**Technical comments:**<sup>3</sup>

The Commission suggests that the article description on page 1 of this report be used in the proposed new heading in order to provide the correct chemical name.

The Commission notes that the article description in this bill is chemically identical to the proposed duty suspensions in H.R. 2026 and H.R. 2028. The only difference is that H.R. 2026 and H.R. 2028 include identifiers in the chemical name to denote optical activity. H.R. 2246 represents the combination of both isomers, so that these chemicals may be imported under a single duty suspension provision, in order to provide for easier administration by U.S. Customs.

In the event that H.R. 2246 is enacted, the Commission notes that H.R. 2026 and 2028 would be unnecessary.

---

<sup>3</sup> The Commission may express an opinion on the HTS classification of a product to facilitate consideration of the bill. However, by law, only the U.S. Customs Service is authorized to issue a binding ruling on this matter. The Commission believes that the U.S. Customs Service should be consulted prior to enactment of the bill.
