

8/21

OFFICE OF THE UNDER SECRETARY OF DEFENSE
3000 DEFENSE PENTAGON
WASHINGTON, DC 20301-3000

ACQUISITION
TECHNOLOGY
AND LOGISTICS

AUG 15 2006

The Honorable Stephen Johnson
Administrator, United States Environmental Protection Agency
1200 Pennsylvania Avenue, NW, MC0001
Washington, DC 20460-0001

Dear Mr. Johnson:

Pursuant to Section 1528(b) of the Underground Storage Tank Compliance Act of 2005, enclosed is the report concerning the Department of Defense (DoD) underground storage tank (UST) compliance strategy. This report includes data from the Army, Marine Corps, Navy, Air Force, and the Defense Logistics Agency on USTs owned by or operated on DoD installations, as well as for those non-DoD owned or operated USTs located on DoD installations. As this report details, DoD continues to make progress in its environmental compliance programs.

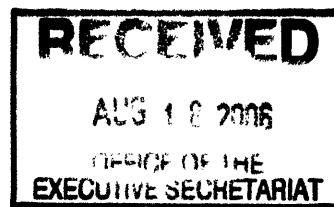

A similar letter has been provided to the Committee on the Environment and Public Works of the Senate and the Committee on Energy and Commerce of the House of Representatives. If you or your staff have any further questions or need additional information, please contact Mr. Edmund D. Miller at (703) 604-1765 (e-mail: edmund.miller@osd.mil).

Sincerely,

Philip W. Grone
Deputy Under Secretary of Defense
(Installations and Environment)

Enclosure:
As stated

Dave Kling – EPA

Department of Defense Underground Storage Tank Compliance Strategy Report

Office of the Deputy Under Secretary of Defense
(Installations & Environment)

August 2006

Report to Congress and EPA

TABLE OF CONTENTS

Underground Storage Tank Compliance Strategy Report

Introduction

Guidance for Developing
UST Report

Data Collection Overview

DoD Summary

Appendix A: Compliance Status of DoD Component USTs

Appendix B: Army Data

Appendix C: Marine Corps Data

Appendix D: Navy Data

Appendix E: Air Force Data

I. Introduction

The Energy Policy Act of 2005, Public Law 109-58, was signed by the President on August 8, 2005. Title XV, Subtitle B, established the Underground Storage Tank Compliance Act (UST Compliance Act) of 2005. Section 1528 (b) of the UST Compliance Act requires, within one year, “each Federal agency that owns or operates one or more underground storage tanks, or that manages land on which one or more underground storage tanks are located, shall submit to the Administrator, the Committee on the Energy and Commerce of the United States House of Representatives, and the Committee on the Environment and Public Works of the Senate a compliance strategy report that:

- this (A) Lists the location and owner of each underground storage tank described in paragraph;
- (B) Lists all tanks that are not in compliance with this subtitle that are owned or operated by the Federal agency;
- each (C) Specifies the date of the last inspection by a state or Federal inspector of underground storage tank owned or operated by the agency;
- (D) Lists each violation of this subtitle respecting any underground storage tank owned or operated by the agency;
- other (E) Describes the operator training that has been provided to the operator and persons having primary daily onsite management responsibility for the operation and maintenance of underground storage tanks owned or operated by the agency; and
- for (F) Describes the actions that have been and will be taken to ensure compliance each underground storage tank identified under subparagraph (B).

This UST Compliance Strategy Report provides information about location, compliance status, regulatory inspections, violations, operator training, and follow-up actions of USTs owned or operated by Department of Defense (DoD) Component installations and for those not owned or operated by the DoD Component installations but located on DoD property. The DoD inventory information is summarized in this report. The DoD Component data are summarized in Appendix A. Appendices B through E contain the actual DoD Component data.

II. Guidance for UST Compliance Strategy Report

While developing this report, DoD consulted U.S. Environmental Protection Agency’s (EPA) “Guidance for Underground Storage Tank Compliance Act 2005 Federal Facility Compliance Reporting,” which established criteria for defining and reporting compliance data for federal agencies. There are several key guidelines that DoD used to develop this report.

- A. Definition of USTs:** This report includes “federally” regulated USTs as defined in regulation 40 CFR 280.12 except for USTs excluded in 40 CFR

280.10(b) and 40 CFR 280.10(c).

B. DoD Component USTs: This report includes those USTs owned or operated, or on lands managed by the Military Services (Army, Marine Corps, Navy, and Air Force). USTs owned or operated by the Defense Logistics Agency (DLA) are included in the inventory for the Military Service that owns the real property. The Army inventory in Appendix B includes 166 state owned and operated Army National Guard USTs that are not located on DoD property. These are not included in the DoD summary tables (Section IV and Appendix A) because they are not DoD owned or operated. Army Corps of Engineers USTs are not included in the Army inventory, as a separate report will be submitted. Army and Air Force Exchange Service USTs are reported in accordance with their respective Military Service location; USTs on Army installations are reported in Appendix B and USTs on Air Force installations are reported in Appendix E. Navy Exchange Services USTs are also reported in accordance with their respective Military Service location. Navy Exchange Services USTs on Marine Corps installations are reported in Appendix C and USTs on Navy installations are reported in Appendix D.

