Subject: Keep FMLA

Please don't scale back or cut FMLA. This benefit doesn't hurt businesses and helps families tremendously. Only women who have had children know that time is needed during the beginning months of caring for a new life to bond and care for a new baby. I'm getting ready to have my first baby and I want to have the option of taking extra time off from work if needed.

Don't take this away from us.

Sincerely,
Josie Marsh
Elkton, MD
