

Comment Info: =====

General Comment: I am a believer of buying local produce and these in general are from small farms in the area. This bill being proposed would put these farmers out of business. While I realize the need for healthy produce it seems only sensible that you look into the BIG business growers. The spirit of America is being destroyed by bills like this to control to the point of destroying the family farm. These small farmers have ties to our community and therefore care about us, their neighbors and consumers!
