INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, AUGUST 18, 2000 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL V

## CURRENT SITUATION:

Nineteen new large fires were reported, including seven in the Southern Area and three each in the Southwest and Eastern Great Basin Areas. Containment was reached on nine fires in six geographic areas. Lightning in the Northern Rockies, Eastern Great Basin, Northern California and Southern Areas caused initial attack activity to be moderate to heavy. Winds gusting to 35 mph are forecast in parts of Idaho, Montana, Oregon, California, and Nevada today, which will challenge firelines on the large fires in those areas. The National Interagency Coordination Center continues to process numerous orders for aircraft, crews, equipment and overhead. Twelve more firefighters from Australia have arrived in Missoula to join incident management teams. Very high to extreme fire indices have been reported in all 11 western states and in Texas.

NORTHERN ROCKIES AREA LARGE FIRES:
An Area Command Team (Edrington) is assigned to manage the large fires in the Hamilton area. An Area Command Team (Mann) is assigned to manage the large fires in southwest Montana. An Area Command Team (Meuchel) is assigned to manage the large fires in central Montana. A Type I Incident Management Team (Wands) is assigned to manage the large fires in northwest Montana. Priorities are being established by the Northern Rockies MultiAgency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BLODGETT TRAILHEAD, Bitterroot National Forest. A Type I Incident Management Team (Gage) is assigned. This fire is three miles northwest of Hamilton, MT. An inversion and smoke lasted through the day in lower elevations, keeping fire activity low. Approximately 600 structures are still threatened.

VALLEY COMPLEX, Bitterroot National Forest. A Type I Incident Management Team (Frye) is assigned. These fires are seven miles south of Darby, MT. The complex consists of the Bear, Coyote, Taylor, Taylor Spit, Hilltop, Razor and Fat fires. Crews are providing initial attack on new fires in the West Fork area. Other actions are focused on structure protection for the approximately 900 homes that are threatened.

SKALKAHO COMPLEX, Bitterroot National Forest. A Type I Incident Management Team (Myers) is assigned. This is the northern portion of the Valley Complex. The fires are ten miles southeast of Hamilton, MT. Inversion and smoke is limiting fire activity to intermittent portions of the fireline. Crews are continuing patrol of firelines and performing structure protection in Skalkaho, Sleeping Child, Little Sleeping Child and the east side of Old Darby Road.

WILDERNESS COMPLEX, Bitterroot National Forest. A Type II Incident Management Team (Cook) is assigned. The complex consists of 20 fires in the Selway-Bitterroot and Frank Church River of No Return Wildernesses, 40
miles southwest of Hamilton, MT. A heavy inversion slowed fire growth until afternoon. Firefighters were able to execute a burnout operation along the Selway River near the Thirty fire, to prevent the fire from jumping the river later in the day.

UPPER NINEMILE COMPLEX, Lolo National Forest. A Type I Incident Management Team (Bennett) is assigned. The Army's 20th Engineers Battalion from Ft. Hood, Texas, commanded by LTC Shumway, is assigned. These fires are burning 25 miles northwest of Missoula, MT. Firelines have been completed on the Nemote fire and have held throughout the burning period.

RYAN GULCH, Southwestern Land Office, Montana Department of Natural Resources and Conservation. A Type I Incident Management Team (Melton) is assigned. This fire is 15 miles east of Clinton, MT. Crews are making good progress constructing fireline around slopovers on the northwest and northeast corners of the fire. A burnout operation on the northeast part of the fire is underway.

THOMPSON FLAT COMPLEX, Lolo National Forest. A Type II Incident Management Team (Hoff) is assigned. This is a complex of six fires in the vicinity of Superior, MT. Both the Thompson and the Landowner fires have become active. The southern perimeter of the Landowner fire burned over the Landowner Mountain Lookout and a nearby historic cabin. Several spot fires have been reported across Trout Creek. Crews and equipment were pulled off the fireline into safety zones.

