

Comment Info: =====

General Comment: We buy and eat organic vegetables through a community supported agriculture farm. We believe small scale sustainable farming is very important to the future of agriculture in the US. Our CSA farm is biodynamic. Some of the regulations proposed on leafy greens in AMS-FV-07-0090 are against biodynamic principles. My family believes very strongly that requiring all growers to use these handling methods will reduce the quality of our food and the quality of the environment our food comes from.

Methods that are appropriate for large scale farms (factory farms) are not appropriate for small local farms. Please do not hurt our food source. Exempt small farms producing for local people from these regulations. We like our greens just the way we get them.

Thank you for your attention to this matter and to the opinions of consumers like us.

Best regards,

Lali Watt and family
Wilmette IL
