System Description: *The ST1400/1800 controllers are electronic tank gauging devices used for leak detection and inventory management. The controllers can collect level and density data from 4 (ST1400) or 8 (ST1800) ultrasonic inventory sensors and compute various volumetric quantities, correcting all volumes for temperature. The systems have programmable alarm thresholds to alert the operator of various alarm conditions. The system is also capable of storing at least the last 33 events of any particular report. The ADD (accumulative data diagnostics) option adds the capability of continuous leak detection (not 3rd partied). The ST1401/1801 systems add sensor monitoring for interstitial areas, wells and sumps. The ST1400L/1800L add the capability of line leak detection with positive pump shut down.*

Certification: **TANKS:** 0.2 & 0.1 gph **PIPING:** 3, 0.2 & 0.1 gph

Capacity: **TANKS:** Max. 18,000 gal **PIPING**: Max. 55.1 gal

Test Period: (W/o ADD) Min. 2.5 hrs with tank 50 - 95% full (0.2 gph)
95 - 100% full (0.1 gph)

Limitations:
- No dispensing or delivery during test (w/o ADD)
- Not evaluated using manifolded tanks

Revised - 12/29/98