CLEAR CREEK DIVIDE COMPLEX, Flathead Agency, BIA. A Type I Incident Management Team (MacGregor) is assigned. This complex, 60 miles northwest of Missoula, consists of the Clear Creek, Vanderburg, Siegel and Magpie fires. Helicopter bucket work is supporting direct and indirect attack on the east side of the Vanderburg fire. Communities along Highway 200 continue to be threatened. Heavy smoke is limiting visibility and aircraft use.

MONTURE/SPREAD RIDGE, Lolo National Forest. A Type I Incident Management Team (Waterbury) is assigned. The fires are 15 miles east of Seeley Lake, MT. Islands of unburned fuel within the fire perimeter are burning out. The Spread fire has backed down to a portion of a previously established fireline, where it is currently holding.

CROOKED, Clearwater National Forest. A Type I Incident Management Team (Hefner) is assigned. The fire is 50 miles southwest of Missoula, MT, near Lolo Pass. Upslope runs and individual torching has been observed, but the fire is holding within containment lines.

SCHLEY, Flathead Agency, BIA. This human-caused fire was started on 8/15 near the town of Evaro, MT. Crews are making good progress on fireline construction and building a helispot.

MAUDLOW/TOSTON, Central Land Office, Montana Department of Natural Resources and Conservation. These fires are 25 miles north of Belgrade, MT. Approximately 20 ranches have been evacuated from Maudlow through three miles south. Extreme fire behavior has been observed. The current threat is to Blacktail subdivision and isolated ranch structures.

Incident Management Team (Carvelho) is assigned. The complex consists of the Falls Creek, Cougar Creek/Coyote Springs, Skalkaho Pass, Lick Creek and Copper Creek fires, 30 miles southwest of Philipsburg, MT. The Cougar fire has spotted south of the Medicine Lake fire. Valleys continue to fill with smoke, limiting air operations.

MUSSIGBROD COMPLEX, Beaverhead-Deerlodge National Forest. A Type II Incident Management Team (Swope) is assigned. This complex includes the Mussigbrod and Maynard fires, which are 12 miles northwest of Wisdom, MT. Strong winds have caused active burning on both fires. Multiple tree torching and spotting across the east fork of the Bitterroot River have occurred.

JUDITH COMPLEX, Lewis and Clark National Forest. This complex consists of the Studhorse, Lost Fork and High Springs fires, which are 25 miles southwest of Stanford, MT. Threatened resources include timber, a watershed and endangered species habitat. No new information was received.

BOULDER COMPLEX, Central Land Office, Montana Department of Natural Resources and Conservation. A Type I Incident Management Team (Humphrey) is assigned. This complex, three miles northeast of Basin, MT, consists of the Boulder Hill and High Ore Road fires. Fire activity has been minimal. Mopup of hot spots continues. BURNT FLATS, Clearwater area, Idaho State Department of Lands. A Type II Incident Management Team (Ostman) is assigned. The fire is three miles from Whitebird, ID. Heavy smoke and an inversion have made conditions too hazardous for crews to scout or construct fireline. Burnout operations are continuing slowly along the Free Use Road. The inversion has also slowed fire movement.

BEAVER CREEK, Gallatin National Forest. A Type II Incident Management Team (Duke) is assigned. This fire is south of Big Sky, MT. Crews attempting to complete anchoring the south end of the fire to Boat Mountain had to be removed from the fireline due to increased fire behavior. The fire has been actively burning in the Cub Creek drainage and spotting to the east.

STONE YOUNG, Kootenai National Forest. A Type II Incident Management Team (Colla) is assigned. The complex consists of the Young, Lydia, Stone Hill and Cliff Point fires near Eureka, MT. Firelines are being constructed on three of the fires. Some spotting continues to occur outside the firelines but so far they have all been contained.

KOOTENAI COMPLEX, Kootenai National Forest. A Type II Incident Management Team (Cowin) is assigned. This complex consists of 34 fires that are 20 miles northwest of Libby, MT. Another 13 fires have now been staffed. Structural protection and evacuation planning are being handled by the county fire warden and the sheriff's office. A new fire has been located one mile south of the Canadian border and Canadian firefighters are initial attacking it.

