BLM, and all involved
in the WORP - primarily
the timber industry and
the Bush administration.

At a time when the
majority of people in
Oregon strongly support
the protection and preservation
of our state's most treasured
natural resources - our
forests and their ecosystem,
you come up with a plan
to destroy all this and plant
tree farms.

You know there are proven
better ways. The only explanation
for what you are doing is
buy off, graft, and unethical
practices, disregarding completely
this precious environment and
the planet.
