**Subject:** Comment on FDA Draft Proposal to Codex CCNFSDU on Dietary Supplements

To: Beth Yetley, FDA

c/o Nancy Crane, FDA

Dr. Yetley and Ms. Crane:

Please do not increase regulation of dietary supplements. I do not want to go through a doctor to get my supplements.

In addition it is our right to have health claims on supplements. We have a RIGHT to learn about the beneficial health properties of dietary supplements and to obtain them without restrictions and without a doctor of any kind.

Gives us information on what seems to work and what seems to be fruadulent, then let us decide.

How about paying attention to the pesticides used to grow cotton that end up in our food via cotton oil??

How about paying attention to the poisons that are allowed in the perfume industry?

Frankly it is hard for me to believe that you are considering any such regulations. I am writing at this late date because I previously thought it was some kind of internet hoax.