TROY SOUTH, Kootenai National Forest. A Type II Incident Management Team (Berndt) is assigned. This complex of 41 fires is near Troy, MT. Five of the fires are high priority due to threats to a municipal watershed and structures in the city of Troy. An inversion lifted in midafternoon and fire activity increased. A structure defense plan for 800 residences and 900 outbuildings is nearing completion.

ELK MOUNTAIN, Northwestern Land Office, Montana Department of Natural Resources and Conservation. A Type II Incident Management Team (Gauger) is assigned. This fire is 30 miles east of Libby, MT. Crews are patrolling and holding existing fireline. Known spots on the east side of the fire have been contained.

NORTHWEST LAND OFFICE (NWLO) IA COMPLEX, Northwestern Land Office, Montana Department of Natural Resources and Conservation. These fires are all within 45 miles of Kalispell, MT. There are ten active fires in this complex. Efforts to secure the fireline on the Bald Hill fire have been effective.

CHIPMUNK, Flathead National Forest. The fire is burning in spruce, subalpine fir and brush 45 miles southeast of Kalispell, MT. Helicopters did bucket drops on hot spots on the east flank of the fire. Structure protection planning is underway. Strategic points are being mapped.

GREEN MOUNTAIN, Kootenai National Forest. This fire started on 8/11, five miles southeast of Noxon, MT. No new information was received.

MALONEY CREEK, Clearwater Area, Idaho State Department of Lands. A Type II Incident Management Team (Specht) is assigned. This fire is 12 miles southeast of Craigmont, ID. Crews have completed fireline into Frenchy Creek, tying into rock bluffs above the Snake River. A slopover on Wapshilla Ridge has been contained. Burnout operations are continuing along the ridge.

THREE BEARS, Nez Perce National Forest. A Type II Incident Management Team (Cones) is assigned. This fire is on both sides of the Salmon River, 29 miles from Elk City, ID. The fire continues to be active, pushed by southwest winds. A burnout operation is underway to keep the fire within the wilderness on the east side of Bargamin Creek. Site protection measures are complete at Arctic Creek, Mallard Creek, Cook Ranch and Whitewater.

CANYON FERRY COMPLEX, Helena National Forest. This complex, located 12 miles north of Helena, MT, consists of the Bucksnort and Cave Gulch fires. Fuels within the perimeter have been burning actively throughout the day. Some unburned fuel still exists near the fireline in two divisions.

NOSEBAG 22, Idaho Panhandle National Forest. This fire is eight miles northeast of Hope, ID. The fire is burning in subalpine fir, spruce, brush and grass. Numerous forest roads and trails have been closed to public access. Threatened resources include timber and a U.S. Forest Service lookout.

SPRUCE COMPLEX, Yellowstone National Park. This is a complex of 11 fires in Yellowstone National Park. The Glade fire has moved into Yellowstone Park and is threatening the south entrance station. Structural protection measures are being implemented at both the south and east entrances to the park. One new fire has been added to the complex. Four of the fires in the complex remain unstaffed.

NORTHWEST PEAKS COMPLEX, Idaho Panhandle National Forest. The fires are burning in subalpine fir and spruce seven miles southeast of Eastport, ID. Single and multiple group torching and good column development have been
noted. Fuels are continuous from the fire north to the Canadian border. Threatened resources include wildlife habitat, timber production and scenic areas.

MCDONALD II, Lewis and Clark National Forest. The fire is 36 miles southwest of Choteau, MT. No new information was received.

HIDDEN CREEK, Clearwater National Forest. The fire is 12 miles southeast of Powell, ID. The fire is being monitored by US Forest Service personnel.

HELEN CREEK, Flathead National Forest. This fire is 22 miles south of Spotted Bear, MT. The Lewis Creek II fire has burned into this fire. Structure protection actions are being taken at Black Bear Cabin and Pack Bridge. This will be the last report until significant activity occurs.

