

# Bureau of Justice Assistance Fact Sheet

Nancy E. Gist, Director

## Fiscal Year 1994 Review of State Formula Grant Strategies

#### **Bureau of Justice Assistance Review Highlights:**

- ☐ All States will comply with the local passthrough requirement, with 46 (92 percent) providing more funds to local units of government than required by statute.
- □ States have allocated \$38,738,827 more to local units of government than required by statute (\$222,633,419 proposed versus \$183,894,592 required).
- ☐ Locally implemented projects will receive 65.86 percent of the Byrne Formula Grant Program funding.
- ☐ States have designated \$22,106,383 as set-aside for criminal justice records improvement programs.
- ☐ By close of fiscal year (FY) 1994, 47 States and territories were in compliance with the HIV legislative mandate.

#### Introduction

The Edward Byrne Memorial State and Local Law Enforcement Assistance (Byrne) Program, authorized by the Anti-Drug Abuse Act of 1988, is administered by the Bureau of Justice Assistance (BJA) of the Office of Justice Programs (OJP), U.S. Department of Justice. The Formula Grant Program, a component of the Byrne Program, is designed to assist States and local units of government in carrying out specific programs that offer a high probability of improving the functioning of the criminal justice system. Special emphasis is placed on drug-related and violent crime, serious offenders, and multijurisdictional and multi-State efforts to support the National Drug Control Strategy.

In accordance with Section 501(b) of the Act, States may award formula grant funds to State agencies and units of local government. These subgrants are awarded to support enforcement of State and local laws that establish offenses similar to those called out in the Controlled Substances Act (21 U.S.C. 801 et seq.) and to improve the functioning of the criminal justice system with emphasis on violent crime and serious offenders. These grants provide personnel, equipment, training, technical assistance, and information systems for the more widespread apprehension, prosecution, adjudication and detention, and rehabilitation of persons who violate such laws and for assistance to the victims of such crimes (other than compensation).

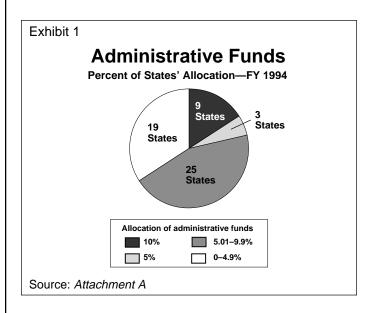

Section 506(a) of the Act provides that at least 80 percent of the total Byrne appropriation must be allocated for the Formula Grant Program component, with 20 percent or \$50 million, whichever is less, reserved for the Discretionary Grant Program component. Although the appropriation of \$433 million for FY 1994 was slightly less than that for the 3 prior years, a waiver of the \$50 million limitation for the Discretionary Grant Program allowed an additional \$25 million for community policing, thus raising the total for that grant program to \$75 million. A balance of \$358 million, representing 82.68 percent of the total appropriation, remained for the Formula Grant Program. This amount was divided among the 50 States, 5 territories, and the District of Columbia. Each entity received a base amount of 0.25 percent of the total formula allocation or \$500,000, whichever was greater. (The base amount for FY 1994 was \$895,000.) The remaining funds were then allocated on the basis of each State's relative share of the Nation's total population. While the average allocation was \$6,392,857, actual funding ranged from a high of \$37,807,808 for California to a low of \$948,600 for Guam. American Samoa and the Northern Mariana Islands, which are considered a single unit for funding purposes, received a total allocation of \$1,105,808 (American Samoa, \$740,891; Northern Mariana Islands, \$364,917).

### **Application Submission and Review Process**

The Anti-Drug Abuse Act of 1988 establishes specific time frames within which formula grant funds must be awarded. Within 60 days after the enactment of BJA's annual appropriation, the States are required to submit an application and comprehensive statewide strategy to BJA. For the FY 1994 funding cycle, December 27, 1993, was established as the deadline for the States' application submission. The legislation also mandates that BJA conduct a full review and approve or deny the application within 45 days after receipt of a State's complete submission. These reviews require multilevel coordination between BJA and the offices within OJP, to ascertain the State's compliance with regulations and legislative mandates, in addition to an indepth assessment of data and compilation of the strategy's information into a summary format.

#### **Key Findings**

Administrative Funding Allocations Remain Steady. Each State or territory may use up to 10 percent of its allocation for the administration of the grant program. BJA encourages States to use the necessary resources, within the 10 percent, for proper program administration. Twenty-two States (39.29 percent) will use 5 percent or less of their funds for administrative purposes, while 34 States (60.71 percent) anticipate using up to 10 percent of their allocation for administration. It should be noted that the primary reason for using administrative funds in excess of 5 percent is to support enhanced evaluation and monitoring efforts. (See Exhibits 1 and 2).

