

# Index of Drugs

See page 159 for  
Index of Topics

## A

abacavir (ABC)  
  hypersensitivity reaction, 55  
  liver function, 80  
  side effects, 56  
adefovir dipivoxil, 81  
amitriptyline, 119  
amprenavir (APV), 56, 98  
antibiotics, 56  
antidepressants, 118-119  
antipsychotics, 118  
antiretroviral therapy  
  adherence benefit, 49  
  antidepressant interactions, 119  
  case studies, 36-38  
  contraceptive interactions, 98  
  goals, 29  
  hepatotoxicity, 79  
  HIV prevention, 22  
  initial regimens, 30-31  
  metabolic complications, 39-45  
  OI incidence, 68  
  patient education, 8  
  PEP, 85-92  
  post-lactic acidosis, 44  
  during pregnancy, 101  
  prenatal exposure, 101  
  psychiatric symptoms, 115  
  regimen change, 31-32  
  starting criteria, 29-30  
  and substance abuse treatment, 111-112  
  symptoms management, 55  
  and vertical transmission, 99

anxiolytics, 120  
APV. *see* amprenavir (APV)  
ART. *see* antiretroviral therapy  
atazanavir (ATV)  
  lipid levels, 42  
  liver function, 80  
  side effects, 56  
atovaquone, 69  
AZT. *see* zidovudine (AZT)

## B

buprenorphine, 109  
bupropion, 119

## C

citalopram, 119  
clindamycin, 69  
clomipramine, 119

## D

dapsone, 69, 101  
ddC. *see* zalcitabine  
ddI. *see* didanosine  
desipramine, 119  
didanosine (ddI)  
  hyperlactatemia, 44  
  liver function, 80  
  in PEP, 91  
  side effects, 56  
doxepin, 119  
d4T. *see* stavudine

## E

- efavirenz (EFV)
  - and contraceptive interactions, 98
  - liver function, 80
  - during pregnancy, 98, 101
  - side effects, 56
- emtricitabine (FTC)
  - HBV treatment, 81
  - liver function, 80
  - side effects, 56
- enfuvirtide (ENF, T-20), 30

## F

- FAPV. *see* fosamprenavir
- fibrin acid derivatives, 42
- fluoxetine, 119
- fluvoxamine, 119
- fosamprenavir (FAPV), 56, 98
- FTC. *see* emtricitabine
- fusion inhibitors, 30

## I

- imipramine, 119
- indinavir (IDV)
  - liver function, 80
  - renal insufficiency, 82
  - side effects, 56
- interferon, 82

## L

- lamivudine (3TC)
  - HBV treatment, 81
  - liver function, 80
  - side effects, 56
- lopinavir (LPV), 56, 98

## M

- methadone, 111-112
- methamphetamines, 112
- mirtazepine, 119

## N

- nefazodone, 119
- nelfinavir (NFV)
  - and contraceptive interactions, 98
  - diarrhea, 63
  - side effects, 56
- nevirapine (NVP)
  - and contraceptive interactions, 98
  - lipid levels, 42
  - liver function, 80
  - in PEP, 91
  - side effects, 56
- NFV. *see* nelfinavir (NFV)
- NNRTIs (non-nucleoside reverse transcriptase inhibitors). *see also specific drugs*
  - initial regimens, 30-31
  - liver function, 80
  - metabolic complications, 39
- nortriptyline, 119
- NRTIs (nucleoside reverse transcriptase inhibitors). *see also specific drugs*
  - hyperlactatemia, 44
  - liver function, 80
  - metabolic complications, 39
  - side effects, 56
- nucleosides, 30
- NVP. *see* nevirapine

**P**

paroxetine, 119  
pentamidine, 69  
PIs (protease inhibitors)  
  diarrhea, 63  
  glucose metabolism, 45  
  initial regimens, 30  
  lipid abnormalities, 40  
  liver function, 80  
  metabolic complications, 39  
  methamphetamine interaction, 112  
  nausea, 56  
  during pregnancy, 101  
primaquine, 69

**R**

ribavirin, 82  
ritonavir (RTV)  
  contraceptive interactions, 98  
  lipid abnormalities, 40  
  side effects, 56

**S**

selective serotonin reuptake inhibitors  
  (SSRI), 112  
sertraline, 119  
stavudine (d4T)  
  hyperlactatemia, 44  
  lipid levels, 42  
  lipodystrophy, 43  
  liver function, 80  
  in PEP, 91  
  side effects, 56

**T**

3TC. *see* lamivudine  
tenofovir (TDF)  
  lipid levels, 42  
  liver function, 80  
  side effects, 56  
TMP-SMX, 69  
trazodone, 119  
trimetrexate, 69

**V**

venlafaxine, 119

**Z**

zalcitabine (ddC)  
  oral ulcers, 61  
  polyneuropathy, 58  
  side effects, 56  
zidovudine (AZT, ZDV)  
  liver function, 80  
  myopathy, 62  
  during pregnancy, 99-100
