Indicate: <u>Indicate:</u> Violations X Satisfactory NA Not Applicable Company Name_____ EPA ID# No. ___ __ __ __ __ __ __ __ Region/Inspector _____ Inspection Date ___ APPENDIX A Land Disposal Restrictions (For SQG's, LQG's and TSD's that generate and/or store) I. <u>Dilution Prohibited as a Substitute for Treatment</u> A. ___ The generator or TSD, has not diluted in any way a restricted waste or the residual from treatment of a restricted waste unless: - 376.1(c)(1). Characteristic hazardous wastes are diluted (in a treatment system which treats wastes subsequently discharged to NYS waters) pursuant to a SPDES permit or for purposes of pretreatment under the Clean Water Act. [Dilution is permissible unless another method has been specified as the treatment standard in 376.4(c)(Five Letter Technology codes) or unless the waste is a D003 reactive cyanide wastewater or nonwastewater.)] B. ___ Combustion has been used to treat any of the hazardous waste codes listed in Appendix 54 (metal bearing wastes). Combustion is prohibited unless the waste, at the point of generation or after any bona fide treatment such as cyanide destruction prior to combustion can be demonstrated to comply with one or more of the following (unless otherwise specifically prohibited from combustion): - 376.1(c)(3) the waste contains hazardous organic constituents or cyanide at levels exceeding the constituent - specific treatment standard found in 376.4(j) of this Part; the waste consists of organic, debris - like materials (e.g., wood, paper, plastic, or cloth) contaminated with an inorganic metal - bearing hazardous waste; the waste, at point of generation, has reasonable heating value such as greater than or equal to 5000 BTU per pound;

the waste is co-generated with wastes for which combustion is a required method treatment;

A-1 7/99 8/99

- the waste is subject to Federal and/or State requirements necessitating reduction of organics (including biological agents); or
- the waste contains greater than 1% Total Organic Carbon (TOC).

II. <u>Testing, Tracking and Recordkeeping Requirements</u> - 376.1	II.	<u>Testing,</u>	Tracking	and	Recordkeeping	Requirements	_	376.1	g
---	-----	-----------------	----------	-----	---------------	--------------	---	-------	---

A The generator has determined if the waste has to be treated before it can be land disposed - 376.1(g)(1)(i). The determination is based on: YES/NO a Testing the waste b Using knowledge of the waste B For waste that does not meet the treatment standard: With the initial shipment of waste to each treatment or storage facility, the generator has sent a one-time notice to each receiving facility and placed a copy in the file. The notice must contain the following information: - 376.1(g)(1)(ii). 1 EPA Hazardous waste number 2 Manifest document number 3 The waste is subject to the LDRs. The constituents of concern for F001-F005, and F039, and underlying hazardous constituents (for wastes that are not managed in a Clean Water Act (CWA) or CWA-equivalent facility), unless the waste will be treated and monitored for all constituents. If all constituents will be treated and monitored, there is no need to put them all on the LDR notice. 4 The notice must include the applicable wastewater/ nonwastewater category and subdivisions made within a waste code based on waste-specific criteria (such as D003 reactive cyanide). 5 Waste analysis data (when available). 6 For hazardous debris, when treating with the alternative treatment technologies provided by subdivision 376.4(g): the contaminants subject to treatment, as described in paragraph 376.4(g)(2): and an indication that these contaminants are being treated to comply with subdivision 376.4(g). NOTE: No further notification is necessary until such time that the waste or facility change, in which case a new notification must be sent and a copy placed in the generator's file.

G.	<u>Alt</u>	ernate Treatment Standards for Lab Packs.	
		If a generator is managing a lab pack containing hazardous waste and wishes to use the alternative treatment standards, The generator must submit a notice to the treatment facility with the initial shipment. The notice must contain the EPA hazardous waste codes, manifest document number, and the applica certification. No further notification is necessary unless the wastes or receiving facility changes. For characteristic hazard wastes (D001-D008 and D010-D043) underlying hazardous constituen need not be determined. The recordkeeping requirements must be met - 376.1(g)(1)(ix).	ous.
Н.	Sma	ll Quantity Generators with Tolling Agreements.	
		For small quantity generators with tolling agreements, the following requirements - $376.1(g)(1)(x)$.	
		- For the <u>initial</u> shipment of such wastes, the generator has complied with the notification and certification requirements that apply for the wastes subject to the tolling agreement - 376.1(g)(1)(x). [Complete Items II.D, E, or F, pgs A-3 through A-5, as applicable, except for mani requirements.]	fest
		- Small quantity generators must retain on-site a copy of the initial notification and certification, together with the tolling agreement, for at least three years after termination or expiration of the agreement - $376.1(g)(1)(x)$.	
I.	<u>Haz</u>	ardous Debris.	
		Generators or treaters who first claim that hazardous debris is excluded from the definition of hazardous waste under paragraph $371.1(d)(5)$ of this Title, (i.e., debris treated by an extraction or destruction technology provided by Table 1, subdivision $376.4(g)$, and debris that the commissioner has determined does not contain hazardous waste) are subject to the following notification and certification requirements: $376.1(g)(4)$.	
	1.	A one-time notification must be submitted to the commissioner to include the following information: 376.1(g)(4).	
		a The name and address of the authorized Part 360 _ facility receiving the treated debris - $376.1(g)(4)(i)(\underline{a})$.	
		b A description of the hazardous debris as initially generated, including the applicable EPA or NYS Hazardous Waste Number(s) - $376.1(g)(4)(i)(\underline{b})$.	
		c For debris excluded under subparagraph $371.1(d)(5)(i)$ _ of this Title, the technology from Table 1, subdivision $376.4(g)$, used to treat the debris - $376.1(g)(i)(\underline{c})$.	
	2.	The notification must be updated if the debris is shipped _ to a different facility, and, for debris excluded under	

A-5 7/99 8/99 subparagraph 371.1(d)(5)(i) of this Title, if a different type of debris is treated or if a different technology is used to treat the debris - 376.1(g)(4)(ii).

