

**Miscellaneous**

**CIVIL AIR PATROL SEAL, EMBLEM AND FLAG ETIQUETTE**

This regulation describes the Civil Air Patrol name, seal, emblem, and flags (this regulation does not concern the “corporate seal,” as described in the Civil Air Patrol constitution. Use of the “corporate seal” is reserved for legal documents as required by law). This regulation prescribes policy for use of the Civil Air Patrol name, seal, and emblem; use and display of United States and Civil Air Patrol flags; and ceremonial destruction of the United States flag. **Note: This regulation is revised in its entirety.**

## SECTION A—USE OF CIVIL AIR PATROL NAME, SEAL AND EMBLEM

### 1. Policy.

The use of the Civil Air Patrol (CAP) name, seal and the Civil Air Patrol emblem is not permitted except as authorized herein.

### 2. Description:

**a. Name.** When used as a proper noun, the name Civil Air Patrol will be used as written without the definitive article “the” preceding it.

**b. Civil Air Patrol Seal (see Figure 1).** The design of the CAP Seal and its heraldic significance are set forth as follows:

1) **Crest.** The crest includes the American eagle, which is symbolic of the United States and air-striking power; the cloud formation behind the eagle depicts the creation of a new firmament; and the twists of the wreaths beneath the eagle incorporate the colors of the basic shield design

2) **Shield.** The basic CAP emblem is superimposed on the shield.

3) **Encircling Stars.** The encircling 13 stars represent the original 13 colonies of the United States, and the three set apart at the top of the design portray the three departments within the Department of Defense—the Army, Navy and Air Force.

4) **Encircling Band.** On the band encircling the design are the inscriptions “United States Air Force Auxiliary” and “Civil Air Patrol.”

5) **Colors.** When the seal is reproduced in color, the background will be silver gray; the shield will be dark blue; the triangle will be white; and the three-bladed propeller will be red. The twists of the wreaths will be alternately white and dark blue, and the eagle will be gold in front of a white cloud. The 13 stars will be white edged in dark blue. The wide encircling band will be white and surrounded by a small gold band edged in dark blue on the inside and two small gold bands edged in dark blue on the outside. The lettering on the wide white band will be ultramarine blue.

**c. Civil Air Patrol Emblem (see Figure 2).** The CAP emblem consists of an ultramarine blue disc on which a white equilateral triangle is superimposed. Within the disc in white are the words “USAF Auxiliary.” Centered above and contiguous to the disc is a red stripe on which the words “Civil Air Patrol” are superimposed.

Figure 1. Civil Air Patrol Seal

Figure 2. Civil Air Patrol Emblem

### 3. Authorized Use:

**a.** In accordance with Federal Statute 36 U.S.C. Section 40306, Civil Air Patrol shall have the sole and exclusive right to the name “Civil Air Patrol.”

**b.** The Civil Air Patrol name, seal and/or emblem will not be used for personal gain. Additionally, the name, seal and/or emblem will not be used for any commercial purpose, except under licensing agreement as approved by the Executive Director after review by General Counsel. The name may generally be used on:

- 1) Corporate vehicles, as prescribed in CAPR 77-1, *Operation and Maintenance of Civil Air Patrol Vehicles*.
- 2) CAP-owned aircraft and member-owned aircraft used for CAP business upon approval of the wing or region commander as appropriate. Such approval will be granted only where its use would reflect favorably upon CAP.
- 3) All official CAP publications (through squadron level).
- 4) All official CAP web pages (through squadron level).
- 5) Official invitations, greetings, and programs at national, regional, and wing levels.
- 6) Stationery of any CAP unit or authorized committee.
- 7) Membership cards issued by National Headquarters.
- 8) Signs identifying CAP units at all levels. Ensure that signs are attractively painted and well maintained.
- 9) Posters and other informational or recruiting materials issued by National Headquarters.
- 10) Civil Air Patrol business cards, using the member’s official CAP duty title.