C. Non-Compliance Status: The date of March 31, 2006 was selected to provide a snapshot in time to determine the compliance status for each DoD UST. In addition, Army data included the compliance status of 46 Army owned/ operated USTs that were inspected after March 31, 2006. The non-compliance status of each UST was determined based on the last inspection of the UST and the status of any non-compliance.

III. Data Collection Overview

DoD Component data to support the requirements of the UST Compliance Act were collected from the Army, Marine Corps, Navy, Air Force, and DLA. Appendices B through E provides DoD's Component data on:

- UST Installation Name and Location
- UST Identification Number
- Owner and Operator
- Date of UST Inspection
- UST Status as of March 31, 2006
- Prevalent Violations
- Actions Taken for USTs Out of Compliance
- Action Status for USTs Out of Compliance

The DoD operator training is summarized in Section IV. C.

IV. DoD Summary

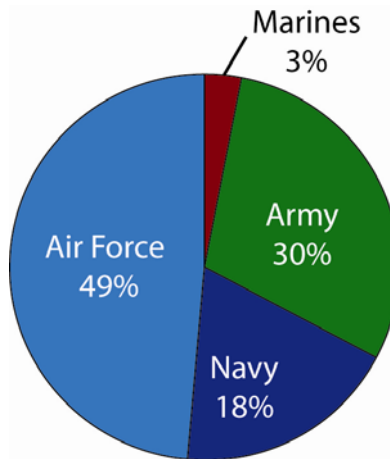

This Section contains a summary of the federally regulated USTs located on DoD Component property, DoD owned/operated UST compliance status, and UST-related training. Detailed data collection results for the DoD Components are presented in the Appendices.

A. USTs Owned or Operated By DoD

Figure 1 and Table 1 show the distribution of USTs owned or operated by each DoD Component. There are 4,355 USTs on DoD property, and 4,314 are owned or operated by DoD. USTs operated by DLA are accounted for in the Army data.

Out of the 4,355 USTs on DoD property, 41 are owned or operated by other non-DoD entities. Thirty-eight are non-federally owned and three are owned by another federal agency. One Navy non-DoD federal UST is owned by the U.S. Department of Energy at Naval Region Hawaii, one Air Force non-DoD federal UST is owned by the Federal Aviation Administration at Otis Air National Guard Base, Massachusetts, and one Marine Corps non-DoD federal UST is owned by the Federal Bureau of Investigation at Marine Corps Base Quantico, Virginia.

Figure 1. DoD-Owned or Operated USTs

Total: 4,314

Table 1

DoD USTs			
Component	Total on Component Property	DoD-Owned/Operated	Non-DoD Owned/Operated
Army	1,286	1,255	31
Marine Corps	143	136	7
Navy	812	811	1
Air Force	2,114	2,112	2
DoD Total	4,355	4,314	41

B. UST Compliance Status

The current compliance status of DoD Component USTs is based on regulatory inspections on or before March 31, 2006.

DoD has established three levels of compliance status for its USTs.

1. Compliance - Tanks inspected prior to March 31, 2006, and determined to be in compliance with state and federal regulations and having no written non-compliance record, or no unresolved non-compliance issues from the last regulatory inspection.
2. Non-compliance - Tanks inspected prior to March 31, 2006 and determined to be in non-compliance, based on the following unresolved written regulatory notices: a non-compliance checklist, a non-compliance letter, a Notice of Violation (NOV), or a warning letter.
3. Not inspected - Tanks that have not been inspected are not considered either in or out of compliance.

Table 2 displays the total number of DoD USTs inspected on or before March 31, 2006. Seventy percent of the DoD USTs were inspected at least once by either a federal, state, or local regulatory agency.

Table 2

DoD UST Regulatory Inspection Status				
Total DoD Owned/Operated	Total Inspected	Percent Inspected	Total Not Inspected	Percent Not Inspected
4,314	3,021	70%	1,293	30%

Table 3 shows the total number and percentage of the inspected USTs and their compliance status as of March 31, 2006. Summary details on the compliance status for each DoD Component UST are in Appendix A.

Table 3

Compliance Status for Inspected DoD USTs				
Total Inspected	Total In Compliance	Percent In Compliance	Total Out of Compliance	Percent Out of Compliance
3,021	2,956	98%	65	2%

Of the USTs inspected by a regulatory agency, 65 USTs (2%) are out of compliance as of March 31, 2006. For these USTs, 19 are awaiting regulatory approval for completion, 35 are in the process of completing actions, and 11 have projects waiting final approval. Of the 2% of USTs that are out of compliance the following most frequent violations in order of occurrence within DoD are: (1) recordkeeping, (2) piping release detection, and (3) reporting violations. Each DoD Component is working to ensure that actions are taken to address violations at their installations. Compliance actions for 15 of the 65 USTs are removal or closure. More detailed information on the specific actions taken for each DoD Component UST out of compliance is available in the appendices.

