Dear Sirs,

I was appalled to read of the changing of the criteria to have a "Made in USA" label on a product. This will cause confusion to consumers; cost jobs in America and subsidise a lower standard of living in other countries.

The American working man has already been sold out by GATT, ~~NAFTA~~ and other disastrous trade agreements. Lets at least be able to buy "Made in USA" products that are actually made in the USA.

A product deserves the "Made in USA" label only if it is 100% U.S. made.

Thank you,  
Sincerely,

Thomas Dunn
