#### Summary of Changes

Clarifies how program reporting categories fit into the apportionment process (section <u>121.2</u>).

Requires conventions in using footnote indicators beginning with all FY 2009 apportionments (section 121.12).

#### 121.1 How is the apportionment (SF 132) organized?

The apportionment (SF 132) contains two general sections: **Budgetary Resources** and **Application of Budgetary Resources**. Under Budgetary Resources, you display the sources of actual and anticipated resources as well as actual and anticipated reductions to those resources. Under the Application of Budgetary Resources, you display how you intend to use those resources, whether by fiscal quarter, activity, project, object, or a combination thereof.

The apportionment is divided into four columns:

- Amount on Latest Apportionment
  - ▶ *Initial apportionment requests.* Leave the column blank. See exhibits <u>121E</u>, and <u>121F</u>, and <u>121H</u> for examples of an annual appropriation, a no-year appropriation, and appropriations provided by a continuing resolution.
  - Reapportionment requests. Include the amounts in the "Action by OMB" column of the previously approved apportionment. Unless OMB determines otherwise, when amounts are automatically apportioned (as specified in section 123.5, section 120.36 or section 120.37) and there is a subsequent need for reapportionment, reflect adjustments previously made as automatic apportionments in the "Amount on Latest SF 132" column. Footnote the changes made as automatic apportionments. See exhibits 121G, 121J, 121K, 121M, and 121L for examples of *reapportionments*.
- Agency Request—Include amounts in the column for each applicable line. Report the detailed information on each line of the form as explained below.
- Action by OMB— When you validate your request, the web apportionment system places formulas in the OMB Action column to set it equal to the Agency Request column. OMB will adjust the OMB Action values as necessary when reviewing your request.
- Memo obligations (YYYY-MM-DD). Include memorandum obligations in this column. Also include the date of the obligations using the YYYY-MM-DD format.

Apportionment (SF 132) line numbers are shown on exhibit <u>121A</u>. <u>Appendix F</u> includes descriptions of the items that you must include on each line (e.g., line 8C, apportioned for future fiscal years).

Usually, lines for reporting actual amounts will apply only to reapportionment requests. Unless more recent figures are available, verify that all amounts agree with the most recent SF 133. Include a footnote on the SF 132) to indicate the period covered by the actual amounts reported on the form.

#### 121.2 How do program reporting categories fit into the apportionment process?

Agencies and OMB use the apportionment process to identify those program reporting categories that agencies will report obligations against in their SF 133 reports. (As noted in section 120.3, not every TAFS uses program reporting categories.) The program reporting categories are <u>not</u> used to apportion funds, are not subject to the Antideficiency Act, and are not presented on the actual apportionment form itself. The program reporting categories are included as an attachment to the apportionment. The program categories tab includes a column titled, "Projected, Annual Obligations". Agencies should check with their examining divisions to see whether they need to fill in this column. Agencies should note that the total anticipated obligations do not need to add to the total amounts on the apportioned lines. Do not use program reporting categories for a Category B project. Finally, you may sometimes use program categories for one Category B project but not use program categories for a different Category B project.

Guidance in past issuances of Circular A-11 required agencies to use All Other categories. For instance, you may have used two categories, one for Air, the other for Water. The past guidance said you had to use an All Other category, as well. You may optionally use an All Other category, but you are no longer required to do so. See Exhibit <u>121C</u> for a sample format of program reporting categories. This exhibit uses the optional All Other Categories and is consistent with the apportionment information in Exhibits 121F and 121B.

# 121.3 Why does OMB send the names of program reporting categories and Category B projects to Treasury for use in FACTS II?

OMB sends program reporting categories from approved apportionment attachments to the Department of the Treasury's Financial Management Service (FMS), which operates the FACTS II system that agencies use to report their SF 133 budget execution information. When reporting their obligations, FACTS II provides agencies with the list of program reporting categories to report upon; these are the same categories that OMB provides from the apportionment attachments.

For those TAFSs that use Category B projects but do not use program reporting categories, OMB sends FMS the list of Category B projects for use in FACTS II reporting.

OMB sends this information to FMS so OMB can use automated tools to align program reporting categories and Category B projects on the apportionments to the budget execution reports. Prior to this change, OMB was unable to create automated reports that show apportioned amounts (from the SF 132) and obligations (from the SF 133) by program reporting category or Category B project. The reason is that the SF 132s and SF 133s used slightly different names for the Category B projects, so it was impossible to use a computer program to line up the projects by name.

