PUBLICATION 1436 (Rev. 10/2007) UPDATE #2
October 24, 2007

On pages 3, 4 and 7 of Publication 1436, the valid range for Primary SSNs to be used during PATS testing should read as 400-00-1001 through 400-00-1038. The spouse/dependent SSNs are not hard coded, and therefore, will not create reject issues.

On page 5, under the heading Communications Test For The *e-file* System, the EMS sites were transposed. ECC-MTB hosts Andover, Austin and Philadelphia, and ECC-MEM hosts Kansas City and Fresno.

Test #3 – pg. 11
Taxpayer's SSN 400-00-1003
Dependent's SSN 400-00-2003 (omitted from update #1)
