This data set consists of one, 8 mm tape. The FITS files are written to tape using TAR on a SUN/SPARC workstation operating under UNIX with X-windows. The FITS headers are written in ASCII and the data are in binary form. The TAR listing, stating the size, name of the files, and the generation date of each file within each of the 30 TAR files is included on the following pages. A sample of the FITS header from the first file has been printed for convenience. The C tape is on a 4 mm tape written in the same format. The D and C numbers, along with the number of files follows:

D#	C#	Files
D-101560	C-031021	30 TAR Files
		32 Data files within each TAR file
