

VisioDocument

- Step 0** Extract a VisioDocument from an OLE container
- Step 1** Seek to the start of trailer
- Step 2** Inflate the trailer stream
- Step 3** Extract all pointers to other streams from the trailer
- Step 4** Go through the list of pointers to streams with other pointers (Format 0x5*).
Inflate them if compressed (Format&2 == 1) and extract all remaining pointers recursively