# 121.4 Can agencies add new program reporting categories or Category B projects when reporting their FACTS II data?

Yes, but only when it makes sense to do so. Here are some examples.

First, you must report all obligations that took place during the reporting period. If FACTS II does not provide you with a comprehensive list of program reporting categories or Category B projects to report all your obligations, you must add more categories or projects to report your obligations against.

Second, if you are aware that OMB has apportioned funds using Category B projects that are not presented in FACTS II, then you must add the missing Category B projects names, and report your obligations for those projects.

Third, if you are aware that OMB has used program reporting categories that are not presented in FACTS II, then you should add the missing program reporting category names, and report the obligations for those categories.

# 121.5 What apportionment formats are available, and what information must I include in these formats?

Unless OMB approves otherwise, all agencies must prepare apportionment requests using OMB's secure web-based apportionment application system. The system allows you to easily create apportionment requests using either an expanded (SF 132) or condensed (letter) format. The following exhibits show what these formats look like:

- Exhibit 121A shows the Expanded (SF 132) format including credit-only rows.
- Exhibit 121D shows the Expanded (SF 132) format.
- Exhibit 121B shows the Condensed (letter) format.

Here are links to information on the apportionment application and the apportionment application user guide:

#### Apportionment application

Apportionment application user guide

All formats ask you to provide a variety of information. Some, but not all, of the information required is shown below:

The <u>fiscal year</u> being apportioned.

The <u>Treasury Appropriation Fund Symbol</u> (TAFS) being apportioned, and the titles for the TAFS, bureau, and agency.

The SF 132 line number; see Appendix F.

The <u>SF 132 line number split</u>. You can use the line split to distinguish between two or more amounts that are reported on a single line. For example, you may use line number split to distinguish between two or more sources of collections. You may <u>not</u> use line number splits for apportioned amount lines.

The <u>SF 132 line stub</u> is used for all lines on the SF 132 apportionment. For letter apportionments, you must use the line stub on apportioned lines.

All applicable amounts, e.g., the amount on the latest SF 132, the agency request, and the action by OMB.

For either format, all amounts must be rounded to the nearest dollars; do not use cents. Do <u>not</u> round to thousands. Do not use dollar signs.

#### 121.6 Will all apportioned amounts be shown on the expanded or condensed formats?

No. At times, OMB will approve apportionments when the amounts are not known at the time the apportionment is prepared. Common examples are:

- When OMB issues an OMB Bulletin automatically apportioning amounts made available by a continuing resolution (see section <u>123.6</u>). Because amounts apportioned under continuing resolutions are for relatively short periods and are derived by formula, the formats described in section <u>121.5</u> are not used. If you or OMB determines that your program or account should be apportioned separately during a continuing resolution because you need an amount different than the automatic apportionment, you should use one of the formats described in section <u>121.5</u>.
- *Adjustments permitted by section* <u>120.38</u>. Adjustments of specified apportioned amounts are permitted without the submission of a reapportionment request.
- *Adjustments permitted in writing by OMB* (section <u>120.39</u>). OMB may include in an apportionment a statement that, to the extent provided in law, allows actual unobligated balances, actual recoveries, or actual earned reimbursements to be available without further OMB action. This is an expansion of the type of adjustment permitted by section 120.38.

Reapportionment requests submitted through the year should include the amounts automatically apportioned in the columns entitled "Amount on Latest SF 132" and "Agency Request."

#### 121.7 What format do I use to show program reporting categories?

If the agency and OMB decide to use program reporting categories, you must include a worksheet, named Pgm\_Cat, to show the program reporting categories. **The name of the worksheet must be Pgm\_Cat**, **and cannot be changed.** You do not need to include a Pgm\_Cat worksheet if you are not using program reporting categories.

The program reporting categories worksheet includes columns for the Treasury agency, Treasury account, first year of availability (FY1), second year of availability (FY2), SF 132 Line, and Report Cat No. When you fill out all of these columns, OMB will send those rows with a reporting category from 1–98 to FMS for use in FACTS II reporting. You may include rows that OMB will not send to FMS. For example, you may find it helpful to have rows with sub-totals. For any sub-total row, you must blank out the Treasury agency, Treasury account, first year of availability (FY1), second year of availability (FY2), SF 132 Line, and Report Cat No.