FROG LAKE, Clearwater National Forest. The fire is 16 miles southeast of Powell, ID. The fire is being monitored by US Forest Service personnel.

ELIZABETH, Clearwater National Forest. The fire is 33 miles northeast of Pierce, ID. The fire is being monitored by US Forest Service personnel.

SNOW CREEK, Clearwater National Forest. The fire is 30 miles northeast of Pierce, ID. The fire is being monitored by US Forest Service personnel.

## EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

TRAIL CREEK, Boise National Forest. A Type II Incident Management Team is enroute. This fire is five miles south of Atlanta, ID. The fire has made significant runs, doubling in size and spotting up to a mile ahead of the main fire. Currently threatened is the town of Atlanta, ID, forcing evacuation efforts to be put in place. Strong winds and low relative humidity are forecast.

GLADE, Grand Teton National Park. This lightning-caused fire is 12 miles north of Colter Bay, WY. Evacuation of the Flagg Ranch Lodge, campground and residences has been completed. Spotting has occurred 1/4 to 1/2 mile ahead of the main fire. US Hwy 89 has been closed from Lizard Creek Campground to Grant Village in Yellowstone in anticipation of the fire crossing the road.

RANKIN, Salmon-Challis National Forest. A Type I Incident Management Team (Stam) is assigned. This fire is 40 miles west of Challis, ID. Extremely dry fuels and low humidity continue to hamper control efforts. The main suppression effort has been to hold the numerous spot fires on the east side of Yankee Fork. This fire is threatening the Challis watershed and the community of Challis.

DRY FORK II, Vernal Field Office, BLM. The fire is burning in pinyon pine, juniper, aspen, fir and lodgepole pine 20 miles northwest of Vernal, UT. Fire activity continues on the northeast portion of the fire.

SWAINS, South Central State of Utah. A Type II Incident Management Team (Burdick) is assigned. This human-caused fire is burning east of Holden, UT.

NICK, Payette National Forest. A Type II Incident Management Team (Saleen) is assigned. This fire is burning in subalpine fir 12 miles east of McCall, ID. An inversion with heavy smoke has prevented air operations in the morning. Structural protection plans and zones have been developed for the area.

BOULDER, Bridger-Teton National Forest. A Type II Incident Management Team (Zimmerman) is assigned. This fire is 15 miles east of Jackson, WY, in the Gros Ventre Wilderness. Good progress has been made on containing the fire east of Little Granite Creek. Weather conditions are causing holding problems with active burning and torching being observed.

CLEAR CREEK, Salmon-Challis National Forest. A Type I Incident Management Team (Hart) is assigned. A Type I Incident Management Team (Hutchinson) has been assigned to transition with Hart's team. The fire is 12 miles west of Salmon, ID. The 3rd Battalion 5th Marines from Camp Pendleton, California, commanded by Col. Callihan, is assigned. Structure protection plans are in place for the communities and towns of Salmon, Gibbonsville, North Fork, Cobalt and Shoup. Poor visibility continues to be a problem with air operations over the fire.

BURGDORF JUNCTION, Payette National Forest. A Type I Incident Management Team (Dague) is assigned. The 3rd Battalion 16th Field Artillery from Ft. Hood, Texas, commanded by LTC Darryl Williams, is assigned. The fire is 23 miles north of McCall, ID. Suppression and holding efforts have been successful. An inversion over the fire for most of the day reduced fire activity.

ELK VALLEY, Caribou National Forest. This lightning-caused fire is 20 miles northeast of Montpelier, ID. Crews are making excellent progress toward containment.

BLIND, Bridger-Teton National Forest. The fire is southeast of Alpine, WY. Fire growth to the north and northeast is a concern because of the populated areas of Bryan Flats and Bondurant. Weather conditions encourage continued fire growth.

FONTENELLE, Bridger-Teton National Forest. This lightning-caused fire is northeast of Cokeville, WY. Extreme fire behavior has been observed due to dry fuels and windy conditions. Multiple natural gas wells are at risk.