11) Approval from National Headquarters (NHQ CAP/XPP) must be obtained to use the name for any purpose other than those listed above and to use the name in advertisements.

c. The CAP seal may generally be used on (**also see Table 1**):

- 1) Corporate vehicles as prescribed by CAPR 77-1 and any other directive or policy letters as issued.
- 2) CAP-owned equipment (base station radios, handheld radios, DF equipment, etc.) as prescribed by CAPR 67-1 and any other directive or policy letter as issued.
- 3) All official CAP publications (through squadron level).
- 4) All official CAP web pages (through squadron level).
- 5) Official invitations, greetings, and programs at national, regional, and wing levels.
- 6) Stationery of any CAP unit or authorized committee. Civil Air Patrol units below regional level are encouraged to use their wing shoulder patches on unit stationery. These may be used with or without the CAP seal. The name of the commander or the committee chair may appear on such stationery only during the period when the named individual holds such office. The CAP seal, if used, is always placed on the left side of the stationary with the other graphic placed on the right.

- 7) Membership cards issued by National Headquarters.
- 8) Signs identifying CAP units at all levels. Ensure that signs are attractively painted and well maintained.
- 9) Posters and other informational or recruiting materials issued by National Headquarters.
- 10) Civil Air Patrol business cards, using the member's official CAP duty title.

11) Approval from NHQ CAP/XPP must be obtained to use the seal for any purpose other than those listed above. Use of the seal in advertisements is prohibited.

d. The CAP emblem may generally be used on (**also see Table 1**):

- 1) Corporate aircraft (as prescribed by CAPR 66-1 and any other directive or policy letters as issued).
- 2) Member-owned vehicles used for CAP business upon written approval of the wing or region commander as appropriate. Such approval will be granted only where its use would reflect favorably upon CAP.
- 3) Privately-owned equipment.
- 4) CAP-owned or privately-owned equipment where use of the CAP seal is not authorized.
- 5) Posters and other items used in CAP displays.
- 6) All official CAP web pages (through squadron level).
- 7) Official invitations, greetings, and programs at National, regional, and wing levels.
- 8) All official CAP and personal stationary, signs, and business cards.
- 9) Unit informational materials.
- 10) Wing certificates and scrolls.
- 11) Insignia, jewelry, and similar articles when specifically authorized by NHQ CAP/XPP.

e. Any unit unique item such as coins, mugs, brochures, etc., containing the name, seal or emblem must be approved by the region or wing commander. Once approval is received, the initiating commander must contact the National Curator to determine if a sample should be placed in the National archives.

**Table 1. Use of Corporate Seal and Emblem**

<b>Resource</b>	<b>Corporate Seal</b>	<b>Corporate Emblem</b>
Corporate Aircraft	No	Yes
Member Provided Aircraft	No	No
Corporate Vehicle	Yes	No
Member Provided Vehicle	No	Yes*
CAP Publications	Yes	Yes
CAP Web Pages	Yes	Yes
CAP Stationary, Signs, Business Cards	Yes	Yes
Personal Stationary, Business Cards	No	Yes

\*Only during an official CAP activity or written authority by wing commander.

## SECTION B—USE OF AIR FORCE HAP ARNOLD SYMBOL

### 4. Policy.

The use of the Air Force “Hap Arnold” symbol is not permitted except as authorized herein.

### 5. Description.

The design of the Air Force “Hap Arnold” symbol (**Figure 3**) and its heraldic significance are set forth as follows:

**a. Upper half.** In the upper half, the stylized wings represent the stripes of Air Force strength—the enlisted men and women of the Air Force. They are drawn with great angularity to emphasize Air Force swiftness and power and are divided into six sections which represent Air Force core competencies—airspace superiority, global attack, rapid global mobility, precision engagement, information superiority, and agile combat support.

**b. Lower half.** In the lower half are a sphere, a star and three diamonds. The sphere within the star represents the globe. It reminds the Air Force of their obligations to secure our nation’s freedom with Global Vigilance, Reach and Power. The globe also reminds the Air Force of its challenge as an expeditionary force to respond rapidly to crisis and to provide decisive aerospace power, worldwide.

**c. Area surrounding the Sphere.** The area surrounding the sphere takes the shape of a star. The star has many meanings. Its five points represent the components of the Air Force one force and family—Air Force active duty, civilians, Guard, Reserve and retirees. The star symbolizes the space as the high ground of our nation’s aerospace force. The rallying symbol in all our wars, the star also represents the Air Force officer corps, central to Air Force combat leadership.

**d. The diamonds.** The star is framed by three diamonds, which represent Air Force core values—integrity first, service before self and excellence in all we do. The elements come together to form one symbol that presents two powerful images—at once it is an eagle, the emblem of our nation, and a medal, representing valor in service to our nation.