When completing the program reporting categories worksheet for Category A apportionments, you should include one row for each reporting category, rather than one row for each quarter. For example, if you have two reporting categories for Category A obligations, one for salaries, the second for all other, then the program reporting categories worksheet would only include two rows; the worksheet should not include separate rows that correspond to each quarter.

The expanded (SF 132) and condensed (letter) apportionment templates available from OMB's web page include the Pgm\_Cat worksheet. Instructions on how to prepare this worksheet can be found on OMB's web site.

### 121.8 Why do I need to report information on transfer appropriation (allocation) accounts in my apportionment request?

Since FY 2004, OMB has sent Category B project and program reporting category stubs from approved apportionments to FACTS II, and since FY 2005 OMB has sent BEA category information from the apportionments to FACTS II. Sending this information to FACTS II makes it easier for agency staff to respond to the FACTS II reporting requirements.

Unless OMB requests otherwise, for allocation transfers, A–11 instructs agencies administering the parent appropriation to submit a single, consolidated apportionment request that encompasses the parent TAFS and all allocation accounts. (In a limited number of cases, OMB also apportions the allocations.) When submitting consolidated apportionment requests, you must provide a list of the allocations. This information will enable OMB to send stubs and BEA information to FACTS II for the allocation accounts, rather than just the parent accounts.

If you have an apportionment that includes allocations, you must include a worksheet, named Allocations, to show the required information. The name of the worksheet must be Allocations, and cannot be changed. You can use the Allocations worksheet with either the expanded SF 132 or the condensed SF 132 (letter) apportionment. You do not need to include an Allocations worksheet if you are not using allocations.

# 121.9 Why do I need to report Budget Enforcement Act classifications in my apportionment request?

To make it easier for FACTS II users to do their jobs and to improve the quality of the FACTS II BEA classifications, agencies are now required to indicate on their apportionment requests whether each TAFS is discretionary, mandatory, or split (receiving both discretionary and mandatory funding). OMB will provide this BEA information to Treasury so that it will be available as a FACTS II edit check.

#### 121.10 How do I treat extensions of the availability of unobligated balances?

Extensions of the availability of unobligated balances of budget authority are treated as new budget authority (e.g., reappropriations) or balance transfers depending on:

- The underlying authority to extend the availability; and
- Whether availability is extended before or after the balances have expired.

Not all extensions of the availability of unobligated balances are considered to be reappropriations. The term "reappropriation" applies only to those extensions of availability resulting from laws enacted after the law that provided the budget authority. Reappropriations can be enacted before or after the balances have expired. The definition *excludes* extensions resulting from provisions included in the same law that appropriated the funds or from standing provisions of law enacted before the budget authority was provided. Extensions of availability of unobligated balances that also involve transfers between accounts will be handled on a case by case basis in consultation with OMB. A graphic display of the treatment of extensions of availability of unobligated balances is included at the end of this section.

#### (a) *Extensions that are treated as new budget authority.*

Reappropriations of amounts that have expired are recorded as new budget authority in the year in which the reappropriated amounts become newly available for obligation. In addition, reappropriations of amounts that would expire before the legislation takes affect (e.g., a reappropriation of funds that would expire at the end of FY 2008 included in an FY 2009 appropriations act enacted in August, 2008) would be treated as new budget authority (reappropriations).

An example of this type of extension is found in section 137 (Division F) of the Consolidated Appropriations Act, 2003, which states:

"....the funds provided in Labor, Health and Human Services, Education and Related Agencies Appropriations Act of 2002, Public Law 107–116, for the National Museum of African American History and Culture Plan for Action Presidential Commission shall remain available until expended."

In this example the FY 2002 appropriated funds were annual and therefore expired at the end of September 30, 2002. The language in the FY 2003 appropriation reappropriated the expired funds to unexpired no-year funds.

