

**Table 6. Logistic Regression Results: Odds Ratios of Reporting Multiple Origin by Sex, Age, Race, Form Type and Tenure for the United States: 2000.**

Characteristics	Reporting Multiple origins	Odds ratio	Probability
<b>Population size</b>	<b>1,001,344</b>		
Intercept <sup>1</sup>	-6.9761		
<b>Gender</b>			
Female	-0.0273	0.97	0.0001
Male (Ref)			
<b>Age</b>			
< 35	0.6026	1.83	0.0001
35+ (Ref)			
<b>Race</b>			
Two or more races	1.7836	5.95	0.0001
Single race (Ref)			
<b>Form type</b>			
Mail	0.8716	2.39	0.0001
Other (Ref)			
<b>Tenure</b>			
Renter	0.5325	1.70	0.0001
Owner (Ref)			
Likelihood ratio chi-square	530314		
Probability of chi-square	0.0001		
Degrees of freedom	5
