – Construction of the new I-195 Bridge, mile 7.3, across the Providence River, south of the hurricane barrier, is underway. Barges are positioned at various locations on the west side of the waterway outside the main channel. Mariners should exercise caution while transiting the area.

Chart 13221 LNM 07/07 (CGD1)

**RHODE ISLAND – NARRAGANSETT BAY – SAKONNET RIVER – Bridge Demolition** - Demolition work is underway, and will continue through January 2007, to demolish the old Sakonnet River railroad bridge at mile 12.4 across the Sakonnet River in Tiverton, Rhode Island. Work barges will be located at various postions throughout this demolition project Monday through Friday between 7 a.m. and 3:30 p.m. Mariners should exercise extreme caution while transiting the area.

Chart 13221 LNM 07/07 (CGD1)

**CONNECTICUT – LONG ISLAND SOUND – NEW LONDON HARBOR AND VICINITY – THAMES RIVER – Temporary Final Rule** – The Coast Guard temporarily changed the drawbridge operating regulations governing the operation of the Amtrak Bridge, at mile 3.0, across Thames River. This final rule allows Amtrak to operate the Thames River RR Bridge for the passage of vessel traffic on a temporary schedule through May 15, 2007, for the passage of vessel traffic as follows:

Monday through Friday: 5 a.m. to 5:40 a.m., 11:20 a.m. to 11:55 a.m., 3:35 p.m. to 4:15 p.m. and 8:30 p.m. to 8:55 p.m.  
Saturday 8:30 a.m. to 9:10 a.m., 12:35 p.m. to 1:05 p.m., 3:40 p.m. to 4:10 p.m., 5:35 p.m. to 6:05 p.m. and 7:35 p.m. to 8:40 p.m.  
Sunday 8:30 a.m., to 9:20 a.m., 11:35 a.m. to 12:15 p.m., 1:30 p.m. to 1:55 p.m., 6:30 p.m. to 7:10 p.m. and 8:30 p.m. to 9:15 p.m.

The bridge shall open on signal at any time for the passage of U.S. Navy vessels, Navy escort vessels and commercial vessels. At all other times the draw may remain in the closed position. Vessels that can pass under the draw without a bridge opening may do so at all times. Mariners are advised to transit the area with caution and plan accordingly.

Chart 13213 LNM 07/07 (CGD1)

**CONNECTICUT – LONG ISLAND SOUND – NEW LONDON HARBOR AND VICINITY – SHAW COVE – Notice of temporary deviation from regulations** – The Commander, First Coast Guard District, has issued a temporary deviation from the drawbridge operation regulations for the Amtrak RR bridge across Shaw Cove at mile 0.0, New London, Connecticut. Under this temporary deviation the Amtrak bridge will operate as follows:

On signal from January 5, 2007 through February 23, 2007, between 5 a.m. and 5:20 a.m. and between 12:45 pm. and 1:05 p.m., daily at least a 4-hour advance notice is given.

On signal at any time from February 24, 2007 through February 25, 2007, after at least an 8-hour advance notice is given.

On signal from February 26, 2007 through March 30, 2007, between 5 a.m. and 5:20 a.m., between 12:45 pm. and 1:05 p.m. and between 5:15 p.m. and 5:35 p.m., daily after at least a 4-hour advance notice is given.

The bridge shall open at any time for DDL Energy oil delivery vessels after at least a 24-hour advance notice is given.

Advance notice for bridge openings shall be via marine radio channel 13 or by calling (860) 46-3959/3943.

Mariners are advised to plan their transits accordingly.

Chart 13213 LNM 07/07 (CGD1)

**CONNECTICUT – LONG ISLAND SOUND – LONG ISLAND SOUND TO DEEP RIVER – CONNECTICUT RIVER – Channel Restriction** – Installation of submarine cable at the Amtrak Old Lyme RR Bridge at mile 3.4 across Connecticut River will commence on February 5 2007 and continue through March 31 2007 A crane barge measuring 51ft by 120ft will be operating in the navigation channel during daylight hours. Mariners requiring full horizontal clearance can contact the bridge operator via marine radio VHF-FM channel 13/16 with one hour advance notice. Mariners are advised to plan their transits accordingly.