MARLIN SPRINGS, Salmon-Challis National Forest. A Type II Incident Management Team has been ordered. No other information was received.

DIAMOND PEAK, Payette National Forest. This lightning-caused fire is 42 miles northeast of McCall, ID. Due to an inversion and light winds the fire behavior has moderated.

HALF MOON COMPLEX, Bridger-Teton National Forest. This complex consists of the Half Moon and the Triangle Lake fires. A Type II Incident Management Team (Carr) is assigned. This complex is near Pinedale, WY. The Triangle Lake fire is in monitor status due to the steep, inaccessible terrain.

MORSE, Salmon-Challis National Forest. A Type II Incident Management Team (Suwyn) is assigned. The fire is burning in grass, sagebrush and douglas fir 12 miles southeast of Ellis, ID. Heavy smoke in the valleys and mountains prevented full assessment of the fire.

MORAN, Grand Teton National Park. This fire is burning in the Teton Range, west of Jackson Lake at Moran Canyon. The fire is burning with great intensity in extremely heavy fuels with spotting up to $1 / 4 \mathrm{mile}$.

ENOS, Bridger-Teton National Forest. A Type II Incident Management Team (Zimmerman) is assigned. This fire is burning in the Teton Wilderness 33 miles northeast of Jackson, WY. The Teton Wilderness has been closed. Fire activity has slowed due to cooler temperatures and cloud cover.

CAMAS, Upper Snake River District. The fire is located four miles west of Hamer, ID. Strong winds and dry fuels of sagebrush and grass are hampering containment efforts.

WILCOX, Grand Teton National Park. The fire is five miles northwest of Colter Bay, WY. Extreme fire behavior with runs, torching and spotting are being observed. The fire is being monitored by aircraft.

HETCHMAN, Targhee National Forest. The fire is 30 miles east of Ashton, ID. It is actively burning in the Jedediah Smith Wilderness Area.

FLOSSIE COMPLEX, Payette National Forest. This fire is 50 miles northeast of McCall, ID. The fire area is under an inversion which is preventing monitoring.

SCF Wilderness, Salmon-Challis National Forest. This complex is made up of the North Fork Wilderness Complex and the South Zone Wilderness. The fires continue to grow due to winds, steep slopes and low humidity.

FLOSSIE COMPLEX, Payette National Forest. This fire is 50 miles northeast of McCall, ID. The fire area is under inversion all day which is preventing monitoring.

INDIAN/PROSPECT, Payette National Forest. The fire is 33 miles east of McCall, ID. This fire is being monitored by periodic reconnaissance flights.

SOUTH SHELLROCK, Payette National Forest. The fire is burning in the Frank Church River of No Return Wilderness Area 55 miles east of McCall, ID. It is currently being monitored from the air.

NORTH SHELLROCK, Payette National Forest. The fire is 55 miles east of McCall, ID. The fire has not been very active due to inversion during the day.

CHOURNOS, Northwest Utah State. This fire is 30 miles west of Ogden, UT. No new information was reported.

IFD = Upper Snake River District, Eastern Idaho Area

WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

WEST BASIN, Elko Field Office, BLM. This lightning-caused fire is located 12 miles east of Jackpot, NV approximately $1 / 2$ mile from the Choke Cherry fire. It is burning on both sides of the Idaho/Nevada border on both BLM land and the Sawtooth National Forest.

CHERRY, Ely Field Office, BLM. This fire is 30 miles northwest of Ely, NV. Steep, rugged terrain and rolling materials continue to impede containment efforts. Wildlife habitat and the Goshute Wilderness Study Area remain threatened.

PARSNIP, Ely Field Office, BLM. This fire is burning in sagebrush, dense pinyon pine and juniper 30 miles northeast of Caliente, NV in a wilderness study area. The fire received light precipitation and it continues to be monitored.

PHILLIPS RANCH, Humboldt-Toiyabe National Forest. The fire is 50 miles southeast of Ely, NV. National Park Service personnel are monitoring the fire as it continues to creep and smolder. Light precipitation was received again today.