States Continue to Exceed Passthrough Requirement. The statutory variable passthrough is the amount of funds that must be made available to local units of government out of the State's program allocation. Because administrative funds serve both State and local units of government and are generally expended in the same proportion as the expenditure of program funds, they are subtracted from the award before actual dollar amounts to be passed through are calculated.

The minimum passthrough amount for each State is based on the percentage of funds expended for criminal justice purposes by local units of government relative to total State and local criminal justice expenditures in the State. These expenditures must be from a government's own revenue source (e.g., taxes,

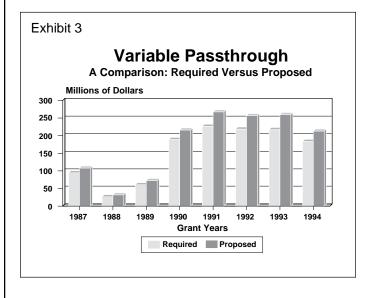

Exhibit 2

TOTAL	\$358,000,000	\$ 19,935,059			

charges and fees, utility revenues, and interest earnings). This requirement applies only to the 50 States. The District of Columbia, because of its designation as a local unit of government, is required to pass through 100 percent of its award. The five territories of Puerto Rico, the Virgin Islands, American Samoa, Guam, and the Northern Mariana Islands have no passthrough requirement because of their single-level government structure.

Passthrough requirements for the 50 States range from a low of \$335,905 (21.97 percent) in Alaska to a high of \$3,726,389 (70.29 percent) in Minnesota, with an average of \$3,677,892. All 50 States will meet the minimum requirement, and 46 States (92 percent) will exceed the amount required. Consistent with previous years, States indicate that they will retain less funding for State-level projects and have allocated more funding to local units of government. FY 1994 funding required that \$183,894,592 be passed through to the local governments; however, the States indicate that they will actually surpass

this requirement by \$38,738,827, making a total passthrough of \$222,633,419. These figures indicate that, although States are permitted to retain an average 45.60 percent of the allocation for the implementation of State level programs, they are actually retaining an average of only 34.14 percent. Thus nationally, the majority of the funding (65.86 percent) is being used for the implementation of programs specifically to assist local units of government in their war against drugs and violent crime. (See Exhibit 3.)

Multijurisdictional Task Force Activities Continue to Receive Highest Priority. Data on proposed and actual funding levels submitted to BJA by States indicate that multijurisdictional task force activities will continue to receive the greatest portion of the total allocation (39.48 percent). Further analyses of data gathered reveal that since FY 1991, States have consistently dedicated larger portions of their allocations to programs that improve technology, including criminal justice information systems, corrections resources, treatment, court delay reduction, and street sales enforcement. However, current data indicate that the States are placing greater emphasis on crime prevention, many by funding more community policing programs. (See Exhibit 4.)

Criminal Justice Records Improvement 5 Percent Set Aside. The Crime Control Act of 1990 requires each State receiving Byrne Program formula grant funds to allocate at least 5 percent of its total award for the improvement of criminal justice records. This requirement, which applied to FY 1992 and subsequent formula grant awards, is for the following improvements:

- ☐ Completion of criminal histories to include the final disposition of all arrests for felony offenses;
- ☐ Full automation of all criminal justice histories and fingerprint records; and
- ☐ Frequency and quality of criminal history reports forwarded to the Federal Bureau of Investigation.

An analysis of information supplied by the States indicates that, while 39 States (69.64 percent) will minimally comply by setting aside the required 5 percent, 17 States (30.36 percent) intend to surpass this amount with Guam setting aside 51.16 percent. (See Exhibit 5.)

HIV Legislation Mandate. Section 1804 of the Crime Control Act of 1990 mandates that by the end of FY 1994 each State must enact and enforce statutes that provide for the testing of certain convicted sex offenders for HIV if the State is to continue to receive its full Formula Grant Program award. States that had not complied with this mandate by September 30, 1994, forfeited 10 percent of their allocation for FY 1994 and will continue this forfeiture each fiscal year until they reach compliance. These forfeited funds will be equitably distributed among the compliant States and territories.

By the end of FY 1994, 47 States and territories had complied with this mandate, and supplemental awards of the forfeited funds were made on October 13, 1994. Award amounts were based on the \$4,775,200 penalty imposed on the nine States that failed to comply with the HIV legislative mandate, and that amount was equitably distributed among the compliant States and territories, with each receiving more than \$103,800. (See Exhibit 6.)
