328	Having diffraction grating means	470	Passive cavity (laser source outside cavity)
329	Including servo slit	471	Multi-axis cavity
	adjustment means	472	Lock-in prevention
330	Having optical gating means	473	Path length control (PLC)
331	.With monochromator structure	474	Having dither signal removal
332	Having adjustable color or		from output
	bandwidth	475	Having dither signal control
333	In a double monochromator	476	By dithering (suspensions,
334	With diffraction grating means		drives, flexures)
335	FOR SIZE OF PARTICLES	477	.Using fiber or waveguide
336	.By particle light scattering		interferometer
337	BY PARTICLE LIGHT SCATTERING	478	Multiplexed sensor array
338	.With photocell detection	479	Having a short coherence length
339	At right angles to the light		source
	<pre>beam (e.g., nephelometer)</pre>	480	Resonant cavity
340	At variable angle to the light	481	Refraction indexing
	beam	482	For distance or displacement
341	For light comparison means		measurement
342	Of back-scattered light	483	Plural counter-propagating
343	Using plural photocells		beams (e.g., non-motion Sagnac
344	BY ELECTROPHORESIS		device)
450	BY LIGHT INTERFERENCE (E.G.,	484	.Having light beams of different
	INTERFEROMETER)		frequencies (e.g.,
451	.Spectroscopy		heterodyning)
452	Having particular linear mirror	485	For dimensional measurement
	drive or configuration		(e.g., thickness gap,
453	Polarization	406	alignment, profile)
454	Fabry-Perot type or Etalon Type	486	Displacement or distance
455	Having a rotating, pendulous,	487	Polarization
	or wedge scanning element	488	Having wavefront division
456	Imaging	489	(e.g., by diffraction)
457	.Holography	490	Contour or profileAlignment
458	For optical configuration	491	Alignment .Having polarization
459	.Rotation rate (e.g., ring laser	492	For dimensional measurement
4.5.0	gyros)	493	Displacement or distance
460	By fiber or waveguide	494	Having wavefront division
	interferometer (e.g., Sagnac	101	(e.g., by diffraction)
461	effect)	495	Contour or profile
462	<pre>Resonant loopMulti-axis (X-Y-Z) having</pre>	496	.For dimensional measurement
102	multiplexing	497	Having short coherence length
463	Multiple harmonic output		source
464	Having null feedback loop	498	Displacement or distance
465	Fiber coil winding	499	Having wavefront division
466	Having m x n loop coupler		(e.g., by diffraction)
100	where (m is greater than 2)	500	X-Y and/or Z table
	and (n is greater than or	501	Of probe head (e.g., atomic
	equal to 2) (e.g., passive		force microscope)
	bias)	502	Surface displacement due to
467	Four frequency, multi-		acoustic wave propagation)
	oscillator, non-planar cavity	503	Thickness
468	Cavity output beam combiner	504	Refraction from surfaces of
469	Cavity mirror details		different refractive index
		505	Gap

506	Fabry-Perot type	137	Plural prisms
507	Between slider/disc (e.g.,	138	ANGLE MEASURING OR ANGULAR AXIAL
307	flying height)	130	ALIGNMENT
508	For orientation or alignment	139	.Plural scales or different
509	Between mask and wafer	137	portions of same scale
510	Tilt		simultaneously observable
511	Contour or profile	139.01	.Star/Sun/Satellite position
512	By wavefront detection	107.01	indication with photodetection
513	Of highly reflective surface	139.02	With reticle or slot
313	(e.g., mirror)	139.03	Relative attitude indication
514	Planar surface	137.03	along 3 axes with
515	Of transmission (e.g., lens)		photodetection
516	Step height (differential,	139.04	.Automatic following or aligning
310	between points)		while indicating measurement
517	.For refractive indexing	139.05	With optical elements moving
518	Having Schlieren effect		relative to fixed housing to
519			follow or align
317	plates in series (e.g., Fabry-	139.06	With optical housing moving to
	Perot type)		follow or align
520	.Having shearing	139.07	With photodetection of
521	.Having wavefront division (by		reflected beam angle with
321	diffraction)		respect to a unidirectional
364	BY POLARIZED LIGHT EXAMINATION		source beam
365	.With birefringent element	139.08	With source beam moving to
366	.With polariscopes		follow or align
367	Including polarimeters	139.09	.Wheel alignment with
368	With electro-optical light		photodetection
300	rotation	139.1	.Photodetection of inclination
369	.Of surface reflection		from level or vertical
370	.With light attenuation	140	.Apex of angle at observing or
121	LAMP BEAM DIRECTION OR PATTERN		detecting station
122	.With lamp focusing	141.1	With photodetection of
123	FOCAL POSITION OF LIGHT SOURCE		reflected beam angle with
124	LENS OR REFLECTIVE IMAGE FORMER		respect to a unidirectional
121	TESTING		source beam
124.5	.For optical transfer function	141.2	With photodetection
125	.Focal length measuring	141.3	With unidirectional or planar
126	Deflecting or interrupting		source beam directed at the
120	optical path		photodetecting station
127	Optical center, cylinder axis,	141.4	With optical scanning of light
	or prism measuring or		beam or detector
	determining	141.5	With at least 2-dimensional
128	REFRACTION TESTING (E.G.,		sensitivity
	REFRACTOMETERS)	142	Scale and remote point
129	.Schlieren effect		simultaneously observable
130	.Differential	143	Artificial reference
131	With servo controlled optical	144	With plural images
	member	145	Lines of sight relatively
132	Reflective optical member		adjustable with two degrees of
133	.Refractive rod engages specimen	1.4.0	freedom
134	.Prism forming fluid specimen	146	Two or more lines of sight
	container	1 4 🗁	deflected
135	.Prism engaging specimen	147	Measurement in two planes
136	Internally reflecting prism		(e.g., azimuth and elevation;
			hour angle and declination)