Chart 12375 LNM 07/07 (CGD1)

**CONNECTICUT – LONG ISLAND SOUND – NEW HAVEN HARBOR – QUINNIPIAC RIVER - Bridge Rehabilitation** – Construction of the Ferry Street Bridge at mile 0.7 across Quinnipiac River is in progress. Currently the barges are operating outside the navigable channels. Beginning in the spring of 2007 one barge will be operating in the navigable channel. More details will follow. This project is to be completed by February 5, 2009. Mariners are advised to transit the area with caution and reduce wake.

Chart 12371 LNM 07/07 (CGD1)

**CONNECTICUT - LONG ISLAND SOUND - STRATFORD POINT TO SHERWOOD POINT - BRIDGEPORT HARBOR - PEQUONNOCK RIVER - Bridge Replacement** - A 45ft by 126ft crane barge and several 30ft by 90ft work barges are operating under the I-95 Bridge across Pequonnock River at mile 0.0 until further notice. Mariners requiring full horizontal clearance through the bridge should contact the contractor via marine radio on channel 13/16 VHF-FM or call (203) 334-8718 two hours in advance. Mariners are advised to plan accordingly and exercise caution when transiting the area.

Chart 12369 LNM 07/07 (CGD1)

**NEW YORK – LONG ISLAND SOUND AND EAST RIVER – HEMPSTEAD HARBOR TO TALLMAN ISLAND – HEMPSTEAD HARBOR – Channel Closure/Bridge Replacement** – Construction is underway for the replacement of the Route 25A (Roslyn Viaduct) bridge over Hempstead Harbor and will continue through December 31, 2007. From February 5 through February 28 2007 during demolition operations, debris containment netting will be installed under the superstructure and will reduce the bridge vertical clearance. A secondary catch system consisting of half inch diameter wire rope and chain link fencing will be placed in the waterway beneath the demolition area. Hot work will be performed between 0700 and 1530. Captain of the Port New York has authorized the closure of the Hempstead Harbor from approximately February 12 to February 28 2007. No vessels will be permitted in the waterway under the bridge. Mariners are advised to exercise extreme caution when transiting the area.

Chart 12366 LNM 07/07 (CGD1)

**NEW YORK – LONG ISLAND SOUND – HEMPSTEAD HARBOR TO TALLMAN ISLAND – HUTCHINSON RIVER – Pull Boxes Replacement** – Replacement of electrical pull boxes at the Boston Post Road Bridge across Hutchinson River at mile 2.5 is in progress. A platform measuring approx. 28ft in length and for the full width of the structure will be installed beneath the centerline of the bridge reducing the available vertical clearance by 2ft. Horizontal clearance through the bridge will not be reduced. This project is to be completed by March 31, 2007. Mariners are advised to exercise caution wake when transiting the area.

Chart 12366 LNM 07/07 (CGD1)

**NEW YORK – SHINNECOCK BAY TO EAST ROCKAWAY INLET – SLOOP CHANNEL - Bridge Replacement/Channel Closure** – Construction is underway for the replacement of the Wantagh State Parkway Bridge across Sloop Channel at mile 15.4. A 92' x 160' heavy lift ringer crane barge, a 72' x 250' pile scow and several work barges are operating in and around the work zone blocking the channel. This floating equipment poses safety hazards for mariners transit through the bridge site. The Captain of the Port, Long Island has established a temporary safety zone in the waters surrounding the bridge. This zone is necessary to protect vessels transiting in the area from hazards imposed by construction barges and equipment. Entry into this zone is prohibited unless authorized by the Captain of the Port, Long Island Sound. Mariners must bypass this work site and use a northerly alternate route through the Goose Creek Bridge. Mariners are also advised to reduce wake and exercise caution when approaching the construction area.

