

National Public Health Performance Standards Program  
Local Public Health System Assessment  
Facilitator's Guide

*(Using the LPHS instrument and a full day meeting setting – can be revised to accommodate other instruments or settings)*

1. To begin your group session, introduce yourself, your Scorer, your Recorder(s), and your Technical Advisor and describe your roles. Ask all breakout group participants to introduce themselves. Local the purpose of the group's work is to assess the extent to which the Local public health system meets or does not meet optimal performance standards.
2. Review materials provided to participants: color voting cards, the instrument for their essential service, and the voter's guide.
3. Review display materials:
  - 1) **Essential Services:** wall chart of all 10 Essential Services that provide the framework for the NPHPS by describing the activities that should be provided by the public health system.
  - 2) **The Public Health System** picture emphasizing all the different sectors comprising the system as a WHOLE. This is a good time to remind participants to keep in mind that the assessment is of the entire system and not just the organization they are representing.
  - 3) **Voting scale:** table displays to be used as a reminder when it is time to vote. Point out that you will come back to this
  - 4) **Ground Rules:** Review and ask if they would like to add others.
4. You have been assigned two "Essential Services" to address in your group. Read aloud the Essential Service and related activities you will be covering that day.
5. Review the Assessment Tool. There are categories, which represent major activities or practice areas for each Essential Service
6. Each category includes:
  - The LPHS Model Standard that describes optimal performance for a public health system
  - Questions related to the category (the number of questions may be few to many) that serves as measures of performance in how that standard is being met.
8. Briefly **review the process** that will be used to do the assessment:
  - # 1 Discussion**

I will read each model standard. We will then review some of the activities participants wrote on the newsprint today relative to what various organizations are doing to contribute to meeting this Standard, add to these through discussion, talk about what we do collectively as a public health system in meeting this standard and what should be occurring that is not. We will then rate/vote on each question related to the model standard.

**#2 Voting**

- a. Make sure each participant has an orange, pink, yellow and green card. Review what each card represents according to the voting scale (also depicted on the table display and on their voter's guide handout).

- **Yes 76% - 100 %**

of the activity described within the question is met within the Local public health system (*in other words, we may not have a 100% optimal system related to the question, but we do have a very high level of system-wide functioning related to the question*)

- **High Partially: 51% - 75 %**

of the activity described within the question is met within the Local public health system (*in other words, we have a good system-wide effort going on related to the question, but we still have a way to go to meet the standard*)

- **Low Partially: 26 % - 50 %**

of the activity described within the question is met within the Local public health system (*in other words, we have some activities going on related to the question, but we have a substantial amount of work to do to meet the standard*)

- **No:  $\leq 25$  %**

of the activity described within the question is met within the Local public health system (*in other words, we may have a few activities going on related to the question, but they are minimal*)

- b. How much systems activity is enough in deciding how to vote? It may be helpful to reiterate some basic parameters in thinking about how well the public health system is functioning. Think about the focus of the question in terms of:
- Dispersion:** is the activity in the question disseminated/dispersed across the Local *geographically* or does it exist in only one area? Is the activity *dispersed among programs* or carried done in only one area of public health concern (e.g. maternal and child health) and *not in other areas of interest* (e.g. chronic disease, infectious disease, injury prevention, etc.)?
  - Participation among many system partners:** is the activity done only in one sector and not others (e.g. done in hospitals, but not governmental public health agencies)?
  - Frequency:** is the activity in the question done routinely or on an ad hoc basis?
  - Quality:** is the activity in the question done in a high quality manner, or is it a new activity just getting started and not of sufficient quality yet?

### **#3 Further Discussion**

In the event there are diametrically opposed answers or a participant has a strong need to discuss an issue, you may open it up for further discussion and ask if the group would like to vote again. If someone wants to talk they must raise their **pink card**. They will then be given 1 minute to talk. Anyone else wishing to talk may do the same.

### **# 4 Take Away Messages**

We will have a recorder to document key messages we want to take away from our discussion. These may include but are not limited to: **strengths** of the LPHS for this essential service, **weaknesses** of the LPHS for this essential service, **recommendations for immediate improvements** of the LPHS for this essential service and any **priorities** of the LPHS for this essential service

9. Keep an eye on the time. You have approximately 3 hours to complete the assessment for each Essential Service, with a 15-minute break at a time determined by the group.

## **Step by Step Process for Facilitation**

### **Step #1 Discussion:**

- a. Read the Essential Service and the activities included.
- b. Review the newsprint completed by all participants on what is being done around the Local relative to this Essential Service.
- c. Ask the group to take a few minutes and think about what their organization or others with which they are familiar do to contribute to meeting the Standard?
- d. Ask the question, what is the collective picture of how we are doing across the Local related to this essential service.
- e. Read the first Indicator and then the first Model Standard
- f. On the first time through, ask participants to skim the assessment questions under the Model Standard pointing out that the assessment questions mirror each of the items in the Model Standard.
- g. Allow time for discussion. Discussion is over when 1) the facilitator determines enough time has been spent on the discussion; or 2) there seems to be no further discussion needed.

### **Keeping In Mind:**

- Encourage all participants to contribute
- Draw out different points of view
- Keep discussion relevant to the Model Standard
- Keep people focused on system as a whole

- Remind participants that the purpose is to get an honest and accurate perception of the strengths and weaknesses of the system to help with quality improvement initiatives. Participants and/or organizations are not being judged by their answers.
- Try to encourage concrete examples of activities, but discourage anecdotes!
- Try to have people frame their discussion in the categories of **strengths, weaknesses, recommendations for immediate improvement and priorities** to help the recorder get these thoughts down in an organized way.

### **Step #2 Voting:**

- a. Read the first stem question under the Model Standard pointing out that the question relates back to the Model Standard. The facilitator will ask participants to vote first on the sub questions and then the first stem question. Then ask if anyone wishes to have further discussion on this specific question. Are we ready to vote? Begin moving through the questions and ask participants to hold up their votes.
- b. The facilitator may want to briefly review the color-coded cards.
- c. After participants hold up their cards, read aloud the vote e.g. 5 yes, 7 high partially, 3 low partially. The vote will be determined by a majority vote.

### **Step #3 Further Discussion, if appropriate**

In the event there are diametrically opposed answers or people strongly feel the need for discussion, the facilitator asks if the group would like more discussion. Each person wishing to speak will raise their pink card and be given one minute to share their thoughts. Ask if the group would like to have a re-vote. The facilitator has the authority to determine when discussion needs to end to keep the group moving.

A useful question to draw the answers closer together is: “For those of you who scored the activity low, could you talk about why you scored it low? I will ask the same questions for those who scored it high”. As an alternative you can also ask the low scores why they didn’t score higher and the high scores why they didn’t score lower. Also refer people back to the voting guide.

#### **Keeping In Mind:**

- Encourage voting without discussion on the assessment questions.
- Emphasize similarities and points of agreement
- Point out relevant information in the discussion and how it pertains to the Model Standard
- Ask participants if they learned anything new about activities the system is performing
- Keep track of time!

After further discussion, take another vote.

Work through all the questions in the first indicator. Move on to the next indicator until you have completed the entire standard.

#### **# 4 Take Away Messages**

At the end of the voting all questions review the take away messages that have come up during initial and further discussions. Fill in any new information using the framework of strengths of the LPHS for this essential service, weaknesses of the LPHS for this essential service, recommendations for immediate improvements of the LPHS for this essential service and any priorities of the LPHS for this essential service.