### 6. Authorized Use:

**a.** The symbol may be used without the logotype.

**b.** The Air Force symbol may be used to “cradle” some organizational emblems, see **Figure 4**.

**c.** Only organizational emblems (shields or patches) may be placed in this configuration. No other artwork or logotype may be used.

**d.** Organizational emblems must remain in the proportion and relationship illustrated in **Figure 4**.

**e.** Commanders may use the symbol effective immediately on “perishable” products and those involving limited expense, such as printed material, clothing, coins, etc. The symbol should not be applied at this time to other “nonperishable” uses such as aircraft and vehicles. Commanders retain discretion to decide how the symbol is used in their organizations, consistent with these guidelines.

**f.** For more information, go to <http://www.af.mil/airforcestory/guidelines.shtml>.

**Figure 3. Hap Arnold Symbol**

**Figure 4. Organizational Emblem**

## SECTION C—USE AND DISPLAY OF THE UNITED STATES FLAG AND CIVIL AIR PATROL FLAGS

### 7. Policy.

The flags described in this regulation are authorized for use in Civil Air Patrol.

### 8. Type of Flags Authorized for Use in CAP:

a. US Flags. The term “US flag,” as used throughout this regulation, means the flag of the United States of America. It includes both the “all-purpose flag” and the “ceremonial or organizational flag.” Uses of the US flag are covered in paragraphs 7 and 8.

1) All-Purpose Flag. Made of bunting, this flag is 5 feet hoist by 9 feet, 6 inches fly (see **Figure 5**). Flag may be made of cotton, nylon, printed or embroidered. Does not have fringe or cord with tassels.

2) Ceremonial Flag. Made of rayon banner cloth or heavyweight nylon, trimmed on three sides with or without golden yellow fringe, 2 1/2 inches wide. A golden yellow cord and tassels will be used if flag has fringe. This flag will be displayed or carried with unit and/or state flags of equal or smaller size. The flag measures 4 feet 4 inches hoist by 5 feet 6 inches fly.

3) Organizational Flag. Must meet same standards prescribed above. The standard military size of this flag is 3 feet hoist by 4 feet fly (see **Figure 6**). Optionally, units may purchase the more commonly available 3 feet hoist by 5 feet, 8 3/8 inches fly. Either organizational flag will be displayed or carried with unit and/or state flags of equal or smaller size. (The optional US flag meets the standards set by Executive Order 108334, August 21, 1959.)

4) Colors. The word “colors” when used by CAP will identify either the US all-purpose, ceremonial, or organizational flag.

Figure 5. US All-Purpose Flag

Figure 6. US Organizational Flag

### b. Civil Air Patrol Flags:

1) National CAP Flag. Made of rayon banner cloth or heavyweight nylon, the silver gray field measures 4 feet, 4 inches hoist by 5 feet, 6 inches fly and is trimmed on three sides with a 2 1/2 inch wide blue silk fringe. Cord and tassels of any color will not be used. The words “Civil Air Patrol” are inscribed on a scroll attached at the bottom of the shield. This flag will only be used when representing the national organization (see **Figure 7**). When this flag is displayed or carried, the US flag will be of equal or larger size.

2) CAP General Officer’s Flag. The flag used for CAP general officers will be made of royal blue rayon banner cloth or heavyweight nylon measuring 3 feet hoist by 4 feet fly trimmed on three sides with a 2 1/2 inch golden yellow fringe. Cord and tassels of any color will not be used. The eight inch CAP Seal will be placed in the upper left (hoist) corner, 4 inches from the hoist sleeve seam and 3 inches from the top of the flag. A 12 inch white star(s) will be 9 inches from the top of the flag and 10 1/2 inches from the fly of the flag with 1.5 inches between the two stars on the Major Generals flag (see **Figures 8 and 9**). All national commanders, current and former, are authorized to have this flag. Only the ranking general officer participating in the activity (seated on the dais) will have his or her flag posted. The general officer’s flag is to be kept with the grouping of flags (the American flag, the organizational flag, and the general officer’s flag) and the grouping is to be placed to the right of the speaker and can be placed directly behind the podium if space permits. Each general officer will be responsible for obtaining, keeping, and providing the flag as needed.

