## Descriptive Report

This topography was for the purpose of furnishing new shore line for the hydrographic sheet. The New York Central & Hudson River R.R. was made the limit of the work on the east side and the river road from Putnam to Hook Mt. on the west side. Beyond these limits on both sides the river is lined with summer residences and grounds entailing a very large amount of work to survey.

On account of bad weather and a short season the <sup>sheet</sup> work could not be completed.