LITTLE WATER, Humboldt National Forest. This fire is 60 miles southeast of Elko, NV. Limited fire activity has been observed as the fire continues to creep in white fir, isolated pinyon pine and mountain mahogany. Current threats are to summer and winter wildlife habitat and sensitive plant species.

MAMMOTH, Humboldt-Toiyabe National Forest. The fire is burning in white fir and pinyon pine 75 miles southwest of Ely, NV. It started on 8/2 in
the Grant Range Wilderness Area. Limited fire activity has been observed due to precipitation received.

ROCKY MOUNTAIN AREA LARGE FIRES:
PAHASKA COMPLEX, Shoshone National Forest. This lightning-caused fire is burning in old growth timber 50 miles west of Cody, WY. A Type II Incident Management Team (Sisk) has been ordered. Numerous structures are threatened.

ENACMPMENT COMPLEX, Rawlins District, BLM. A Type II Incident Management Team (Hartman) is assigned. This complex consists of the Blackhall and the Hell's Canyon fires. No other information was received.

KATE'S BASIN COMPLEX, Wind River Agency, BIA. A Type I Incident Management Team (Stutler) is assigned. This complex includes the Kate's Basin and the Blondie \#2 fires, eight miles southwest of Thermopolis, WY. Burnout operations are progressing on the southwest flank of the fire.

FLAGPOLE MOUNTAIN, South Dakota State Forestry. A Type II Incident Management Team (Gardner) is assigned. This fire is near the town of Hot Springs, SD. Good mopup progress is being made on all divisions with the fire mostly creeping and smoldering.

BURRO FLATS, Shoshone National Forest. The fire is 12 miles south of Dubois, WY. It is burning in the Fitzpatrick Wilderness at high elevations. Continued mopup and suppression near islands of unburned fuel is occurring to ensure public safety. The fire has been held in check with hose lays and water drops.

WOODS CANYON, Custer Dispatch Center Counties. The fire is ten miles northwest of Hulett, WY. Timber and grazing allotments are threatened.

NORTHWEST AREA LARGE FIRES:
MILEPOST 244, Umatilla National Forest. A Type II Incident Management Team (Jackson) is assigned. The fire is burning in grass, brush and timber five miles southeast of Gibbon, OR. Fire activity increased after an inversion lifted. Spot fires have ignited across the fireline.

FLAT CREEK, Wenatchee National Forest. This lightning-caused fire is 18 miles northwest of Stehekin, WA, in the Glacier Peak Wilderness. Monitoring by agency personnel from a viewpoint and by helicopter continues.

## NORTHERN CALIFORNIA AREA LARGE FIRES:

STORRI, Plumas National Forest. A Type I Incident Management Team (Vail) is assigned. The fire is 20 miles west of Quincy, CA in the Feather River Canyon. The fire is burning in steep terrain with numerous cliffs and canyons. Rolling rock and debris are hampering access. Approximately 46 structures are threatened along Highway 70, along with Pacific Gas \& Electric facilities in the area. The fire has made major runs upslope to the ridge and laterally up the canyon, pushed by strong winds.

HIGHWAY, Fresno-Kings Ranger Unit, California Department of Forestry. This human-caused fire is 28 miles northeast of Fresno, CA. No new information was reported. This will be the last report unless new information is received.

## SOUTHWEST AREA LARGE FIRES:

WILSON MOUNTAIN, Coconino National Forest. A Type II Incident Management Team (Joki) has been ordered. The fire is three miles northeast of Sedona, AZ. The fire is burning in pine, brush and manzanita fuels and being driven by winds.

DRAGON, Grand Canyon National Park. The fire is six miles west of the North Rim developed area. The fire has made significant runs below the rim of the Grand Canyon, pushed by winds up to 25 mph . Short range spotting and multi- tree torching fire behavior have been noted. The Point Sublime Road has been closed.

PEAK, Tonto National Forest. The fire is burning in dense brush and steep terrain six miles south of Globe, AZ. The fire has been active in the Bobtail Ridge area. Steep terrain and heavy fuel loading are slowing containment efforts.