Chart 12352 LNM 07/07 (CGD1)

**NEW YORK – SHINNECOCK BAY TO EAST ROCKAWAY INLET – GREAT SOUTH BAY - Bridge Painting/Substructure Repairs** – Contractors have shut down for the winter. No barges will be located in the main navigation and adjacent channels of the Robert Moses Causeway at mile 7.3 across Great South Bay until March of 2007. Scaffolding beneath the main and flanking spans (both northbound and southbound) reducing the vertical clearance by two and a half feet will remain through May 25 2007. Mariners are advised exercise caution when transiting the area.

Chart 12352 LNM 07/07 (CGD1)

**NEW YORK – SHINNECOCK BAY TO EAST ROCKAWAY INLET – REYNOLDS CHANNEL – Notice of Temporary Deviation from Regulations** – The First Coast Guard District, has issued a temporary deviation from the drawbridge operation regulations governing the operation of the Atlantic Beach Bridge at mile

0.4, across Reynolds Channel at Lawrence, New York. Under this temporary deviation the bridge shall open on signal from February 26, 2007 through March 2, 2007, from 7 a.m. to 5:30 p.m. after a one-hour notice is given by calling (516) 239-1821 or via marine radio channel 13. Mariners are advised to plan their transits accordingly.  
Chart 12352 LNM 07/07 (CGD1)

**NEW YORK - HUDSON AND EAST RIVERS - HUDSON RIVER - Vertical Clearance Reduction** - Installation of scaffolding above the main channel through the Tappan Zee Bridge across the Hudson River at mile 27.7 will commence. Scaffolding will be in place for approximately 2 years and will reduce the available vertical clearance by approx. 5 ft; however, to accommodate large vessels, a minimum vertical clearance of 138 ft will be available for a 200 ft horizontal opening at all times and will be marked by two green lights, on both the up and downstream sides of the bridge. Mariners are advised to exercise extreme caution when transiting the area.  
Chart 12343 LNM 07/07(CGD1)

**NEW YORK - NEW YORK HARBOR - EAST RIVER - Bridge Rehabilitation/Vert. Clearance Reduction** - Rehabilitation of the Manhattan Bridge across the East River at mile 1.1 is in progress. Scaffolding has been installed under the entire span reducing the available vertical clearance by approximately 2 feet. Mariners are advised to exercise caution when transiting the area.  
Chart 12342 LNM 07/07 (CGD1)

**NEW YORK - NEW YORK HARBOR - EAST RIVER - Bridge Rehabilitation** - Rehabilitation of the Williamsburg Bridge across the East River at mile 2.3 is in progress. All work is being performed on the bridge and does not affect navigation. This project is expected to be completed by March 2007. Mariners are advised to exercise caution when transiting the area.  
Chart 12342 LNM 07/07 (CGD1)

**NEW YORK - NEW YORK HARBOR - EAST RIVER - Demolition of the Temporary FDR Outboard Detour Bridge** - Demolition of the temporary FDR Outboard Detour Bridge parallel to the East River, between mile 5.1 to 5.7. Demolition of the floating fender system is ongoing. Several floating equipment will be operating in the waterway at various locations during the demolition project. The entire project is expected to be completed by the end of April 2007. Mariners are advised to exercise caution and reduce wake when transiting the area.  
Chart 12327 LNM 07/07 (CGD1)

**NEW YORK - NEW YORK HARBOR - UPPER BAY - BAY RIDGE CHANNEL - GOWANUS CANAL - Bridge Reconstruction** - Reconstruction to the Hamilton Ave Bridge across Gowanus Canal at mile 1.2 is in progress. A platform is being installed inside the side canal (outside the navigable channel) for access to the work area. The platform is approximately four and a half feet wide. There will be intermittent bridge closures, channel closures and advance notice for bridge openings as construction continues. More details will follow once the dates have been confirmed. This project is to be completed by spring 2009. Mariners are advised to transit the area with caution.  
Chart 12327 LNM 07/07 (CGD1)