3) Civil Air Patrol Regional and Wing Flags. Made of rayon banner cloth or heavyweight nylon, the silver gray field measures 3 feet hoist by 4 feet fly and is trimmed on three sides with a 2 ½ inch wide blue silk fringe. The center design is the same as the national CAP flag except for the scroll beneath the shield, which contains the appropriate wing or region designation (see Figure 10) and the scroll above the center design which is white and bears the words “Civil Air Patrol” in red letters. Cord and tassels of any color will not be used. Flags are double sided and all lettering will read from left to right. These flags will be displayed and carried with US flags of equal or larger size. Optionally, the region flag may be equal in size as the US ceremonial flag, 4.33 feet hoist by 5.5 feet fly, but never larger. These flags will be used on ceremonial occasions when the region or wing organization is represented. Regions are authorized to use a lightweight flag for national competition.

4) Group and Squadron Flags. Made of ultramarine blue rayon banner cloth or heavyweight nylon measuring 3 feet hoist by 4 feet fly or 3 feet hoist by 5feet, 8 3/8 inches fly and is trimmed on three sides with a 2 1/2 inch wide blue silk fringe. Cord and tassels of any color will not be used. In the center is the basic CAP insignia; above the insignia is a white scroll with the group or squadron designation in red letters, and below it are the words “Civil Air Patrol” in red letters on a white scroll (see Figure 11). All lettering will read from left to right. These flags will be displayed and carried with the US flag of equal or larger size. Units will use these flags on all ceremonial occasions. *NOTE: Group or squadron designation should include full name and type of unit, i.e., “Maxwell Air Force Base Composite Squadron.” However, unit names too long for the space allotted maybe shortened, i.e., “Maxwell AFB Comp Sq.” Additionally, if abbreviations are required to shorten the name, only the following standard abbreviations for type of unit will be used: Comp Sq, Cdt Sq, Sr Sq, Gp.*

5) Guidons. Made of ultramarine blue wool bunting or a substitute synthetic material, swallow-tailed, and 1 foot, 8 inches hoist by 2 feet, 3 3/4 inches fly to end of swallowtail. Basic CAP insignia will be centered 8 7/8 inches from fork of swallowtail (see Figure 12). The unit charter number will be placed at the bottom, centered below the triangle. Encampments or special activities may prescribe their own wordage/numbering scheme for the top and bottom of the guidon using the basic CAP emblem as above. Cord and tassels of any color will not be used. Guidons with five digit charter numbers may be used until replacement is required.

Figure 7. National CAP Flag

Figure 8. CAP Major General Flag

Figure 9. CAP Brigadier General Flag

Figure 10. CAP Region and Wing Flag

Figure 11. CAP Group and Squadron Flag

Figure 12. CAP Squadron Guidon

6) Unit Award Streamers. Unit Citation, Squadron of Merit, and Squadron of Distinction award streamers are awarded by Civil Air Patrol National Headquarters and will be attached to the flagstaff in one of the manners described below. This applies to the squadron guidon if a squadron flag is not used.

a) Unit Citation Award Streamer. The Unit Citation award streamer is made of red rayon banner cloth or heavyweight nylon measuring 3 1/4 inches hoist by 37 inches fly to end of swallowtail with white 2 7/8 inch lettering.

b) Squadron of Merit Award Streamer. The Squadron of Merit award streamer is made of blue rayon banner cloth or heavyweight nylon measuring 4 1/4 inches hoist by 3 feet fly to end of swallowtail with gold 2 inch lettering.

c) Squadron of Distinction Award Streamer. The Squadron of Distinction award streamer is made of gold rayon banner cloth or heavyweight nylon measuring 4 1/2 inches hoist by 3 1/2 feet fly to end of swallowtail with blue 2 inch lettering.

#### 7) Flagstaffs.

a) Flagstaffs used for display of all flags in an office will be 8 feet in height by 1 1/4 inches in diameter. US flags may have a goldtone eagle at the top.

b) Ceremonial size flags (4 feet 4 inches hoist x 5 feet 6 inches fly) will be carried using flagstaffs that are 9 feet 6 inches in height by 1 1/4 inches. When carried, flags will have a flat military spearhead at the top of the flagstaff.

