

Oil and Gas Field Code Master List Updates 1999

January 2000

Energy Information Administration
Office of Oil and Gas
U.S. Department of Energy
Washington, DC 20585

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the Department of Energy. The information contained herein should be attributed to the Energy Information Administration and should not be construed as advocating or reflecting any policy position of the Department of Energy or any other organization.

1999 FIELD CODE MASTER LIST UPDATES

The *Oil and Gas Field Code Master List Updates 1999* is an addendum to the *Oil and Gas Field Code Master Lists Updates 1998* and the 1997 edition of the Energy Information Administration (EIA) publication *Oil and Gas Field Code Master List*. This EIA publication, *Oil and Gas Field Code Master List*, is an annual listing of all identified oil and gas fields within the United States. These updates represent the addition of new fields to the list and changes to the records of previously listed fields, including deletions. The current publication is based on field information collected through November 1999.

The complete version of the Field Code Master List (FCML) and the 1999 Updates are available electronically at the EIA World Wide Web site <<http://www.eia.doe.gov>>. After logging on the EIA Web site, select "Petroleum", then "Data Publications" and then scroll to "Oil and Gas Field Code Master List" under Annual.

The purpose of this publication is to provide standardized names and codes for identifying domestic fields. Use of these field names and codes fosters consistency of field identification by government and industry. As a result of their widespread adoption they have in effect become a national standard. The use of field names and codes listed in *Oil and Gas Field Code Master List* is required on survey forms and other reports regarding field-specific data collected by EIA. The surveys currently using these field names and/or field codes are Form EIA-23, "*Annual Survey of Domestic Oil and Gas Reserves*", and Form EIA-191, "*Monthly Underground Gas Storage Report*".

A field is defined as "an area consisting of a single reservoir or multiple reservoirs all grouped on, or related to, the same individual geological structural feature and/or stratigraphic condition. There may be two or more reservoirs in a field which are separated vertically by intervening impervious strata, or laterally by local geologic barriers, or by both."

This definition is not used by all States in their designation of fields; consequently, areas classified as individual fields by

some States may be found combined in the FCML. Additional information and examples may be obtained from the 1997 edition of the *Oil and Gas Field Code Master List*, the *Oil and Gas Field Code Master List Updates 1998* and/or the EIA World Wide Web site.

The Field Code Master List (FCML) includes:

Master field names, with separate field records for each State and county in which a given field resides. A field may also occur in more than one jurisdiction and even be assigned different names by the respective State or Federal field naming authorities.

Alias field names, specifying field names previously assigned by a field naming authority but not in use currently. The FCML links each alias field name to the currently recognized (master) field name in same State and county. In the Gulf of Mexico, alias field names are also used to identify each offshore area and numbered block in which a given field occurs.

General information regarding this publication and detailed information on the report's content may be obtained from the FCML Coordinator at **1-800-879-1470**.

Other Federal and State government agencies, as well as industry, use the EIA *Oil and Gas Field Code Master List* (FCML) as the standard for field identification. In order for it to be useful, it must be accurate and remain current. To accomplish this, EIA constantly reviews and revises this list. EIA welcomes all comments, corrections and additions to the FCML. All such information should be provided to the FCML Coordinator at **1-800-879-1470** or by FAX at **214-720-6155**.

EIA gratefully acknowledges the assistance provided by various State organizations, trade associations and the Minerals Management Service of the U.S. Department of the Interior in verifying the existence of oil and gas fields and confirming their officially recognized names.