148	Artificial reference	627	.Volume
149	Gyroscope or pendulum	628	.Area
	stabilized optical element	629	Light scanning
150	.Sides of angle or axes being	630	.Thickness
	aligned transverse to optical	631	By triangulation
	axis (e.g., drift meter)	632	Of light permeable material
151	With light pulsing or	634	.Length
	interrupting means	635	.Width or diameter
152.1	.With photodetection remote from	636	Line width
	measured angle	637	Web
152.2	With reflection of a	638	Shadow or beam blocking
	unidirectional source beam	639	Scanning
	from a planar or	640	Single beam scans entire
150.0	nonretroreflective surface		width or diameter
152.3	With reflection of a	388	BY CONFIGURATION COMPARISON
	unidirectional source beam	389	.With photosensitive film or
150	from a retroreflector		plate
153	.Alignment of axes nominally	390	.With two images of single
	coaxial		article compared
154	.With screen	391	.With projection on viewing
155	Wheel alignment		screen
600	SURFACE ROUGHNESS	392	For comparison with master or
601	SHAPE OR SURFACE CONFIGURATION		desired configuration
602	.Triangulation	393	Having master or desired
603	Projection of structured light		configuration projection
	pattern	394	.With comparison to master,
604	Pattern is series of non-		desired shape, or reference
	intersecting lines		voltage
605	Moire	395	.With relatively movable optical
606	Line of light projected		grids
607	Scan	396	.With scale or optical grid
608	Scan		displaced relative to remote
609	.By focus detection		fiducial mark
610	.By projection of coded pattern	397	.With object being compared and
611	.By stereo		scale superimposed
612	.By specular reflection	398	.With object being compared and
613	.Silhouette		light beam moved relative to
614	POSITION OR DISPLACEMENT		<pre>each other (e.g., scanning)</pre>
615	.Position transverse to viewing	399	BY ALIGNMENT IN LATERAL DIRECTION
	axis	400	.With light detector (e.g.,
616	Having scale or grid		photocell)
617	Coded scale	401	.With registration indicia (e.g.,
618	Moire		scale)
619	Quadrature detection	402	BY SHADE OR COLOR
620	Special mark or target on	403	.With merging colors or patterns
	object		(e.g., Maxwell disc)
621	Occulting a projected light	404	.Photography
	beam	405	.Tristimulus examination
622	Position of detected	406	.Trichromatic examination
	arrangement relative to	407	.With sample responsive to plural
	projected beam		colors applied simultaneously
623	.Triangulation	408	.With sequential comparison of
624	.Focus		sample and standard
625	DIMENSION	409	.Fluid color transmission
626	.Cavities		examination

4.1.0			
410	Of flowing liquids	214	.Pupillary

Any foreign patents or non-patent literature from subclasses that have been reclassified have been transferred directly to FOR Collections listed below. These Collections contain ONLY foreign patents or non-patent literature. The parenthetical references in the Collection titles refer to the abolished subclasses from which these Collections were derived.

FOR 100 INSPECTION FOR FLAWS OR IMPERFECTIONS (356/237)

- FOR 101 .Cloth or thread inspection (356/
- FOR 102 .Passing light through a transparent or translucent article (356/239)
- FOR 103 ..Containers (e.g., bottles) or contents (356/240)
- FOR 104 .Bore inspection (e.g., borescopes) (356/241)
- FOR 105 THREAD COUNTING (356/242)
- FOR 106 STANDARDS (356/243)
- FOR 107 BY LIGHT INTERFERENCE (E.G., INTERFEROMETERS) (356/345)
- FOR 108 .Spectroscopy (356/346)
- FOR 109 .Holography (356/347)
- FOR 110 ...For optical configuration (356/ 348)
- FOR 111 .With light beams of different frequency (e.g., heterodyning) (356/349)
- FOR 112 ...For rotation rate (e.g., ring laser) (356/350)
- FOR 113 .With polarization (356/351)
- FOR 114 .With partially reflecting plates
 in series (e.g., Fabry-Perot
 type) (356/352)
- FOR 115 .With shearing (356/353)
- FOR 116 .With wavefront division (e.g., by diffraction) (356/354)
- FOR 117 ...For dimensional measurement (e.g., thickness) (356/355)
- FOR 118 ...Of displacement or distance (356/356)
- FOR 119 .For dimensional measurement (e.g., thickness) (356/357)
- FOR 120 .. Of displacement or distance (356/358)
- FOR 121 .For optical configuration (356/ 359)
- FOR 122 ..With two light beams (e.g., Twyman-Green) (356/360)

- FOR 123 .For refractive indexing (356/ 361)
- FOR 124 .. With Schlieren effect (356/362)
- FOR 125 .For orientation and alignment (356/363)
- FOR 126 FOR FLATNESS (356/371)
- FOR 127 BY MENSURATION (356/372)
- FOR 128 .Of article displacement (356/ 373)
- FOR 129 ..Including moire' fringe (356/ 374)
- FOR 130 .Of position (356/375)
- FOR 131 .Of contour or profile (356/376)
- FOR 132 .. With curve readers (356/377)
- FOR 133 .Of cavities (356/378)
- FOR 134 .Of area or volume (356/379)
- FOR 135 .. By scanning (356/380)
- FOR 136 .Of thickness (356/381)
- FOR 137 .. of light permeable material (356/382)
- FOR 138 .Of length (356/383)
- FOR 139 .Of width or diameter (356/384)
- FOR 140 .. Of moving object (356/385)
- FOR 141 ...By scanning or light interruption (356/386)
- FOR 142 ..By scanning or light interruption (356/387)