III. Special Rules Regarding Wastes That Exhibit a Characteristic

Α		The initial generator of a solid waste have determined each EPA hazardous waste number (waste code) applicable to the waste in order to determine the applicable treatment standards usection 376.4 of this Part. For purposes of Part 376, the waste will carry the waste code for any applicable listing usection 371.4 of this Title. In addition, where the waste exhibits a characteristic, the waste will carry one or more of the characteristic waste codes under section 371.3, except when treatment standard for the listed waste operates in lieu of the treatment standard for the characteristic waste, as specified in paragraph (2) of this subdivision. If the generator determines their waste displays a hazardous characteristic (and is not D001 nonwastewaters treated by CMBST, RORGS, OR POLYM of subdivision 376.4(c), Table 1 of this Part), the generator must determine the underlying hazardous constituents (as defined in subdivision 376.1(b)(1) of this Part), in the characteristic waste - 376.1(h)(1).	the that
В.		For a prohibited waste that is listed and also exhibits a characteristic, the treatment standard for the listed waste code will operate in lieu of the standard for the characteristic code, provided the treatment standard for the listed waste incluat treatment standard for the constituent that causes the waste to exhibit the characteristic. Otherwise the waste must meet the treatment standards for all applicable listed and characteristic codes - 376.1(h)(2).	
c.		Prior to land disposal, all prohibited wastes which exhibit a characteristic have been treated to the treatment standards provided in 376.4 - 376.1(h)(3).	
D.		Wastes that exhibit a characteristic are also subject to subdivision 376.1(g) requirements, except that once the waste is no longer hazardous, a one-time notification and certification must be placed in the generators' or treaters' files and sent to the commissioner. The notification and certification this is placed in the generators' or treaters' files must be updated if the process or operation generating the waste changes and/or if the Part 360 facility receiving the waste changes. However, the generator or treater need only notify the Department on an annual basis if such changes occur. Such notification and certification should be sent to the Depart by the end of the calendar year, but no later than December 31 - 376.1(h)(4).	
	1.	The notification includes the following information - $_376.1(h)(4)(i)$.	
		a The name and address of the Part 360 facility receiving the waste - $376.1(h)(4)(i)(\underline{a})$.	
		b A description of the waste as initially generated, _ including the applicable EPA Hazardous Waste Number(s)	

A-6 7/99

				and treatability group(s), and underlying hazardous constituents, unless the waste will be treated and monitored for all underlying hazardous constituents. In that case they do not have to be listed on the notice - $376.1(h)(4)(i)(\underline{b})$.
		2.		The certification must be signed by an authorized representative and state the language found in subparagraph $376.1(g)(2)(iv)(\underline{e}) - 376.1(h)(4)(ii)$.
		3.		If the treatment removes the characteristic but does not treat underlying hazardous constituents, then the certification in $376.1(g)(2)(iv)(d)$ applies - $376.1(h)(4)(ii)(\underline{a})$.
IV.	PCB	Dis	posa	<u>1</u>
	Α.		cont	PCB wastes listed under Part 371 solely for their PCB tent, are disposed of in accordance with the provisions of CFR Part 761, except 376.4(f)(1).
		1.		As listed in Part 371, waste B002, from any source other than a spill, may not be stabilized or mixed with any substance to conform with any provision of 40 CFR Part 761 regarding land disposal - $376.4(f)(1)(i)$.
V.	Prol	hibi	tion	on Storage of Restricted Wastes - 376.5(a)
	Α.			rage of hazardous wastes restricted from land disposal itted provided that: - 376.5(a)(1).
		1.		The generator has stored restricted waste in tanks or containers on-site solely for the purpose of the accumulation of such quantities of hazardous waste as necessary to facilitate proper recovery, treatment, or disposal - 376.5(a)(1)(i).
		2.		owner or operator of a hazardous waste treatment rage, or disposal facility has:
			a.	Only stored restricted wastes in tanks or containers for up to one year solely for the purpose of the accumulation of such quantities as necessary to facilitate proper recovery, treatment, or disposal - 376.5(a)(1)(ii).
			b.	Clearly marked each container or tank to identify its contents and the date each period of accumulation begins $-376.5(a)(1)(ii)(\underline{a})$.
			C.	Maintained in the operating record the contents and beginning accumulation date for each tank and container - $376.5(a)(1)(ii)(\underline{b})$.
			d.	Complied with all operating record requirements of 373-2.5(c) or 373-3.5(c) - 376.5(a)(1)(ii)(\underline{b}).
	В.			ess the Department can prove that such storage was not

A-7 7/99 8/99 necessary to facilitate proper recovery, treatment or disposal, the owner/operator of a treatment, storage or disposal facility may store restricted waste for up to one year - 376.5(a)(2).

- C. ____ The owner/operator of a treatment, storage or disposal ____ facility has stored restricted waste beyond one year and has proven that the storage was solely for the purpose of accumulation of such quantities of hazardous waste as necessary to facilitate proper recovery, treatment, or disposal 376.5(a)(3).
- D. ____ Liquid hazardous wastes containing PCBs at concentrations ____ greater than or equal to 50 ppm have been stored at facilities that meet the requirements of 371 through 376 and 40 CFR 761.65(b), and have been removed from storage and treated or disposed of as required within one year of the date when such wastes were placed in storage 376.5(a)(6).
