#### **INTRODUCTION**

The Food Security Act (FSA) of 1985, which eased the eligibility requirements in the Food Stamp Program, allowed many previously ineligible households to pass the program's resource test. The asset limit for nonelderly households increased from \$1,500 to \$2,000. For elderly living alone, the asset limit increased from \$1,500 to \$3,000. Although the Food and Nutrition Service (FNS) of the U.S. Department of Agriculture sponsored a study of the asset holdings of food stamp participants and nonparticipants using data from 1985 (Quinn, 1992), interest in asset holdings under the current program rules prompted the agency to undertake a new study of asset holdings. As part of that study, FNS contracted with **Mathematica** Policy Research (MPR) to update the tables in the earlier report using data from 1988. The updated tables are presented in this report, reflecting current program provisions, as well as more recent data.

As in the previous report, data for the tables in this report come from the Survey of Income and Program Participation (SIPP). The 1986 Panel Wave 7 and 1987 Panel Wave 4 of SIPP were combined to produce a file describing food stamp eligibility of households in January 1988 (Mathematica Policy Research, 1991). The total number of households on the file is 18,870. This report uses the same eligibility groups and assets as those used and described in Quinn (1993). Asset definitions are reproduced in Table 11.1. Likewise, the same limitations of methodology and data generally apply.

The tables in this report are presented such that they can easily be compared with their predecessors. Table numbers, titles, and formats have been retained. However, since the purpose of this report is to update only the tables that provide information about asset holdings, not all tables from the previous report are replicated. Another difference is that the tables that, in the previous report, contained both 1979 data from Bickel and MacDonald (1981) and 1985 data have been expanded in this report to present data from 1988 as well.

## TABLE II.1

## TYPES OF ASSETS

Asset	Definition
Checking Account	Balance in own or joint checking account
Interest-Bearing Account	Balance in interest-bearing accounts, such as savings or checking accounts
Savings Bond, IRA, Keogh, Amounts Due, Other Income- Producing Assets	U.S. savings bonds; individual retirement accounts; Keogh accounts; money owed to someone in the household from the sale of a business or property; other income-producing assets, such as stocks, bonds, trusts, or royalties
Vehicle (fair market value)	Blue book value of vehicles owned by the individual or household
Vehicle (equity)	Equity in vehicles owned by the individual or household (blue book value minus existing loans to be paid off)
Business, Non-Income-Producing Property Other Than Home	Equity in a business or in non-income-producing property other than the principal residence
Home	Equity in the principal residence of the household
Rental Property	Equity in rental property, such as houses, apartments, condominiums, or other commercial property
Life Insurance	Face value of life insurance policies

SOURCES: 1979 data are from **Bickel** and McDonald (1981); 1985 data are tabulations from the August 1985 analysis file developed from 1984 and 1985 panels of SIPP; 1988 data are tabulations from the **January** 1988 analysis file developed from 1986 and 1987 panels of SIPP.

The 1985 distributions in this table are adjusted for the 53.0 percent increase in the Consumer Price Index from April 1979 to August 1985, and will differ from nonadjusted distributions in other tables. Likewise, the 1988 distributions are adjusted for the 63.9 percent increase in the Consumer Price Index from April 1979 to January 1988.

Analysis of changes in the asset holdings of food stamp households should include consideration of changes in the FSP asset limit. In 1979 the asset limit was \$3,000 for elderly households with at least two members and \$1,750 for all other households. In 1985 the limit was the same for elderly households with at least two members but was reduced to \$1,500 for other households. In 1988 the asset limit had changed to \$3,000 for all elderly households and \$2,000 for all nonelderly households.

#### <sup>a</sup>Equity.

NOTES:

<sup>&</sup>lt;sup>b</sup>Except the home.

<sup>&#</sup>x27;Households who reported owning a vehicle, but did not report enough information to compute equity.

SOURCES:

1979 data are from **Bickel** and McDonald (1981); 1985 data are tabulations from the August 1985 analysis file developed from 1984 and 1985 panels of **SIPP**; 1988 data are tabulations from the **January** 1988 analysis file developed from 1986 and 1987 panels of SIPP.

NOTE:

The 1985 distributions in this table are adjusted for the 53.0 percent increase in the Consumer Price Index from April 1979 to August 1985, and will differ from nonadjusted distributions in other tables. Likewise, the 1988 distributions are adjusted for the 63.9 percent increase in the Consumer Price Index from April 1979 to January 1988.

Analysis of changes in the asset holdings of food stamp households should include consideration of changes in the FSP asset limit. In 1979 the asset limit was \$3,000 for elderly households with at least two **members** and \$1,750 for all other households. In 1985 the limit was the same for elderly households with at least two members but was reduced to \$1,500 for other households. In 1988 the asset limit had changed to \$3,000 for all elderly households and \$2,000 for all nonelderly households.

This column includes households that reported owning a home but did not report enough information for equity to be computed.

SOURCES:

1985 data are tabulations from the August 1985 analysis file developed from 1984 and 1985 panels of SIPP; 1979 data are from **Bickel** and McDonald (1981); 1988 data are tabulations from the January 1988 analysis file developed **from** 1986 and 1987 panels of SIPP.

NOTES:

The 1985 distributions in this table are adjusted for the 53.0 percent increase in the Consumer Price Index from April 197'9 to August 1985, and will differ from the nonadjusted distributions in other tables. Likewise, the 1988 distributions are adjusted for the 63.9 percent increase in the Consumer Price Index from April 1979 to January 1988

Analysis of changes in the asset holdings of food stamp and income-eligible/asset-ineligible households should include consideration of changes in the FSP asset limit. In 1979 the asset limit was \$3,900 for elderly households with at least two members and \$1,750 for all other households. In 1985 the limit was the same for elderly households with at least two members but was reduced to \$1,500 for other households. In 1988 the asset limit had changed to \$3,000 for all elderly households and \$2,000 for all nonelderly households.

<sup>&</sup>lt;sup>a</sup>This category consists of balances in checking and/or savings accounts; for 1979, it also includes cash on hand, which was not available for 1985 or 1988.

TABLE VI.5

REASONS FOR THE INELIGIBILITY OF INCOME-ELIGIBLE/ASSET-INELIGIBLE HOUSEHOLDS, 1988

Reason for Ineligibility of Income-Eligible/Asset-Ineligible Households	Number of Households in Thousands	Percent of Households
Countable Assets Excluding Vehicles Exceed the Asset Limit	3,883	78.7
No countable vehicle assets Countable vehicle assets within the asset limit Countable vehicle assets also exceed the asset limit	2,074 843 966	42.0 17.1 19.6
Countable Vehicle Assets Exceed the Asset Limit	1,858	37.7
No countable assets excluding vehicles Countable assets excluding vehicles within the asset limit Countable assets excluding vehicles also exceed the asset limit	228 663 966	4.6 13.4 19.6
Countable Vehicle Assets and Other Countable Assets Separately Fall Within the Asset Limit, But Together Exceed the Asset Limit	158	3.2
Total	4,932 <b>a</b>	100.0 a

<sup>&</sup>lt;sup>a</sup>Household counts do not add to 4,932 thousand and percentages do not add to 100 because 966 households whose countable assets excluding vehicles exceed the asset limit, and whose countable vehicle assets also exceed the asset limit, appear in two rows.