c) Organizational size flags (3 feet hoist x 4 feet fly or 3 feet hoist x 5 feet, 8 3/8 inches fly) will be carried on flagstaffs that are 8 feet in height by 1 1/4 inches in diameter. When carried, flags will have a flat military spearhead at the top of the flagstaff. *NOTE: Traditionally, Air Force spearheads are of chrome or silvertone with matching staff connectors and ferrules. It is recommended that when flagstaffs are a new or replacement purchase, Air Force type be obtained.*

d) Award Streamer Holder. A silver-plated ring attachment for award streamers that is available in two versions. For flagstaff with spears that separate immediately below the spearhead, the type shown in **Figure 13** with an inside diameter of 3/8 inch, may be used. For flagstaff with spears that separate at the bottom of the ornament ferrule, the type shown in **Figure 14** with an inside diameter of 7/8 inch, may be used; however, this type may be used for either ornament by placing ring over ornament ferrule. A unit having only a few streamers may remove the screw in ornament ferrule and replace it with eye screw and modify the streamer by removing the ribbon at across the hoist end of streamer, adding a grommet center top, and then attach to eye screw by a split ring or other method.

c. **Order of flag placement and other flags.** The US flag always holds the position of prominence when displayed. It is placed in the position of honor to the speaker's right as he/she faces the audience (observer's left.) If other flags are to be displayed with the US flag, they will be kept as a grouping and be displayed in the following order: The US flag, the organizational flag, and the general officer's flag. If region, wing and/or squadron flags are displayed they will be placed in rank order with the US flag first (to the observer's left) and the general officer's flag last (or to the right of the grouping.)

Other flags that may be carried during special events, include, in order: State/commonwealth, other organizational or commemorative flags.

**Figure 13. Streamer Holder with 3/8 inch Inside Diameter**

**Figure 14. Streamer Holder with 7/8 inch Inside Diameter**

## 9. Respect for US Flags:

a. The following signs of respect will be shown to the US flag at all times:

- 1) It will not be dipped to any person or thing. Military organizational flags, state flags, and civilian organizational and institutional flags are dipped as a mark of honor.
- 2) It will not be displayed with the union down, except as a signal of distress.
- 3) It will not be permitted to touch anything beneath it such as the ground, the floor, water, or any object.
- 4) It will not be carried flat or horizontally, but always aloft and free.
- 5) It will not be used as a drapery of any sort. It is never festooned, but always allowed to hang free. Bunting of blue, white, and red, always arranged with the blue above, the white in the middle, and the red below, should be used for covering a speaker's desk, for draping the front of a platform, and for decorating in general.
- 6) It will not be used as a covering for a ceiling.
- 7) No mark, insignia, lettering, emblem, figure, or design will be placed on the flag.
- 8) It will not be used as a receptacle for receiving or carrying any object.
- 9) It may form a distinctive feature of the ceremony of unveiling a statue or monument, but will not be used as the covering for the statue or monument.
- 10) Nothing will be placed on top of it when it is used to cover a casket. It will not be lowered into the grave.
- 11) It will not be used in any kind of advertising. It will not appear in any form on cushions, handkerchiefs, napkins, or boxers, nor be reproduced on anything designed for temporary use and discard. Neither will it be used as any part of a costume or athletic uniform. Advertising signs will not be fastened to a staff or halyard from which the US flag is flown.
- 12) It will not be draped over any part of a railroad train, boat, airplane, or any other vehicle.
- 13) It will not be fastened, displayed, used, or stored in a manner that will permit it to be easily torn, soiled, or damaged in any way.

b. **Folding the Flag.** After being detached from the halyard, the flag is folded as shown in **Figure 15**.

A and B—Holding the flag waist high, fold the lower striped section of the flag over the blue field.

C—The folded edge (the edge nearest the reader in B) is then folded over to meet the open edge.

D—A triangular fold is then started by bringing the striped corner of the folded edge to the open edge.

E—The outer point is then turned inward parallel with the open edge to form a second triangle.

F—The triangular folding is continued until the entire length of the flag is folded in this manner.

G—When the flag is completely folded, only the blue field should be visible and it should be folded in the triangular shape of a cocked hat.

**Figure 15. Correct Method of Folding US Flag**

**c. Ceremonial Destruction of the Flag.** A worn or faded flag should be retired with respect. Fold the flag and place it on a fire. The ashes should then be buried.

**10. Proper Use and Display of US “All-Purpose Flag”:**

**a. When Flown on a Stationary Flagpole.** When flown on a stationary flagpole, the US flag may be displayed from sunrise to sunset at CAP unit headquarters. It will be hoisted briskly and lowered ceremoniously.

**b. US Flag Displayed Over the Sidewalk.** When the US flag is displayed from a staff projecting from a windowsill, balcony, or front of a building, the union should be at the staff’s peak (unless the flag is to be displayed at half-staff). When suspended across a street, the flag should be vertical, with the union to the north in an east-west street or to the east in a north-south street. When suspended from a rope between a house and pole at the edge of a sidewalk, the flag should be raised out from the building toward the pole union first (see Figure 16).

