

## Reviewers

---

Listed below are nearly 700 Federal and non-Federal experts who reviewed Task Force draft background papers, chapters, and recommendations during their various stages of preparation. Many of these reviews were arranged by the liaisons to the Task Force (listed in the Acknowledgments) from primary care specialty societies, including the American Academy of Family Physicians (AAFP), American Academy of Pediatrics (AAP), American College of Obstetricians and Gynecologists, and American College of Physicians, and from Public Health Service (PHS) agencies, and by other professional organizations. We gratefully acknowledge the contribution of many other unnamed reviewers who provided helpful comments through various PHS agencies, professional societies, and voluntary organizations. Staff from the Food and Drug Administration (FDA) also reviewed draft chapters, background papers, and recommendations for the Task Force. Their review of these documents does not necessarily imply FDA approval of specific products for the indications described in the Task Force recommendations.

It should be emphasized that while reviewer comments and suggestions were of substantial assistance and are gratefully acknowledged, the Task Force is solely responsible for the final recommendations. Service as a reviewer does not necessarily reflect endorsement of any or all of the Task Force recommendations.