NORTH, Tonto National Forest. This lightning-caused fire is six miles southwest of Payson, $A Z$. It is burning in ponderosa pine in the Mazatzal Wilderness. The fire is being monitored by U.S. Forest Service personnel.

RATTLESNAKE, Prescott National Forest. The fire was ignited on 8/7 near Black Canyon City, AZ. The fire is burning in a canyon with limited access in the Castle Creek Wilderness. The fire is being monitored by USFS personnel.

SOUTHERN AREA LARGE FIRES:

HANNER HILL, Texas State Forest Service. This fire is burning in heavy
oak, cedar and mesquite 20 miles east of Abilene, TX.
MERRITT ISLAND NWR, U.S. Fish and Wildlife Service. The fire is 15 miles southeast of Titusville, FL. Ash and smoke are interfering with NASA facilities at Cape Kennedy. Helicopter drops are being used to help alleviate the problem.

NINA COMMAND, Florida State Division of Forestry. This is a complex of three lightning-caused fires located in Brevard County. No other information was received.

PAKO, Florida State Division of Forestry. This fire is located near Miramar, FL. Burning out operations by the crews continue along with the suppression efforts.

PINTO COMMAND, Florida State Division of Forestry. No new information was received.

HUBBARD, Texas State Forest Service. The fire is burning in oak, cedar and mesquite 30 miles north of Waco, TX. Low humidity and rough terrain are hampering containment efforts. The Texas Army National Guard has assisted suppression efforts by dropping over 22,000 gallons of water from their Chinook helicopters.

GONZALES RIVER, Texas State Forest Service. This fire is located 60 miles northeast of Abilene, TX. It is burning juniper, oak and mesquite fuels in very rough terrain.

JARRELL II, Texas State Forest Service. The fire is located 45 miles north of Austin, TX. Texas Army National Guard Blackhawks are assisting with suppression efforts on the fire, which is burning in pinyon pine and juniper. Containment is being deterred by 60 foot flame lengths.

## OUTLOOK:

```
*** A FIRE WEATHER WATCH IS POSTED IN EASTERN MONTANA FOR DRY
LIGHTNING ***
```

*** A FIRE WEATHER WATCH IS POSTED IN SOUTHWEST IDAHO AND SOUTHEAST OREGON

FOR STRONG WINDS AND LOW HUMIDITIES ***
*** A FIRE WEATHER WATCH IS POSTED IN SOUTHEAST IDAHO FOR STRONG WINDS AND HIGH HAINES INDICES ***
*** A FIRE WEATHER WATCH IS POSTED IN CENTRAL MONTANA FOR GUSTY WEST WINDS ***

```
*** A FIRE WEATHER WATCH IS POSTED IN EAST CENTRAL CALIFORNIA AND WESTERN
NEVADA FOR STRONG RIDGETOP WINDS AND LOW HUMIDITIES ***
```

*** A FIRE WEATHER WATCH IS POSTED IN NORTHEAST CALIFORNIA, NORTHERN NEVADA AND WEST CENTRAL NEVADA FOR GUSTY WINDS AND LOW RELATIVE HUMIDITIES ***

A dry southwest flow aloft will prevail over the Pacific Northwest and western Great Basin. An approaching trough will increase the winds in this area, hence a number of fire weather watches have been issued. Wind gusts to 35 mph will be possible, primarily on ridgetops. Dry lightning is forecast in eastern Montana. Further south, monsoon moisture will continue to bring a chance of wet thunderstorms to Utah, Colorado, Arizona, New Mexico and Wyoming. Winds in the southwestern United States will be lighter.

High temperatures will range from the mid 70's to the mid 90's in most areas and up to 110 in the deserts of western Utah, northern Arizona and southern Nevada. Up to 115 degree temperatures will occur across the deserts of southern California and southwest Arizona. Afternoon relative humidities will be in the single digits and teens in most areas, except in the 20's in the southwest states.

A fire weather watch is posted in the Florida panhandle for low relative humidities.