**c. US Flag Displayed with Flags of Foreign Nations.** When flags of one or more nations are displayed with the US flag, each will be flown from a separate flagpole of the same height. International usage forbids the display of the flag of one nation above that of another nation in time of peace (see Figure 17).

**d. When Displayed without Staff.** When displayed other than on a staff, the flag will be placed flat—whether indoors or outdoors—or so suspended that its folds fall as freely as if it were on a staff. When displayed flat against a wall—either vertically or horizontally—the union will always be to the observer’s upper left (see Figure 18).

**e. US Flag with Flags of States, Cities, and Localities and with Pennants of Societies.** When displayed in a group with flags of states, cities, localities, or pennants of societies, the US flag will be at the center and at the highest point in the group (see Figure 19). When flags are flown from the same halyard, the US flag will always be at the peak. When flags are flown on adjacent flagpoles, the US flag will be hoisted first and lowered last. No other flag or pennant will be placed above or, if on the same level, to the right of the US flag.

**f. When Flown at Half-Staff.** When it is to be flown at half-staff, the US flag is first raised to the peak and then lowered to the half-staff position. When being lowered for the day, it should first be raised to the peak (see Figure 20).

**g. When Used to Cover a Casket.** When the US interment flag, 5 feet hoist x 9 feet 6 inches fly, is used to cover a casket, it should be placed so the union is at the head and over the left shoulder. The flag should not be lowered into the grave nor be allowed to touch the ground (see Figure 21).

Figure 18. US Flag Displayed without Staff

Figure 19. Displaying US Flag In A Group of Flags

Figure 20. US Flag Flown at Half-Staff

Figure 21. US Flag Covering Casket

### 11. Proper Use and Display of US “Ceremonial or Organizational Flag”:

**a. When Displayed in a Church, or in a Public Auditorium.** When displayed on a staff in a church or public auditorium, the US flag holds the position of prominence, in front of the audience. It is placed in the position of honor at the speaker’s right (see **Figure 22**) as they face the audience. If other flags are displays they will be placed in the order outlined in Section C, Paragraph c. This same rule applies whether the flag is on or off the platform.

**b. When displayed in an Office.** When the US flag is displayed in an office, it is placed to the right of the desk (observer’s left). Any other flag displayed at the same time will be placed to the observer’s right (see **Figure 23**).

**c. When Displayed from Crossed Staff.** When the US flag is displayed with another flag against a wall with staffs crossed, the US flag will be on the right (observer’s left) and its staff will be in front of that of the other flag (see **Figure 24**).

**d. When Carried in Ceremonies.** The US flag will be carried by a color guard on all occasions of ceremony in which two or more CAP squadrons participate. The US flag will appear to the right and the wing flag on the left (see **Figure 25**). All flags carried with the US flag in ceremonies will be of equal size to the US flag or smaller. See CAPR 52-16, *CAP Cadet Program Management*, for rule concerning color guard firearms.

**e. When US Flag is Carried in Procession with Other Flags.** When the US flag is carried in a procession with other flags, the US flag is either on the marching right or if there is a line of other flags, in front of the center of the line (see **Figure 26**).

**f. Bunting.** When bunting of blue, white, and red is used as a horizontal decoration, always arrange it with the blue above, the white in the middle, and the red below. If used in a vertical decoration, the blue area will be to the observer’s left (see **Figure 27**).

Figure 22. Display of US Flag in a Chapel or Auditorium

Figure 23. Display of US Flag in an Office

Figure 24. Display of Crossed Flags

Figure 25. Carrying Flags at Ceremonies

Figure 26. Position of Flags in Ceremonies

Figure 27. Bunting

**12. When Displayed on Occasion Not Covered Specifically in This Regulation.**

When the US flag is displayed with other flags, the US flag is always given the position of honor, which is the flag’s own right or an observer’s left. Any other flag displayed at the same time will be placed to the US flag’s own left.

**SUMMARY OF CHANGES.**

This revision updates Section A-Use of Civil Air Patrol Name, Seal and Emblem; adds Section B-Use of Air Force HAP Arnold Symbol; updates Section C-Use and Display Of The United States Flag and Civil Air Patrol Flags,adds CAP General Officer’s flags and deletes the ceremony for the Ceremonial Destruction of the United States Flag.
