

OFFICE MEMORANDUM • STANFORD UNIVERSITY

2

DATE: July 6, 1960

To : File

FROM :

SUBJECT: Call from John Howard, Air Force Cambridge Research Center, L.G. Hanscomb Field, Bedford, Massachusetts

General Flickinger had been in touch with him in regard to IR studies. They have supported Sinton's earlier work and are now in close touch with Strong at Johns Hopkins and others. They are now continuing unclassified studies some of which already begun from Edwards Air Force Base involving U-2 flights carrying IR equipment. So far, most of the investigations have been over desert terrain and they do not report possible differences. Dr. Gehring from OSU was also experienced in this area and proposed visit to Stanford to discuss some future programs. Appointment set up for the morning of Tuesday July 19th and he is quite amenable to participation by Calvin, Johnson and other possibly interested parties.

I should ask Mike Villard if he would also be interested in this.

Howard, J.
