POLICY JUSTIFICATION

Israel- JP-8 Aviation Jet Fuel

The Government of Israel has requested a possible sale of JP-8 aviation jet fuel. The estimated cost is \$210 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been, and continues to be, an important force for political stability and economic progress in the Middle East.

The proposed sale of the JP-8 aviation fuel will enable Israel to maintain the operational capability of its aircraft inventory. The jet fuel will be consumed while the aircraft is in use to keep peace and security in the region. Israel will have no difficulty absorbing this additional fuel into its armed forces.

The proposed sale of this JP-8 aviation fuel will not affect the basic military balance in the region.

The Defense Energy Supply Center is unable is unable to identify the vendors at this time due to the competitive bid process for the supply sources(s). There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Israel.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

- (viii) Date Report Delivered to Congress:

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Australia – MK 41 Vertical Launch Systems

The Government of Australia requested a possible sale of up to three (3) MK 41 Vertical Launch System Baseline VII ship sets (includes 24 modules), modification of up to three (3) MK 7 AEGIS Weapon Systems, U.S. Government and contractor engineering and logistics personnel services, personnel training and training equipment, support and test equipment, spare and repair parts, publications and technical documentation, launch system software development and maintenance and other related elements of logistics support. The estimated cost is \$1 billion.

Australia is one of our most important allies in the Western Pacific. The strategic location of this political and economic power contributes significantly to ensuring peace and economic stability in the region. Australia's efforts in operations Iraqi and Enduring Freedom peacekeeping and humanitarian operations have made a significant impact to regional political and economic stability and have served U.S. national security interests. This proposed sale is consistent with those objectives and facilitates burden sharing with our allies.

The proposed sale of Vertical Launcher Systems and modification of the AEGIS Weapons Systems to Australia will contribute to U.S. security objectives by providing a coalition partner with significantly improved Air Warfare capability. This will improve the Royal Australian Navy's ability to participate in coalition operations, will provide common logistical support with the U.S. Navy, and will enhance the lethality of its Air Warfare Destroyer platform. The Royal Australian Navy can easily integrate the capabilities of the AEGIS Weapons Systems into their concept of operations. Australia will have no difficulty absorbing these systems into its armed forces.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The principal contractors will be:

Lockheed Martin Maritime Systems and Sensors (two locations)
Raytheon Corporation, Equipment Division
General Dynamics, Armament Systems

Moorestown, New Jersey Eagan, Minnesota Andover, Massachusetts Burlington, Vermont

There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of three contractor representatives in Australia for approximately 36 months during the preparation, equipment installations, and equipment test and checkout of the MK 41 Vertical Launch Systems on the ships.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 06-41

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

- 1. The MK-41 Vertical Launch Systems (VLS) contain sensitive technology and are Unclassified. The Launch Control Computer Program (LCCP), which also contains missile launch rates, is classified Confidential. The LCCP provides the control and processing to interface the Weapon Control System with the VLS. Sections of the MK-41 technical documentation, which disclose launcher vulnerabilities, are classified Confidential.
- 2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.
