The Service Summary file summarizes utilization and expenditure data by each of nine different
types of service, with detail of expenditures for each by payer. Note that there are two sets of
payment/expenditure variables, such as AAMTTOT and SAMTTOT. The series of variables beginning with S
are payments during periods covered by interviews. Those beginning with A are payments during
periods covered by interviews plus estimated payments for periods not covered by interviews, if
any. There are nine records for each person in the sample.