C. UST Training Summary

The management and operation of USTs at DoD installations are typically performed by a professional team, rather than a single individual. Team members include facility operators and managers, environmental staff and management, and other technical support and incident response personnel. There may be considerable variations regionally, by installation, and depending on the scope and nature of UST operations. Training also varies in response to differences in State regulatory requirements. Training requirements of team members are dependent on operational needs, but typically include leak detection training, hazardous material handling training, and release response and corrective action training.

UST operators normally receive on-the-job training at a minimum to cover basic operations for filling, spill and overfill control, spill response, and recordkeeping. Operations may be detailed in formal, written, standard operating procedures depending on the size and complexity of operations.

Depending on the scope and nature of operations, on-site staff may be supplemented by personnel from other departments, regional personnel, and outside expertise, especially for specialized requirements such as spill response, fire protection and response, corrosion control, maintenance, spill prevention and countermeasures control planning and inspection, and leak detection and testing.

D. DoD UST Points of Contact

Department of Defense

Edmund D. Miller

Appendix A: Compliance Status of DoD Component USTs

Table A-1 displays the total number of DoD owned or operated USTs by each DoD Component and the total number of USTs inspected on or before March 31, 2006.

Table A-1

DoD Component UST Regulatory Inspection Status			
	Total Owned/Operated USTs	Total Inspected	Percent Inspected
Army	1,255	966	77%
Marine Corps	136	135	99%
Navy	811	649	80%
Air Force	2,112	1,271	60%
DoD Total	4,314	3,021	70%

Table A-2 summarizes the compliance status of inspected USTs for each DoD Component.

Table A-2

Compliance Status of Inspected DoD Component USTs					
	Total Inspected	Total In Compliance	Percent In Compliance	Total Out of Compliance	Percent Out of Compliance
Army	966	957	99%	9	1%
Marine Corps	135	115	85%	20	15%
Navy	649	617	95%	32	5%
Air Force	1,271	1,267	>99%	4	<1%
DoD Total	3,021	2,956	98%	65	2%

Non-compliant UST violations by DoD Component are shown in Table A-3.

Table A-3

UST Violations Action and Status

Service	Installation Name	State	Regulatory Agency UST System Identification	Installation UST System Identification	Violation(s)	Actions Taken and/or Planned to Ensure Compliance	Action Status
Army	Fort Indiantown Gap	PA	38-62827		UST release detection	Correcting deficiencies identified in the Warning Letter	In-progress
	Arlington National Cemetery	VA	Pending	00130	No pipe leak detection, tanks not registered, no formal tank closure reports	Leak detection installed, registering tanks, submitting formal closure report	In-progress
	Arlington National Cemetery	VA	Pending	00131	No pipe leak detection, tanks not registered, no formal tank closure reports	Leak detection installed, registering tanks, submitting formal closure report	In-progress
	Fort Jackson	SC	13033	B2420-4	Reporting	Conducted UST leak tests. Corrected software problem that was generating false alarms	In-progress

AETC	LUKE	13970 W. LIGHTNING STREET	GLENDALE	AZ	85309-1149		326GB	Air Force	Air Force	Luke's tank is in non-compliance for failed cathodic protection. Monthly leak testing records show no releases, leak detection equipment is working. There is product stored in the tank as this is the tank for a vital emergency backup generator. The State of Arizona did not issue an Enforcement Action, they issued a Notice Of Opportunity regarding this tank. This notice has been identified as NOT being an EA by Air Staff.	11/9/2005	Local Regulatory Agency	Non-Compliance Letter	Corrosion Protection O&M	PROCURE/INST ALL AST REPLACEMENT, REMOVE UST FROM SERVICE, PERMANENT CLOSURE BY REMOVAL FROM GROUND.	In Progress

AFMC	EDWARDS	225 N ROSAMOND DR	EDWARD AFB	CA	93524-8540		S011-UST	Air Force	Air Force	Update: Results from Aug 2005 indicate UST secondary containment failure, requiring the UST to be replaced. California H&S 25291 requires UST systems to have functioning secondary containment. The tank is currently in service. Tracer testing has been done annually since 2002 and reported to the regulator so that the tank could remain in operation. A project to replace the UST has been funded. The tank will be removed and replaced with an AST by the end of Aug 2006.	2/1/2006	Local Regulatory Agency	Non-Compliance Letter	Spill prevention equipment	TANK WILL BE REPLACED	In-progress

AFSPC	VANDENBERG	1515 ICELAND AVE VANDENBERG AF	LOMPOC	CA	93437-5319		AF-10600-5-UST	Air Force	Air Force	Tank does not have adequate visual overfill alarm. New AAFES station, which will replace old station (where this tank is located) is under construction with an expected completion date of Aug 2006. Once the new AAFES station is operational, the project will remove all USTs at the the old station, including this take. VAFB has worked with County of Santa Barbara Fire Prevention Office (local UST regulator) to allow temporary closure of this tank until all tanks can permanently closed and removed. This tank is expected to be removed by the end of Dec 2006. The regulator will not take any adverse action as long as the tank remains empty and is in temporary/permanent closure status.	1/25/2006	Local Regulatory Agency	Non-Compliance Letter	Spill/overfill control	CONSTRUCTION UNDERWAY.