#### (b) *Extensions that are treated as balance transfers.*

Reappropriations of amounts that would not otherwise expire until a future fiscal year (e.g., a FY 2008 reappropriation of amounts that would otherwise expire at the end of FY 2009) are treated as **balance transfers.** In addition, extensions of the availability of unobligated balances that result from standing provisions of law or provisions included in the same law that appropriated the funds are treated as balance transfers. An example of an extension included in the same law that appropriated the funds is section 511 of the Treasury and General Government Appropriations Act, 2003, which allows agencies to extend the period of availability (expired to unexpired) of unobligated balances of appropriations (annual or multi-year) provided in the same act. The Act states:

"... not to exceed 50 percent of unobligated balances remaining available at the end of fiscal year 2002 from appropriations made available for salaries and expenses for fiscal year 2002 in this Act, shall remain available through September 30, 2003, ..."

#### (c) *Apportionment*.

Reappropriations described in paragraph (a) are reflected on line 3A1: "Budget authority: Appropriation." Initial apportionments for FY 2009 should reflect an estimate of the amount to be reappropriated from the estimated expiring FY 2008 balances. A reapportionment may be required after the actual amount of the expiring balances is known. You may wish to reflect these amounts on line 5 "Temporarily not available pursuant to Public Law xxx–xxx" until an appropriate time after the required reprogramming notice has been transmitted to Congress.

Balance transfer amounts from expired to unexpired funds, described in paragraph (b) are reflected on line 4C: Actual Transfers, unobligated Balance (+ or -).

#### (d) *SF 133 Report on Budget Execution and Budgetary Resources.*

For the SF 133 for September 30, all expiring balances, including amounts subject to reappropriation or balance transfer in the following fiscal year, should be reflected on either line 9A1 "Unobligated balance apportioned: Balance currently available" or line 10C "Unobligated balance not available: Other," as appropriate.

SF 133s prepared for later years should treat reappropriations and balance transfers in the same manner as the apportionment in the available columns. The amounts moved from the expired columns to the available columns should show as negative amounts on line 6B (see exhibit <u>130G</u>).

(Treasury Financial Manual U.S. Government Standard General Ledger Supplement, which contains crosswalks from the U.S. Standard General Ledger to the SF 133, FMS 2108, and Program and Financing Schedule is available at <u>http://www.fms.treas.gov/ussgl</u>).

#### (e) *FY 2010 Budget*.

When the MAX A–11 database opens, all amounts expiring on September 30, 2008 should be reflected on schedule P line 2398 "Unobligated balance expiring or withdrawn" in the 2008 actual column.

Amounts reappropriated (such as the example in paragraph (a)) should be reflected on line 5000 "Reappropriation" in the 2009 column. If there is no approved use for the funds, you may reflect them on line 2398 of the 2008 column as "Unobligated balance expiring or withdrawn."

Amounts treated as balance transfers between expired to unexpired funds (such as the example in paragraph (b)) should be reflected on line 2230 "Expired unobligated balance transfer to unexpired account (+)" in the 2009 column.

#### Extensions of the Availability of Unobligated Balances

#### 121.11 What amounts should I allot?

The agency system of administrative control of funds (section  $\underline{150}$ ) should be designed to keep obligations and expenditures from exceeding apportionments and allotments or from exceeding budgetary resources available for obligation, whichever is smaller. No obligations should be incurred against any anticipated budgetary resources, even if the funds are apportioned and allotted (section  $\underline{145.6}$ ).

#### 121.12 Are there conventions I must follow in using footnote indicators?

Yes, you must follow conventions in the footnote indicators you use in apportionment requests. For many years agencies used a wide range of indicators, e.g., /1, 1, \3, a, abc, and so on. Effective FY 2009, all agencies must use common but flexible standards in their footnote indicators. Each footnote will start with B (for budgetary resource) or A (for apportioned amounts). Examples of budgetary resource footnotes include the Public Laws providing budgetary resources or reductions; sources of the authority from offsetting collections; or, explanations of recoveries. Apportioned footnotes represent statutory language and \ or Administration policy directing the level of budgetary resources that agencies might use for certain purposes. For example, Section 3601 of the Elementary and Secondary Education Act authorizes that not more than one half of one percent of the funding may be used for evaluations. Other statutes provide similar directives. Nearly every apportionment request is prepared and transmitted as an MS-Excel spreadsheet. Apportionments will put previous approved, agency request, and OMB approved footnotes on separate tabs in the Excel file.

You can find and must follow the more detailed implementation guidance in OMB's secure, web-based apportionment system. Here is a link:
