### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. Average yield per acre, at 54.9 bushels, is down 1.0 bushel from August and down 3.3 bushels from 2001. The area harvested for grain is estimated at 4.14 million acres, down 8 percent from August and 4 percent below a year ago, and is the lowest level since 1898.

### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. Average yield per acre, at 54.9 bushels, is down 1.0 bushel from August and down 3.3 bushels from 2001. The area harvested for grain is estimated at 4.14 million acres, down 8 percent from August and 4 percent below a year ago, and is the lowest level since 1898.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. Average yield per acre, at 54.9 bushels, is down 1.0 bushel from August and down 3.3 bushels from 2001. The area harvested for grain is estimated at 4.14 million acres, down 8 percent from August and 4 percent below a year ago, and is the lowest level since 1898.

### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. Average yield per acre, at 54.9 bushels, is down 1.0 bushel from August and down 3.3 bushels from 2001. The area harvested for grain is estimated at 4.14 million acres, down 8 percent from August and 4 percent below a year ago, and is the lowest level since 1898.

### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. ### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. ### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. ### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. Average yield per acre, at 54.9 bushels, is down 1.0 bushel from August and down 3.3 bushels from 2001. The area harvested for grain is estimated at 4.14 million acres, down 8 percent from August and 4 percent below a year ago, and is the lowest level since 1898.

### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. Average yield per acre, at 54.9 bushels, is down 1.0 bushel from August and down 3.3 bushels from 2001. The area harvested for grain is estimated at 4.14 million acres, down 8 percent from August and 4 percent below a year ago, and is the lowest level since 1898.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. Average yield per acre, at 54.9 bushels, is down 1.0 bushel from August and down 3.3 bushels from 2001. The area harvested for grain is estimated at 4.14 million acres, down 8 percent from August and 4 percent below a year ago, and is the lowest level since 1898.

### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. Average yield per acre, at 54.9 bushels, is down 1.0 bushel from August and down 3.3 bushels from 2001. The area harvested for grain is estimated at 4.14 million acres, down 8 percent from August and 4 percent below a year ago, and is the lowest level since 1898.

### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. ### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937. ### VIRGINIA'S BARLEY PRODUCTION UP FROM 2001

The September crop survey conducted by the Virginia Agricultural Statistics Service indicated barley yields averaged 77 bushels per acre. This is up 3 percent compared to last year's 75 bushels per acre. Barley production is estimated at nearly 3.08 million bushels. Barley acres harvested was forecasted at 40,000 acres, down 20 percent from last year's 50,000 acres.

Winter Wheat producers averaged 63 bushels, up 3 bushels from last year. The survey indicated wheat production at 10.7 million bushels, up 5 percent from last year. Wheat acres harvested was reported at 170,000 acres, unchanged from last year.

### U.S. SMALL GRAIN HIGHLIGHTS

U.S. **all wheat** production totaled 1.62 billion bushels in 2002, down 4 percent from the last forecast and 17 percent below 2001. This is the lowest production since 1972. Grain area is 46.0 million acres, down 5 percent from last year and the smallest area harvested since 1970. The U.S. yield is 35.3 bushels per acre, down 4.9 bushels from a year ago.

U.S. **barley** production is estimated at 227 million bushels, down 10 percent from the August forecast and down 9 percent from last year's estimate. This year's production is the lowest since 1937.
