BULLETIN NO. 3

June 1, 2005

URGENT DRUG RECALL

The Food and Drug Administration (FDA) is taking action to ensure that the public is fully aware that Able Laboratories of Cranbury, NJ, is conducting a nationwide recall of all of its manufactured drugs (mostly generic prescription drugs, including drugs containing acetaminophen) because of serious concerns that they were not produced according to quality assurance standards. Able Laboratories has ceased all current production.

"The FDA continues to evaluate the situation at Able Laboratories to determine the safety and quality of their products and will update the public on our findings as necessary," said Margaret O'K. Glavin, Associate Commissioner for Regulatory Affairs. "In the meantime, the Agency recommends that people who have been taking drugs produced by this firm speak with their health care provider or pharmacist to obtain a replacement drug product. Consumers should continue taking the medication until they have spoken with their health care provider. In many cases the risk of suddenly stopping needed medication before getting replacement drugs may outweigh the risk of continuing to use the recalled products."

The list below provides the names of the recalled drugs and their imprint codes. Imprints are marks (usually letters and numbers) found on the surfaces of drugs. If you have one of the drugs listed below with one of the corresponding imprint codes, your drug is covered by the Able Laboratories recall.

Liquid products being recalled can be identified by the lot numbers printed on the packaging.

It is important to note that this recall only applies to the drugs produced by Able Laboratories -- and not to the same drugs produced by other manufacturers.

An investigation is underway to identify all the repackers and wholesalers who distribute these drugs from Able Laboratories. In the meantime, you should examine your inventory and if you have the recalled products mentioned above cease distribution/use.

Please return all recalled items **DIRECTLY** to EXP Pharmaceutical Services Corp. The return forms can be found at <http://ablerecall.expworld.com/> or you can contact Able Laboratories at 1-800-982-2253. Please send a copy of the paperwork submitted to EXP to HHS SSC at 410-642-1384 in order to process your credit. Persons wanting to report any adverse events to the FDA may contact FDA's MedWatch office at 1-800-FDA-1088.

We apologize for any inconvenience this recall presents, and thank you in advance for your prompt attention to this urgent request.

Lorraine D'Angelo
