HAWAII'S 2007 UTILIZED GUAVA PRODUCTION WAS PEGGED AT 3.8 MILLION POUNDS, according to USDA, NASS, Hawaii Field Office. The 49 percent lower output was due mainly to the closure of a large processor at the end of 2006. Weather for 2007 was mixed for guava production with rainfall or irrigation supplying adequate moisture.

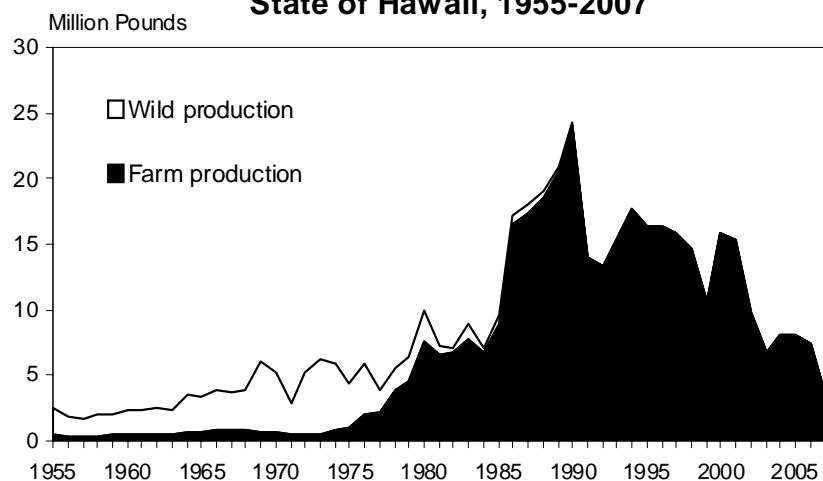

ACREAGE DEVOTED TO GUAVA PRODUCTION TOTALED 465 ACRES, 19 percent less than the previous year. Harvested area was estimated at 150 acres, 59 percent fewer than 2006. The average farm price for fruit utilized mainly for processing was estimated at 15.7 cents per pound, 11 percent (1.5 cents) more than the previous year. Statewide farm value totaled \$597,000, 43 percent lower than 2006.

U.S. IMPORTS OF SELECTED GUAVA PRODUCTS IN 2007 all increased from a year ago (see page 4). Guava paste and puree increased 23 percent to 9.5 million pounds (4,315 metric tons). Brazil, accounted for 42 percent of the paste and puree imports.

Prepared or preserved guava imports increased 13 percent from the previous year to 15.9 million pounds (7,199 metric tons). Ecuador and Dominican Republic supplied over 50 percent of these imports into the U.S.

Imports of guava jam were up 41 percent to 2.8 million pounds (1,289 metric tons). Brazil and Costa Rica accounted for 80 percent of the guava jam total.

**Guava Production
State of Hawaii, 1955-2007**