**NEW YORK - NEW YORK HARBOR - EAST RIVER - Vertical Clearance Reduction** - New York City Department of Transportation (NYCDOT) has resumed the painting project at the Queensboro (59<sup>th</sup> St.) Bridge across the East River at mile 5.5. NYCDOT has installed scaffolding under the bridge for access to the undersides of the bridge deck and to prevent paint and debris from falling into the waterway. Scaffolding reduces the available vertical clearance by approximately 3 feet. This project is expected to be completed by 1 July 2008. Mariners are advised to exercise caution when transiting the area.  
Chart 12342 LNM 07/07 (CGD1)

**NEW YORK - NEW YORK HARBOR - EAST RIVER - Vertical Clearance Reduction** - Safety netting under the Roosevelt Island Bridge across the East River at mile 6.4, in place to prevent debris from falling into the waterway reduces the available vertical clearance by approximately 3 feet. Mariners requiring a bridge opening should contact NYC Bridge Operations at (718) 821-4580 or (212) 371-7047 two hours in advance. Mariners are advised to exercise caution when transiting the area.  
Chart 12342 LNM 07/07 (CGD1)

**NEW YORK - NEW YORK HARBOR - EAST RIVER - Bridge Rehabilitation - Scaffolding/Vertical Clearance Reduction** - Rehabilitation of Bronx-Whitestone Bridge across the East River at mile 13.8 is in progress. Scaffolding is installed under the entire length of the bridge. The vertical clearance at the center of the channel is reduced by approximately 6 feet. The center 200 foot of the navigational channel is marked by two flashing green lights on both the upstream and downstream sides of the bridge. During large vessel transits vehicular traffic across the bridge will be halted resulting in an additional 7.25 feet of vertical clearance at the center of the channel, thereby providing equal or greater vertical clearance than under normal traffic loading conditions. Vessels requiring more than 127 ft vertical clearance should contact the Coast Guard Vessel Traffic Service at least 12 hours prior to passage. Mariners are advised to exercise caution when transiting the area.  
Chart 12339 LNM 07/07 (CGD1)

**NEW YORK - TALLMAN ISLAND TO QUEENSBORO BRIDGE - FLUSHING RIVER - Bridge Rehabilitation** - Rehabilitation of Whitestone Expressway (I-678) Bridge across the Flushing River at mile 0.2 continues. The ongoing work includes erecting bearings and structural steel spans over the channel. Mariners requiring full horizontal clearance can contact contractor at 718-446-7000 extension 229. Mariners are advised to exercise caution when transiting the area and planned accordingly.  
Chart 12339 LNM 07/07 (CGD1)

**NEW YORK - EAST RIVER - NEWTOWN CREEK - DUTCH KILLS - Bridge Closure** - The Long Island Railroad Swing Railroad (DB) Bridge across Dutch Kills at mile 1.1 will be closed to marine traffic until further notice due to structural damage and deterioration of the center pier. The bridge is no longer operable as a swing bridge. Mariners are advised to plan accordingly. If you need additional information contact Mr. James A. Pagano of the Long Island Railroad at (718) 558-3152.  
Chart 12335 LNM 07/07 (CGD1)

**NEW YORK - NEW YORK HARBOR - EAST RIVER - HARLEM RIVER - Bridge Restriction** - The west draw (Manhattan Side) of the Third Avenue Swing Bridge across Harlem River at mile 1.9 will be closed for marine traffic until further notice. Mariners are advised to transit the east draw (Bronx Side) and to exercise caution when transiting the area.  
Chart 12327 LNM 07/07 (CGD1)

**NEW YORK - NEW YORK HARBOR - EAST RIVER - HARLEM RIVER - Bridge Rehabilitation** - Rehabilitation of the 145<sup>th</sup> Street Swing Bridge across Harlem River at mile 2.8 is in progress. During the demolition of the swing span, the waterway will be closed to marine traffic for approximately 4 days. Hours of operation are during daylight hours. More information will be published as it is received. Mariners are advised to exercise caution when transiting the area.

