Office of Deputy Director for Intelligence President's Analytic Support Staff

## Briefer's Tasking for Richard Cheney on 02/13/2002

Briefer: David D. Terry Principal:

22

ng WASHER

**Briefing Date:** 02/13/2002

### Attendees:

**Richard Cheney** 

#### Tasking:

The VP was shown an assessment (he thought from DIA) that Iraq is purchasing granium from Africa. He would like our assessment of that transaction and its implications for Iraq's nuclear program. A memo for tomorrow's book would be great.

Tasking met: No

## Memorandum for the Vice President

PAR WARPPERT

In response to your question on the possible sale of uranium from Niger to Iraq and its implications for Baghdad's nuclear program:

We have tasked our clandestine sources with tigs to the Nigerien Government and consortium officials to seek additional imprenation on the contract. We also are working with the Embassy and the defense attache's office in Niamey to verify their reports.

If converted to feed material and enriched, 500 tons of yellowcake could be used to produce enough weapons-grade material for **section and an anti**to our assessment of Iraq's nuclear weapons program, Iraq could produce enough fissile material for a nuclear weapon by mid-decade if it obtains significant foreign assistance

 The IAEA says Iraq already has some 550 tons of yellowcake—200 tons of which were purchased in 1978 from Niger abut the material remains in sealed containers subject to aprical IAE sinspection.

 The IAEA conducted its most recent inspection last month and has officially verified that the container seals were intact.
