## E. DATA DICTIONARY

This appendix includes the data definitions and descriptions for the data fields contained in the FCR Input and Output Transaction Layouts. Appendix G defines the Input Transaction Layouts. Appendix H defines the Output Transaction Layouts.

This appendix lists the data fields in alphabetic order. The following information is provided for each data field:

1. **Name** – The name of the field is provided as it appears on the input or output transaction layout description.
2. **Type** – If the field is an input field, output field or both.
3. **Condition** – If the field is required for specified inputs. Fields on input transactions are required, conditionally required or optional. Fields on the output transactions are described as required or conditional. Conditional fields are present based on the information received on the input or available on the FCR database.
4. **Length** – The size of the field on the record layout.
5. **Format** – If the field is alphabetic, numeric or alphanumeric.
6. **Values** – The acceptable values for the field.
7. **Description** – A narrative explanation of the data field.

The following pages include the data fields that are accepted and/or returned by the FCR.

Description	This is a code that is returned to the State to identify the types of errors that were detected in processing the transaction received from the submitter. There are two classifications of error codes: warning and rejection. A warning code indicates an error was detected but that it was not sufficiently critical to force rejection of the record. The rejection error code indicates that a critical error was detected and the record is rejected. The second position of the code is a ‘W’ for warning codes and an ‘E’ for rejection errors. See Appendix J, “Error Messages”, for a complete list of the error codes.

                    • FCR Person/Locate Request Acknowledgement/Error Record  
                    • FCR Person Reconciliation Record  
**Length**          1  
**Format**          Alphanumeric  
**Values**          C – The SSN submitted for this person was corrected.  
                    E – The SSN and Name combination submitted for this person could not be verified or corrected, but the additional person data provided identified an SSN for this person using SSA's ESKARI routines.  
                    N – The SSN and Name combination that was submitted for this person was not verified by SSA's SSN Verification Routines, but the Name Matching Routine has identified it as a probable name match.  
                    P – The SSN was not submitted, but the additional person data submitted identified an SSN for this person without manual intervention and is provided; or the SSN that was submitted did not pass verification edits but an SSN was identified using SSA's alpha search.  
                    R – The person data submitted identified multiple possible SSNs for the person. The provided SSN was selected via the Requires Manual Review process.  
                    S – The person data submitted identified an SSN for the person using the IRS-U SSN and IRS records.

V – The SSN and Name combination submitted was verified by the SSA SSN verification routines.  
 Space – The SSN provided could not be verified or there was no SSN provided. An SSN could not be identified using the information submitted. See the Error Code 1 through 5 fields for a more specific explanation of the condition.

**Description** This code indicates the results of the SSA’s SSN Verification for the person. The verification process uses the SSN and Name combination and/or person identification information submitted in an attempt to identify a verified SSN for the person.  
**Note:** If this field equals a space on the output record and the Acknowledgement Code equals ‘AAAAA’, the person has been accepted by the FCR as an unverified person and is not available for FCR Query, Proactive Matching or Locate processing.  
 If a State identifies a new SSN or additional name information that can be used to verify the SSN, States submit the new SSN or additional name information as a ‘Change’ Transaction.  
 If the Acknowledgement Code equals ‘REJCT’, the person has been rejected by the FCR and this field is a space.  
 If the State finds a new SSN for the rejected person, the person must be resent as an ‘Add’ Transaction.