Chart 12342 LNM 07/07 (CGD1)

**NEW JERSEY – PASSAIC AND HACKENSACK RIVERS–HACKENSACK RIVER – Fender Damage** – The fender system at the west rest pier of Amtrak’s Portal Railroad Bridge across the Hackensack River at mile 5.0 was severely damaged due to a fire. Until further notice mariners are requested to avoid the west draw and transit the east draw only. Mariners are advised to reduce wake and exercise caution when transiting the area.

Chart 12337 LNM 07/07 (CGD1)

**NEW JERSEY – RARITAN BAY – RARITAN RIVER – Bridge Widening** – Widening of the Driscoll (Garden State Parkway) Bridge across Raritan River at mile 2.2 is in progress. At times floating equipment will be operating in the waterway. Mariners are advised to reduce wake and exercise caution when transiting the area.

Chart 12332 LNM 07/07 (CGD1)

**NEW YORK AND NEW JERSEY – NEW YORK HARBOR –ARTHUR KILL–Bridge Inspections/Vertical Clearance Reduction** – Biennial Bridge inspection of the Outerbridge Crossing Bridge across the Arthur Kill at mile 2.0 is in progress. Hours of operation are 0730 to 1630 Mondays through Fridays. In performing this inspection an under bridge inspection type vehicle (UBIU) that extends over the side and beneath the bridge is being used. Vertical clearance under the bridge will be reduced by approximately 10ft when the UBIU is in use. Bridge inspectors will monitor Chan. 13/16 VHF-FM. Mariners requiring the full vertical clearance can contact the bridge inspector to move the UBIU out of the navigable channel. In addition, the inspectors will be operating under the main span using a 2.5 X 30ft scaffolding which will reduce the available vertical clearance by approx. 4ft. The scaffolding will be marked by steady red lights on the lower four corners. The scaffolding will be pulled up above the bottom girder when not in use. Mariners are advised to exercise caution when transiting the area.

Chart 12327 LNM 07/07 (CGD1)

**NEW YORK AND NEW JERSEY –NEW YORK HARBOR–ARTHUR KILL–Bridge Rehabilitation**–Rehabilitation of the Goethals Bridge across Arthur Kill at mile 11.5 is underway. Scaffolding and netting is installed under and on the side of the bridge; however there is no reduction of vertical clearance. At times welding and burning will be conducted. The contractor will be monitoring channels 13/16 VHF-FM when conducting hot-work, and will cease operations upon approach of a vessel. Hotwork will not resume until the vessel has completely passed under the bridge. This project is expected to be completed by mid April 2007. Mariners are advised to exercise caution when transiting the area.

Chart 12327 LNM 07/07 (CGD1)

**NEW YORK AND NEW JERSEY - NEW YORK HARBOR – KILL VAN KULL – Bridge Rehabilitation** – Work and storage barges are operating in the channel at the Bayonne Bridge across Kill Van Kull at mile 1.5. The work includes the installation of a temporary cofferdam around the existing abutment, installation of a triaxial post-tensioning anchor system and encasement of the existing abutment with reinforced concrete. At times some welding and burning will be conducted. Contractor will be monitoring Chan. 13/16 VHF-FM when conducting hot work, and will cease operation when vessel is approaching and will not start again until the vessel has passed the bridge. Mariners are advised to exercise caution when transiting the area.

Chart 12327 LNM 07/07 (CGD1)

**NEW JERSEY – NEW YORK HARBOR – CHEESEQUAK CREEK – Notice of Temporary Deviation from Regulations** – The Coast Guard has issued a temporary deviation from the drawbridge operation regulations governing the Morgan Drawbridge RR Bridge across Cheesequake Creek at mile 0.2. The drawbridge may remain in the closed position for 3 consecutive days from Tuesday 20 February through Thursday 22 February 2007 to facilitate electrical and structural repairs. Rain dates of 23 and 24 February 2007, if required have also been authorized. Mariners are advised to plan accordingly.
